Jalpaiguri.—Rainfall at Sadar nil, Alipur Duars nil. Weather seasonable. Harvesting of *haimanti* paddy continues. Common rice sells at 11 seers per rupee. Fodder and water sufficient.

Darjeeling.—No rain. Weather seasonable. *Hills—haimanti* paddy, *bara marua*, *phapor*, *kalai dal* being harvested. *Tori*, wheat, barley progressing. *Terai—haimanti* paddy being reaped. Sugarcane being cut. Tobacco, mustard, potato fairly progressing. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Bhutta sells at Darjeeling at 18 seers and at Kalimpong at 30 seers per rupee.

Rangpur.—No rain. Weather seasonable. Harvesting of *aman* going on. Winter crops doing well. Fodder and water sufficient. New rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Gaibanda	11	0	
Kurigram	9	0	
Nilphamari	12	0	

Bogra.—No rain. Weather cool. Harvesting of *aman* is still going on. Prospect good. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Pabna.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Harvesting of *aman* still going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	2	per rupee.
Serajganj	10	5	

Dacca.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 11½ seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Harvesting of *aman* paddy continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	13	0	
Jamalpur	12	4	
Netrokona	12	3	
Tangail	10	0	

Faridpur.—No rain. Weather seasonable. State and prospects of crops good. Common rice sells at 10 seers per rupee.

Backergunge.—No rain. Weather cold. Prospects of crops good. Harvesting of *aman* paddy continues. No cattle-disease reported. Common rice sells at 9 seers (old) and 11½ seers (new) *aman*.

Tippera.—Weather seasonable. Cutting of *aman* still continues. *Rabi* crops doing well. Fodder and water sufficient. Average price of rice 12 seers 5 chitaks per rupee.

Noakhali.—Rainfall nil. Prospects of crops fair. Cattle-disease reported from Lakhmipur. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Chittagong.—Weather seasonable. *Aman dhan* is being reaped. Water and fodder sufficient. Rice selling at 15 seers per rupee. Cattle-disease continues.

Patna.—Rainfall nil Harvesting of paddy continues. *Rabi* and poppy doing well. Rain urgently wanted. Pressing of sugarcane continues. Fodder and water for cattle sufficient. Coarse rice sells as follows:—

	Srs.	ch.	
Patna	14	0	per rupee.
Barh	11	8	
Bihar	12	0	
Dinapur	12	0	

Gaya.—Rainfall nil. Harvesting of paddy continues. Poppy doing well. Rain still wanted for *rabi* crops. Common rice selling at 12¼ seers per rupee.

Shahabad.—Rainfall nil. Weather cool and cloudy at times. Rain urgently wanted for *rabi*. Sugarcane-pressing going on. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers per rupee.

Saran.—Rainfall nil. Weather cold and cloudy. *Rabi* being irrigated where possible and doing well, but rain much wanted. Fodder and water sufficient. Sporadic cases of cattle-disease in Gopalganj still continue. Common rice sells at 11 seers 14 chitaks and maize at 22 seers 13 chitaks per rupee.

Champaran.—Rainfall at Sadar nil, Bettiah nil, Bagaha ·01. *Rabi* sowing finished. Prospects fair, but rain urgently wanted. Threshing of paddy and sugarcane-pressing still going on. Fodder and water sufficient. Prices of common rice and maize at Sadar are 12¼ and 23 seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Weather cloudy at intervals. Harvesting of paddy crop almost finished. Rain badly wanted for *rabi* crops. Prices are—Common rice 11½ seers, wheat 12 seers, barley 18½ seers, maize 21 seers, gram 16½ seers, *arhar* 19½ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall nil. Harvesting of winter rice in progress. Rain urgently wanted for *rabi*. Fodder and water sufficient. Cattle-disease reported from five villages of Darbhanga thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	2	per rupee.
Samastipur	13	0	
Madhubani	12	1	

Monghyr.—No rain. Weather seasonable. Harvesting of paddy and sugarcane-pressing going on. Rain wanted. *Rabi* crops doing well. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Begusarai	11	0	
Jamui	12	0	

Bhagalpur.—Rainfall nil. Weather cold. Harvesting of winter rice continues. *Rabi* doing well. Sporadic cases of cattle-disease reported from Banka and Supaul subdivisions. Fodder and drinking-water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	13	12	
Madhipura	14	0	
Supaul	14	0 (new)	

Purnea.—No rain. Weather seasonable. Harvesting of winter paddy nearly finished. Pressing of sugarcane going on. Rain wanted for *rabi* crops, which are germinating. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee.
Kishanganj	10	0	
Araria	11	0	

Malda.—Rainfall nil. Harvesting of winter rice not finished yet. Prospects of *rabi* crops good. No cattle-disease. Price of rice unchanged. Fodder and water sufficient.

Sonthal Parganas.—No rain. Weather cold and cloudy at times. Paddy harvesting continues. *Rabi* doing well. Fodder and water sufficient. Price of rice 12 seers 11 chitaks and of maize 22 seers 6 chitaks per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* being harvested. *Guru sarad* being cut and harvested. *Rabi* in flowers and pods. Sugarcane being cut. *Dalua* and tobacco being planted. Condition of cattle generally good. Fodder and water available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	7	per rupee.
Jajpur	13	12	
Kendrapara	15	12	
Banki	18	6	

Balasore.—No rain. Harvesting of *kandha sarad* and sugarcane-pressing continue. *Rabi* crops doing well. Cotton flowering. Rice sells at 15¼, 13, and 16 seers per rupee in interior, Balasore, and Bhadrak, respectively. Fodder and water sufficient. Cattle-disease reported from Kamarda chakla.

Angul.—No rain. Weather seasonable. Winter paddy and *rabi* being harvested. Prices of common rice remain unchanged. Fodder sufficient. Khondmals report not received.

The total fall from 1st January to 28th December 1901	70·11
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·24

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The direction and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

LIBERALITY OF MAHARANI SARAT SUNDARI BARMANI OF TAJHAT.

No. 41Medl., dated Calcutta, the 6th January 1902.

From—H. M. KISCH, ESQ., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Rajshahi Division.

No. 93J., dated 14th November 1901.
" 209J., " 6th December "
" 274J., " 18th " "

WITH reference to your letters noted in the margin, reporting that Maharani Sarat Sundari Barmani, of Tajhat, widow of the late Maharaja Govinda Lal Roy, has given the sum of Rs. 12,000 for the construction of a female ward for the new dispensary at Nawabgunge, in the town of Rangpur, I am directed to request that you will be so good as to convey to the Maharani the thanks of the Lieutenant-Governor for her public spirit and liberality.

2. I am to add that this letter will be published in the *Calcutta Gazette.*

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL DURING THE YEAR 1900-1901.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 7th January 1902.

RESOLUTION—No. 70M.

READ—

The reports from the several Commissioners of Divisions on the working of Municipalities in Bengal (except Calcutta) during the year 1900-1901.

Read again—

The Resolution reviewing the Divisional Commissioners' Reports on the working of Municipalities during the year 1899-1900.

The number of municipalities in Bengal during the year ending with the 31st March 1901 was 155. Two new municipalities were formed during the year—at Budge-Budge and Panihati—the latter by dividing the South Barrackpore Municipality which had been found too large for efficient administration.

2. The census of 1901 shows the total municipal population to be 2,833,176 souls. Deducting from this figure the total number of inhabitants (13,120) of the new municipality of Budge-Budge, the recent census shows for the towns under the Municipal Act an increase of 89,247 persons, or 3·3 per cent., over the census figures of 1891. The increase was shared by all Divisions except Patna and Bhagalpur, where the panic caused by the appearance of plague led a large number of the residents of municipal towns to desert their houses temporarily when the census was taken. A revised census of the towns of Patna and Monghyr was accordingly taken in July, with the result of adding 32,817 souls to the municipal population as given by the March census. The July figures are incorporated in this Resolution and its appendices. The largest increases of population—14 and 11 per cent.—occurred in the Burdwan and Chota Nagpur Divisions.

The total number of rate-payers rose from 469,669 in 1899-1900 to 478,519. This represents 17 per cent. of the municipal population, as determined by the late census, which is rather lower than the percentage in 1891, at the census then taken. The rise in the number of rate-payers last year was contributed mainly by the municipalities in the Patna Division where the number of rate-payers shows an increase of 4,651. The municipalities in the Chittagong and Chota Nagpur Divisions alone show a decrease, and it was slight. A revision of assessment in the Bihar Municipality brought to light that many well-to-do persons had escaped the payment of taxes for years and the number of rate-payers rose from 7,266 to 9,329, showing an increase of 28·4 per cent. on the previous year's figures. The Lieutenant-Governor invites the prominent attention of the Commissioners to the very low percentage of rate-payers to population in many municipalities forming the head-quarters of districts, such as Arrah (12·3), Motihari (9·3), Darbhanga (13·1), Cuttack (12·7), Comilla (13·2), and Dacca (13 8), compared with the provincial average of 17, and desires that next year's reports may contain an explanation The income in these cases may be perfectly adequate to the needs of the towns or, as in Dacca, may be largely helped from sources other than taxation; but, ordinarily speaking, the standard of municipal administration is higher at the head-quarters of a district than in outlying places and entails on the residents a higher rather than a lower expenditure. The assessment roll should never exclude any person, who is liable to assessment under the law. It is unfair to those who are included. If a higher income is not required, the assessees are at least entitled to the lower rate which would follow on a better distribution. The percentage of rate-payers to population varied between 32·17 in the Katwa

Municipality in the Burdwan district and 5·6 in the Kurseong Municipality in the district of Darjeeling.

3. *Results of Elections held during the year.*—General elections were held in 20 municipalities, and these were successful in all cases except in two wards of the Deoghur Municipality, where, owing to the absence of candidates for election, Government had to appoint four Commissioners to fill up the vacancies A considerable amount of interest was taken generally in these elections; out of 85 wards in which elections were held, there were contests in 48 wards, and the attendance of voters at the contested elections was fair.

4. *Constitution of Committees.*—There was little variation in the composition of Municipal Committees.

5. *Attendance at meetings.*—There were in all 2,546 meetings held during the year against 2,515 in 1899-1900, and of these, only 207 had to be adjourned, a small proportion. The number of municipalities which held more than 20 meetings was larger than in the previous year; the number of municipalities which failed to hold at least one meeting every month was smaller; good evidence of increased attention to business. The largest number of meetings, viz., 32, was at Ranaghat; Darjeeling held 31 meetings. Only eight meetings were held during the year in the Municipalities of Baranagar, Garden Reach, Jagdispur, Sahibganj, Ranchi, and Raghunathpur, and 7 meetings at Purulia. The important Municipality of Garden Reach has, for three successive years, failed to convene one meeting a month as required by the law. As stated in last year's Resolution, the Commissioners promised to avoid the irregularity. The Commissioner of the Presidency Division will now be separately addressed on the matter. In 108 Municipalities, as against 69 in 1899-1900, an average of more than one-half of the total number of Commissioners attended at each meeting. The highest percentages of attendance were at Hajipur, at North Barrackpore, and at Kamarhati, and the lowest at Dobhatta. On the whole the meetings appear to have been sufficiently frequent and well attended for practical purposes.

6. *Assessments and taxation.*—The main form of municipal taxation is either the rate on holdings or the alternative tax on persons according to their circumstances and property. The former was in force in 43 towns, and the latter in 110. In two, Puri and Bhaddressur, both forms of taxation were in force in different wards. The rate on holdings was levied at less than the maximum rate allowed by the law in 14 towns, including Howrah, Hooghly and Chinsura, Krishnagar, and Darjeeling. The lowest rate levied on holdings was in the new Municipality of Budge-Budge where it was fixed at only 4½ per cent. The tax on persons is levied at different rates in different towns according to requirements. Of the special rates, the latrine-rate was levied in 99 towns, the water-rate in 9 towns which have been provided with a supply of filtered water, and the lighting-rate in 2 towns, namely, Howrah and Darjeeling.

7. The incidence of municipal taxation (excluding Calcutta) varied between Rs. 6-10-6 at Darjeeling and Re. 0-3-10 at Vishnupur in the district of Bankura. The average for the whole Province, calculated on the increased population according to the recent census, was Re. 1-1-5. In 1891-92, on the municipal population then returned, the incidence was Re. 0-12-4; municipal taxation has, therefore, materially increased in the interval. The number of municipalities, in which the taxation is below 8 annas per head, has fallen from 67 in 1891 to 38 in 1901.

8. *Revision of assessment.*—A revision of assessment, general or partial, came into force during the year in several municipalities, the best financial results being attained in the following towns:—

Name of Municipality.	Amount of increase.	Name of Municipality.	Amount of increase.
	Rs.		Rs.
Bihar	10,285	South Suburban	1,494
Patna	5,878	Rampur Boalia	1,462
Garden Reach	5,547	Titagur	1,392
Ranchi	4,594	Krishnagar	1,372
Maniktola	4,331	Dinapore Nizamut	1,236
Darjeeling	3,742	Jalpaiguri	1,122
Nasirabad	1,745	Kendrapara	1,109
Gaya	1,625	Khulna	1,030

The result of the last assessment in the North Barrackpore Municipality having been found to be very unsatisfactory, a fresh revision was directed by Government with the suggestion that it should be entrusted to a paid assessor. There was difficulty also at Baidyabati, and the matter there is still under consideration. There was a decrease of Rs. 3,080 in the Bhagalpur Municipality, numerous objections having been filed against the recent heavy reassessment and the decision of the objections being in favour of the rate-payers.

9. *Demands, collections, remissions and outstandings on account of taxes.*—The current demand rose in the year under report by Rs. 1,02,164 to Rs. 31,86,777; and the total demand on the municipal books, including arrears to Rs. 37,35,303 from Rs. 36,90,413 in 1899-1900. The total collections also rose from Rs. 29,42,162 to Rs 30,25,244, and the outstanding balance stood at the close of the year at Rs. 5,18,670 against Rs. 5,47,306 at the beginning of the year, whilst the remissions fell by Rs. 9,556. In other words, the collections of the year averaged 95 per cent. of the current demand, a creditable performance. The first duty of a municipality is to make a fair assessment; their next duty is to levy that assessment fairly and punctually for the fulfilment of the purposes, for which taxation is imposed. There was an increase of 4·4 per cent. in the collection of the current demand. The year's administration thus showed a general improvement.

10. Turning now to the results attained by the groups of municipalities in each Division, it appears that there was a rise in the percentage of collections in all the Divisions except Chittagong, Patna, and Chota Nagpur, where there were falls of 6, 1, and 8 per cent., respectively. The largest percentage (96) was again attained in the Dacca Division, and the lowest (70) in the Chota Nagpur Division.

11. In individual municipalities the percentage of total collections on total demand varied between 100 per cent. at Tamluk and 43·3 per cent. in the new municipality of Budge-Budge in the 24-Parganas.

In 61 towns, against 51 in the previous year, over 95 per cent. of the total demand was collected, whilst in 31 towns the Commissioners succeeded in collecting over 98 per cent. of the demand. Conspicuous amongst these are the towns of Tamluk, Dumraon, Jhalakati, Sitamarhi, Gaya, Jagdispur, Titagar, Narayanganj, Bazitpur, Deoghur, Madhubani, and Suri, where over 99 per cent. of the demand was realized. The demands of these towns varied between Rs.56,840 at Narayanganj and Rs 2,876 at Bazitpur. The Lieutenant-Governor congratulates all these municipalities on their successful management of the important department of collection.

In last year's Resolution the municipality of Howrah was noticed as the most important of those towns which called for adverse criticism in this respect. The total collections in this municipality during the year under review rose slightly from Rs. 4,35,155 to Rs. 4,48,600, there being an increase of Rs. 14,899 in the realisation of the current demand, as compared with the previous year. The remissions, however, amounted to Rs. 79,450, or 11 per cent. of the demand, and yet the outstanding balance stood at Rs. 1,93,328, including the large sum of Rs 1,38,876 on account of the current demand. The difficulties in the way of collections are thus explained by the Chairman:—

"One part of the income is drawn from an immigrant population of a less stable character than that of any of the towns with which Howrah can be compared, and the other part from great corporations against whom it is impossible to enforce the ordinary provisions of the Bengal Municipal Act.

* * * * * * * *

"For many years the demand has never been properly supervised: it has been allowed to grow and grow; and if large amounts of irrecoverable taxes have been remitted, yet the root of the evil—a demand swollen by amounts purely fictitious—has been allowed to grow and flourish. At last some sort of order has been taken with this; the growth of the demand has been checked, and remissions have been made to the extent of Rs. 79,450, or 11·01 per cent. The reduction of course leaves a much easier task for the present year and chances of a much better percentage in future."

It is reported that the Warrant Department has now been sufficiently strengthened and placed under the personal supervision of the Chairman and that it is increasing in efficiency; and, if arrears are left out of account and the collections are set entirely against the current demand, they amount to 92 per cent., a satisfactory improvement of more than 5 per cent. in the past two years. Also in the last five years the annual collections have increased by 75·7 per cent.,

or nearly two lakhs of rupees; and, although about Rs. 1,14,000 of the increase was due to the imposition of a water-rate, a large addition to the demand from any cause necessarily increases the difficulties of collection. With such a great increase (60 per cent.) as has occurred in the demand in the last five years, it may still take some years before the percentage of collections (62·18) on the total demand rises to the provincial average of 80·9, but the Lieutenant-Governor trusts that the current year's returns will show a marked improvement.

The collections in the municipality of Darbhanga, which were also specially noticed last year as giving a low percentage on the demand, rose to 93·2 per cent. during the past year. The very satisfactory improvement in the collections of this municipality in the past two years is partly due to the proper reduction of a previously excessive demand.

Very unsatisfactory results are noticeable again in the municipality of Bally, where the percentage of collections to total demand was 51·6, against 53·0 in the previous year. Hooghly and Chinsura, Chittagong, and Ranchi are the only other towns in the Province, except the new municipality of Budge-Budge, where the percentage of collections was below 60 per cent. of the total demand. No explanation has been given regarding Bally and Hooghly-Chinsura. At Chittagong the fall was due to the non-payment of rates imposed on the railway property in the town, owing to objections raised by the Assam-Bengal Railway to the mode of assessment. The Commissioner has already drawn the attention of the Chairman of the Hooghly-Chinsura Municipality to the subject, and an explanation is awaited.

12. The percentage of remissions on the total demand for the whole Province fell from 5·4 in 1899-1900 to 5·1; and with improved collections there was a considerably greater fall—from 14·8 to 13·9—in the percentage of the outstanding balance on the total demand.

The percentage of remissions fell in all the Divisions except Burdwan, where the rise was due to the large remission of Rs. 79,450 allowed by the Howrah Municipality. The other municipalities where large remissions were allowed were the South Suburban (12·0 per cent.), Garden Reach (12·9), Budge-Budge (21·6), Nalchiti (18·7), Chandpur (16·04), Bhabhua (12·5), Hazaribagh (18·6), and Ranchi (12·0). The large remissions at Budge-Budge were allowed with a view to rectify incorrect valuations of mill premises. No explanation has been given of the very large remissions granted at Nalchiti and Hazaribagh.

13. *Fresh imposts levied during the year.*—Fees for the registration of carts were levied for the first time in the municipality of Dainhat. Fees under Part IX of the Bengal Municipal Act for the cleansing of private privies were also levied for the first time at Dainhat and in portions of the municipalities of Howrah and Gaya. License-fees under section 261 were levied at Arambagh, Jamalpur, and Chaibassa. Fees under the Hackney Carriage Act were levied for the first time at Khulna and Naihati. Fees under section 263 of the Municipal Act, relating to animals kept for purposes of trade, were also levied at Narainganj and Monghyr. The rate on holdings under section 85(*b*) of the Act was substituted for the tax on persons previously in force at Ranchi and Chaibassa.

INCOME.

14. The total funds available for expenditure during the year were Rs. 49,77,650, against Rs. 46,84,589 in the previous year. The total expenditure was Rs. 43,72,575, against Rs. 40,83,170 in 1899-1900.

15. *Closing balances of Municipalities.*—There was a slight increase of Rs. 3,656 in the aggregate closing balances of the municipalities, which amounted to Rs. 6,05,075. In several cases funds are being accumulated for schemes of sanitation or other municipal reforms, and in others money was reserved for probable plague charges. Savings effected in estimated expenditure during the year and the inability to fully utilise loan funds or contributions also led to the increase of closing balances.

No explanation has, however, been given of the large closing balances of the municipalities of Katwa, Jalpaiguri, Dinajpur, Dacca, Nasirabad, Barisal, Chandpur, Patna, Bihar, Buxar, Sitamarhi, and Deoghur. On the other hand,

the working balances fell so low as Rs. 76 at Burdwan, Rs. 12 at Baduria, Rs. 11 at Jamalpur, Rs. 678 at Bhagalpur, and Rs. 191 at Ranchi.

16. The following statement shows the total income of the 155 municipalities under various heads during the past year and the variations from the previous year:—

HEAD OF REVENUE.	Total receipts, 1900-1901.	COMPARISON WITH 1899-1900.		
		Increase.	Decrease.	Percentage of variation.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1. Municipal rates and taxes—				
(a) Tax on houses and lands ...	10,94,403	26,737	...	+ 2·5
(b) „ on animals and vehicles	2,35,302	9,605	...	+ 4·2
(c) „ on professions and trades	55,281	4,850	...	+ 9·6
(d) Tolls on roads and at ferries	1,43,445	12,170	...	+ 9·2

Total ...	43,76,219	2,10,740	34,962	...
Net increase ...	...	1,75,778	...	+ 4·1

17. Of the total increase in income shown above, the portion derived from taxation, which is a permanent and genuine increase, amounted to Rs. 97,225. The increase was shared by all the Divisions except Chota Nagpur, and was largest in the Rajshahi Division.

18. *Tax on houses and lands.*—This tax yielded a revenue of Rs. 10,94,403, which is Rs. 26,737, or 2·5 per cent., in excess of the income during the previous year. The increase was shared by the groups of municipalities in all Divisions except Rajshahi and the Presidency, where the yield was practically stationary. In the Chota Nagpur Division, this form of taxation was for the first time adopted by the Commissioners of the Ranchi and Chaibassa Municipalities in lieu of the tax on persons, and thus there was an apparent increase of Rs. 10,290. The largest increase occurred in the Patna Division. There were large increases in the municipalities of Bhagalpur (Rs. 7,305), Chapra (Rs. 4,307), Raniganj (Rs. 3,154) Dacca (Rs. 3,043), and Patna (Rs. 2,307). The income fell off considerably in the municipalities of Hooghly-Chinsura (by Rs. 3,065), Cossipore-Chitpur (by Rs. 3,205), and Monghyr (by Rs. 3,327). Better collections of both arrear and current demands and revised assessments completed in the previous year contributed to the increases under this head, whilst delay in the disposal of objections against assessment, laxity of supervision over the collection establishment, absence of large outstanding balances and the appearance of plague were responsible for reduced collections in those municipalities which showed a fall of revenue.

19. *Tax on animals and vehicles.*—There was an increase of Rs. 9,605' or 4·2 per cent., on the revenue under this head in the previous year. The receipts declined in the municipalities of Gaya (by Rs. 1,003) and Darbhanga (by Rs. 1,268). The decrease at Gaya is attributed to a reduction in the number of carriages, horses, carts, and other vehicles owing to an outbreak of plague in that town. In Darbhanga the realisation of heavy arrears in the previous year accounts for the decline of the revenue in the year under review.

20. *Tax on professions and trades.*—The comparatively small revenue of Rs. 55,281 under this head shows an improvement of Rs. 4,850, or 9·6 per cent., on the income of the previous year. The increase occurred mainly in the Burdwan and Presidency Divisions, where the revenue rose by Rs. 2,247 and Rs. 2,351, respectively.

21. *Tolls on roads and ferries.*—Tolls are nowhere levied on roads in Bengal, and in the Chota Nagpur Division none of the municipalities derive any income from ferries. The towns of Dacca and Narayanganj show increases of Rs. 3,075 and Rs. 5,552, respectively, and the Patna Municipality shows an improvement of Rs. 3,031. There was an increase of income in Chapra, in Bhagalpur, and in Cuttack. The receipts declined at Chittagong (by Rs. 1,338), Monghyr (by Rs. 3,250), and Muzaffarpur (by Rs. 1,804). Competition among bidders at the sales of the ferries contributed to the increase in Dacca as well as in Patna and Chapra, whilst in Narayanganj the income is more apparent than real, as the Commissioners have to pay rents to Government for the ferries leased out to them. In Cuttack the realisation of arrears increased the revenue. In Chittagong the District Board having opened out a new waterway, the bids for the municipal ferry fell off; and in Monghyr the establishment of a ferry service by the East Indian Railway reduced the income from the municipal ferry.

22. *Water-rate.*—This rate was levied in only nine towns where waterworks have been installed. The income of Rs. 2,35,982 shows a small increase of Rs. 9,072, which was shared by six towns, and mainly by Bhagalpur (Rs. 4,680), Berhampore (Rs. 4,436), and Howrah (Rs. 3,390). The income fell at Arrah, Cossipore-Chitpur, and Burdwan, and in the place last-named the decline amounted to Rs. 3,169. At Howrah the increase was due to an extension of the water-supply and to better collections. At Berhampore the tax was levied in the previous year for three quarters only, and the additional income for the fourth quarter accounts for the increase. Better collections contributed to the increase at Bhagalpur and in this, as in other matters connected with municipal administration, the Commissioner gives great credit to Mr. Shirres, the Magistrate, who has worked indefatigably for the improvement of the town.

An outbreak of plague accounts for the decline of revenue at Arrah. No explanation has been given of the decline at Burdwan and Cossipore-Chitpur. No rate is levied in Dacca on account of the water-works in that town.

23. *Lighting-rate.*—This is levied only in the towns of Howrah and Darjeeling, where the income rose by Rs. 625 and Rs. 9,492, respectively. The large increase at Darjeeling was due to better supervision of collections and to the receipts on account of house connections with the electric light installation in that town. In Howrah the installation is of gas with Welsbach burners and incandescent mantles.

24. *Conservancy, including scavenging and latrine rates.*—The revenue under this head was Rs. 6,70,774, which shows an increase of Rs. 29,264 over the previous year's income. This increase was shared largely by the Municipalities of Howrah (Rs. 2,867), Kamarhati (Rs. 3,500), Garden Reach (Rs. 6,585), Bhatpara (Rs. 4,262), Dacca (Rs. 2,706), Bihar (Rs. 2,938), Bhagalpur (Rs. 2,292), and Hazaribagh (Rs. 3,635). There was, on the other hand, a marked decline of revenue in the municipalities of Burdwan (Rs. 2,734), Hooghly and Chinsura (Rs. 2,159), Baranagar (Rs. 4,755), and Purulia (Rs. 2,479). The enforcement of Part IX of the Municipal Act in portions of the Bhatpara Municipality accounts for the increase in that place. At Bhagalpur the increase was due to a more efficient administration. The decrease in Burdwan was due to the objections against revision of assessment not having been disposed of during the year, and in Hooghly and Chinsura to a change in the executive and to heavy arrears hampering collections. At Purulia want of proper supervision over the Collection Branch was responsible for the short collection.

Several municipalities continued their efforts towards making trenching-grounds a source of income; but, as in the previous year, the income from this source was trifling.

25. *Tax on persons according to their circumstances and property.*—The total revenue which amounted to Rs. 5,62,415 shows a decline of Rs. 4,284, as compared with the previous year. This is, however, more than accounted for by the nominal decline of Rs. 14,627 in the Chota Nagpur Division, where the tax on houses and lands in the Ranchi and Chaibassa Municipalities was substituted for the tax on persons which was in force in those towns in the previous year. There was a marked decline of income in the municipalities of Arrah, Darbhanga, and Balasore. The appearance of plague and a smaller collection of arrears account for the decrease in Arrah and Darbhanga. The largest increases of revenue occurred in the Dinajpur Municipality, in Bhatpara, Bihar, and Cuttack.

26. *Grants from Provincial and Local Funds and contributions by private individuals.*—The total receipts rose from Rs. 2,47,292 to Rs. 2,95,643. The contributions were—for medical purposes, Rs. 1,69,919, for education Rs. 4,293, and for general purposes Rs. 1,21,431.

27. *Gifts of money or land and works of public utility executed by private individuals.*—Many instances of private liberality are brought to notice in the Commissioners' reports; but as a separate Resolution and a detailed list of private donations for the public benefit have been recently recorded and published, with the Lieutenant-Governor's acknowledgments to the donors, it is unnecessary to specify here all the gifts which relate to municipalities. One of the most important gifts was a contribution of Rs. 15,000 by Babu Baijnath Goenka towards the cost of a scheme for the improvement of the drainage of the town of Monghyr.

EXPENDITURE.

28. The total expenditure in the municipalities in the Province (excluding Calcutta) amounted during the year to Rs. 43,72,575, against Rs. 40,83,170 in 1899-1900, being an increase of Rs. 2,89,405. The year closed with a balance of Rs. 6,05,075, against Rs. 6,01,419 in the preceding year. The percentages which the expenditure under each of the principal

heads bore to the total outlay (excluding debt and suspense heads) in each of the past five years are as follow :—

Year.	General establishment.	Lighting.	Water-supply.	Drainage.	Conservancy.	Medical.	Vaccination.	Public Works.	Education.
1	2	3	4	5	6	7	8	9	10
1896-97 ...	9·8	4·7	15·5	3·4	26·6	9·5	·56	16·1	3·8
1897-98 ...	10·4	7·2	7·4	3 2	30·3	9 7	·57	17 1	3 7
1898-99 ...	10 6	4·4	5·9	3·4	31·7	10·5	·5	16 3	3·4
1899-1900 ..	10·4	5·8	6·5	3 5	29 5	10·5	·5	18 3	3 4
1900-1901 ...	11·4	5·7	6 7	5·2	31 1	11·5	·53	15 0	3·3

As stated in last year's Resolution these percentages do not show the exact state of affairs, as any heavy expenditure on a single item, whether met from loan funds or otherwise, is liable to cause a material alteration in the year's percentage

29. The following statement shows the expenditure of 1900-1901 under the main heads, and also shows how the totals varied from those of the previous year :—

Heads of Expenditure.	Total expenditure in 1900-1901.	Comparison with 1899-1900.		
		Increase.	Decrease.	Percentage of variation.
1	2	3	4	5
1. General administration—	Rs.	Rs.	Rs.	Rs.

Net increase ...	...	2,89,405	...	+ 7·08

30. *Office and collection establishment.*—The total expenditure on office establishment and that on collection establishment show increases representing in all 8·6 per cent. of the expenditure in the previous year. The expenditure under this head is steadily growing, but it is evident from the reports submitted by the Commissioners that, in passing the annual estimates of municipalities this item is carefully scrutinised.

31. *Prevention of fire.*—The expenditure under this head shows an increase of Rs. 3,135. As in previous years, almost the entire amount of the charge was incurred in the municipalities which are served by the Metropolitan Fire-brigade and contribute to its cost, viz., Howrah, Cossipore-Chitpur, Maniktala, and Garden Reach.

32 *Street lighting.*—The expenditure rose from Rs. 2,13,611 to Rs. 2,20,292, an increase of 3 per cent. The increase was largest in the Orissa Division (Rs. 2,245), and was incurred mainly by the Cuttack Municipality. Thirteen municipalities incurred no expenditure on this service, as against 16 municipalities in the previous year.

33. *Water-supply.*—The expenditure under this head, Rs. 2,60,262, shows an increase of 8 per cent., over the expenditure in the previous year. The increase was considerable in Burdwan (Rs. 9,869), the Presidency Division (Rs. 5,803), Bhagalpur (Rs. 3,644), and Chota Nagpur (Rs. 2,984). At Howrah an increased cost of Rs. 4,095 was incurred on the maintenance of the water-works. The schemes for the extension of the filtered water-supply from the Calcutta mains to the South Suburban and Garden Reach Municipalities have not yet been carried out. The supply of filtered water from the Calcutta mains was extended to the South Dum-Dum Municipality through the local Cantonment pipes. The Darjeeling Municipality obtained a loan of Rs. 1,65,000 from Government for the improvement and extension of the water-supply in that town, and it is estimated that the new works will raise the supply to 270,000 gallons in 24 hours. The Pasteur-Chamberlain filter, which was constructed in the town, was removed by the contractors, as it failed to work properly. In Dacca 2,042 feet of additional

piping were laid, and two new hydrants were put up by the Municipality. The question of water-supply in that town has been much complicated by the shifting of the stream of the river and the formation of a big *char* in front of the water-works suction pipe. It is in contemplation to sink a series of wells in the *char* near the intake for the supply of good water. One such well was sunk during the year and, as the conditions of the soil and rainfall are different from those at Bhagalpur, it is hoped that the experiment will be more satisfactory than the one mentioned below. As regards the municipalities in the Patna Division, the Commissioner reports that on the whole the supply of water was adequate and good, and no scarcity of drinking water was felt. At Bhagalpur very great difficulty was felt in bringing water to the intake, owing to the river having receded. To meet the difficulty an experimental percolation well, lined with bricks loosely packed together, was sunk in the sands just below the water-works. The idea was to make a series of such wells connected with each other, from which a plentiful supply of ready filtered water could be drawn. Experience, however, showed that the percolation well yielded very little water and that it silted up during the rains. The Commissioners also made experimental borings in the sand to a depth of 50 feet, but did not find the water-bearing strata. Having regard, therefore, to a probable improvement in the river in the immediate future, the Commissioners have decided to postpone further expense on both wells and borings, although in the cold weather, as usual, there was considerable scarcity.

34. *Drainage.*—The total expenditure rose to Rs. 2,03,519, showing an increase of 55 per cent., over the expenditure of the previous year. This increase occurred under both capital outlay (Rs. 38,483) and maintenance charges (Rs. 33,744). The increase was shared by all the Divisions and was largest in the Patna Division (Rs. 28,647), Presidency (Rs. 16,457), Bhagalpur (Rs. 13,355), and Rajshahi (Rs. 7,526). The municipality of Patna contributed largely to the increase in the Patna Division. There the expenditure shows an increase under capital expenditure of Rs. 19,367, and under maintenance charges of Rs. 2,402. In addition to other works, new masonry drains, over a mile and-a-half in length, were constructed and linked up with the flushing scheme. Upon the important and successful operations, which have done so much during the last few years for the sanitation of the city of Patna, the Commissioner make the following very pertinent remarks:—

"In Patna the extension of the drainage system, the linking up of the old drains, and above all, the extension of the flushing of the drains, have been an immense improvement. It is everywhere forced upon our notice that in an Indian town the complement of pucka drains is flushing. It is impossible to keep sullage water out of the drains, and if it cannot be flushed away outside the town, the drains become a serious nuisance Though not, perhaps, more unhealthy in the long run, such drains are more universally unpleasant than the kutcha drains, which absorb much of the sullage water. With much improvement effected, there is still much to be done in Patna. When money is available, the flushing scheme should be completed. The most immediate urgent want, which can at present be supplied, is an efficient and economical workshop and more system and method for the maintenance, in efficient order, of the carts and material for cleansing the town.

In the Presidency Division the Krishnagar Municipality expended Rs. 13,472 on the excavation of the Anjona channel in that municipality. In the Bhagalpur Division the largest increase was in the Monghyr Municipality (Rs. 10,641) where the new roadside drains in the Chowkbazar, for which the municipality borrowed a sum of Rs. 10,000 from Government, were taken in hand and completed during the year. The late Chairman also raised a sum of Rs. 18,280 by subscriptions to enable the municipality to take in hand the roadside drains at Baribazar and their outfalls and beds, and the work has been begun. The Commissioner notices with approval the commencement made in improving the drainage of the town of Purnea. In the Rajshahi Division the municipalities of Rangpur and Dinajpur show the largest increases of Rs. 4,383 and Rs. 2,828, respectively.

35. *Conservancy (including road-cleaning, road-watering, and latrines).*—The expenditure of Rs. 12,08,614 shows a large increase of Rs. 1,21,823 as compared with the previous year. The increase was shared by all the Divisions except the Presidency Division. The largest increase occurred in the Divisions of Patna (Rs. 66,232), Burdwan (Rs. 21,369), and Dacca (Rs. 20,939). In the

Patna Division the increase was most marked in the municipalities of Bihar (Rs. 23,805), Patna (Rs. 18,526), Chapra (Rs. 9,389), and Gaya (Rs 8,229). In Patna arrangements have been made to clean the principal roads a second time each day In Chapra measures for the prevention of plague account for the increase. About the conservancy system in Gaya, the Commissioner makes the following remarks. The experience there may be of value elsewhere:—

"In Gaya the steam-tramway system for removing the night-soil seems likely to collapse. Either more money must be spent to perfect it or it will have to be given up. In many places the tramway has been built too lightly with the sleepers too far apart. There is an insufficiency of rolling-stock. There is a want of suitable depôts linked up with the tram line, where a waggon could be left in a comparatively secluded spot to be loaded up. The arrangements for distributing the night-soil over the trenching-ground require improvement. A workshop is needed for petty repairs. All this will cost money, and I fear the Municipal Commissioners, including their Chairman, are not sufficiently convinced of the suitability of the tramway system to carry the business through. Certainly, in the absence of any efficient mechanical or engineering talent in the Board to meet difficulties as they arise and see the business through, it would have been better to have been content with the more humble system of carts, specially as the trenching-grounds are not so very far off. But now a large sum has been borrowed and spent on the tramway system, and the municipality are very much in a fix."

In the Burdwan Division the increase was contributed mainly by the Howrah Municipality, which enlarged its working staff and purchased a large number of animals. The rise in the Dacca Division was greatest in the Dacca and Narainganj Municipalities. In Monghyr the expenditure rose by Rs. 5,263 from measures taken to protect the town against plague.

36. *Hospitals and Dispensaries.*—The expenditure under this head rose from Rs. 3,89,172 to Rs. 4,45,642—an increase of 14·5 per cent. In the Presidency and Chittagong Divisions the expenditure declined by Rs. 12,930 and Rs. 6,796, respectively. The decrease in the former was mainly in the municipalities in the 24-Parganas (Rs. 6,673) and in the Khulna Municipality where the expenditure of the previous year was abnormal, owing to the construction of buildings for a hospital and outdoor dispensary. The decline in the Chittagong Division was due in part to large capital expenditure in the previous year. In the Patna Division a large increase of expenditure is returned by the municipalities of Gaya (Rs. 27,112), Dinapore (Rs. 3,923), Chapra (Rs. 2,142), and Patna (Rs. 2,118). In Gaya quarters were constructed for the Assistant Surgeon and the female Hospital Assistant, and a new operating room was added to the Pilgrim Hospital. At Puri a ward was built for moribund cases, and at Purulia an addition made to the dispensary building of a ward for females. Five municipalities incurred no expenditure on this account during the year under review.

37. *Vaccination.*—The total expenditure under this head (Rs. 20,774) shows a slight increase of Rs. 1,165. The special appendix, which used to contain detailed information as to cost, number of vaccinators, operations, etc., has been abolished, but the narrative portion of the Commissioners' reports should in future give, for each municipality at the head-quarters of a district, the number of vaccinators and the number of primary and other operations.

38. *Public Works.*—The expenditure under this head declined from Rs. 6,73,847 to Rs. 5,83,174, the decrease occurring under "Buildings," "Roads," and "Stores," and being largest under "Roads" (Rs. 78,119).

39. *Public Instruction.*—The expenditure under this head, amounting to Rs. 1,26,923, was practically the same as in the previous year. The expenditure on primary schools diminished from Rs. 68,388 to Rs. 66,881.

40. *Loans.*—The Darjeeling Municipality drew during the year Rs. 1,50,000, being the balance of a loan of two lakhs for water-supply and repairs to the electric light installation which was damaged by the cyclone of the previous year. The Chittagong Municipality obtained a loan of Rs. 7,000 for the purchase of a steam-roller. A loan of Rs. 50,000 was obtained by the Patna Municipality for carrying out a scheme for the flushing of the drains in an important ward of the municipality.

41. *Financial condition of Municipalities in debt to Government.*—All the municipalities indebted to Government paid the interest and instalments on their loans in full, and no instance of default was brought to the notice of

Government. In a few municipalities the ordinary expenditure exceeded the ordinary revenue of the year, but the funds available (inclusive of the opening balance) enabled the Commissioners to duly meet their loan liabilities in addition to the regular charges of administration. It does not appear from the accounts that there is any danger that any of the municipalities will, in the ordinary course, be unable to meet their liabilities in future.

42. *Audit of accounts and embezzlements.*—A considerable number of cases of embezzlement came again to notice during the year under review, most of them being facilitated by laxity of supervision over the collection establishment. The defalcations occurred in the municipalities of Kharar, Bhatpara, Baruipur, Krishnagar, Maniktala, Kishanganj, and Ranchi.

43. *Working of the Porters' and Dandiwallas' Act.*—The Act, V (B.C.) of 1883, is in force only in the Darjeeling Municipality. The total number of porters and *dandiwallas* registered during the year was 775, against 653 in the previous year. There were 23 prosecutions under the Act, against 25 in 1899-1900, and the amount of fines realised was Rs. 40. One license was cancelled during the year. The law continued to be carefully worked.

44. On the whole, the reports of the year's work are hopeful and the Lieutenant-Governor gratefully acknowledges that in many Municipalities a large amount of time has been freely given by the Municipal Commissioners to the public service. There are still complaints in the Burdwan and Presidency Divisions of deficiency in the "patient and steady performance of those duties, which involve daily drudgery and unpopularity, such as the prevention of nuisances and encroachments and the close supervision of work out-of-doors," to quote the words of the Commissioner of the former Division. But these are defects which have been overcome elsewhere, and the Lieutenant-Governor trusts the District Officers so to encourage and stimulate the public spirit of the Commissioners that they may give to the working of the administration in their several wards that attentive personal supervision which is essential to the prevention of negligence, waste, and corruption.

By order of the Lieutenant-Governor of Bengal,

H. M. KISCH,

Offg. Secretary to the Government of Bengal.

FORM No. I.—*Statement showing the constitution of the Municipalities in Bengal during the year ending 31st March 1901.*

January 6th, 1902

J. E. O'Conor,
Director-General of Statistics

F. A. Slacke,
Secretary to the Government of Bengal

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of December 1901.

		Date.	Hour.
	Inches.		
The mean pressure of the month ...	30·041		
The average pressure of December from 24 years' registers ...	30·027		
The highest pressure in the month ...	30·173	18th	10
The lowest pressure in the month ...	29·912	24th	16
The range of pressure ...	0·261		
	Hours.		
The total number of hours of bright sunshine during the month	250·0		
The maximum possible number of hours of sunshine ...	332·8		
	°		
The mean temperature of the month ...	65·2		
The average temperature of December from 24 years' registers ...	68·0		
The highest temperature in the month ...	81·7	1st	
The lowest temperature in the month ...	51·2	24th	
The range of temperature during the month ...	30·5		
The mean daily range of temperature ...	21·5		
The greatest range of temperature in one day ...	27·0	27th	
	Per cent.		
The mean humidity of the month ...	72		
The average humidity of December from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month ...	0·436		
The average vapour tension of December from 9 years' registers	0·476		
The mean cloud proportion of the month ...	2·39		
The average cloud proportion of December from 24 years' registers ...	1·55		
	Inches.		
The total rainfall of the month ...	Nil.		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil.		
The average fall of December from 48 years' registers ...	0·23		
The greatest fall in 24 hours ...	Nil.		
	Days.		
The number of rainy days in the month ...	Nil.		
The average number of rainy days in December from 24 years' registers ...	1		
	°		
The mean maximum equilibrium temperature of solar radiation during the month ...	128·0		
The mean difference of sun and air temperatures ...	50·6		
The greatest sun temperature ...	135·9	26th	
The greatest excess of sun over air temperature ...	60·1	26th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth ...	49·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground ...	6·5		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature ...	8·4	31st	
	Miles.		
The mean movement of the wind per day ...	66·5		
The greatest movement of the wind in one day ...	99·0	30th	
The greatest movement of the wind in one hour ...	12·0	23rd 24th 30th	1 to 2 P.M. 11 to noon. 2 to 3 P.M.

The number of hours with winds from each of the 8 points—
N. 290, N.E. 12, E. 0, S.E. 0, S. 0, S.W. 26, W. 46, N.W. 235, Calm 135.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·3 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 6th January 1902.

Results of the Meteorological Observations taken at the Alipore Observatory from 29th December 1901 to 4th January 1902.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·24

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

Total ...	1,60,407	1,98,[illegible]	1,75,[illegible]	1,67,[illegible]	1,37,[illegible]	1,38,[illegible]	1,53,511	1,40,492	1,56,675	1,67,732
Net Revenue ...	...	...	...	13,[illegible]	11,180	27,678	...	14,725	6,[illegible]	...
GRAND TOTAL ...	1,60,407	1,98,[illegible]	1,75,[illegible]	1,80,[illegible]	1,[illegible],174	1,[illegible],158	1,53,511	1,55,217	1,62,409	1,67,732

2. The receipts amounted to Rs. 1,63,663, showing a decrease of Rs. 11,435 over the receipts of the previous year. They do not, however, include the receipts from tolls on railway traffic, to the amount of Rs. 15,088, which though due, were only recovered after the close of the year.

3. The total expenditure amounted to Rs. 1,66,407, against Rs. 1,93,675 in the year before, showing a reduction of Rs. 27,268. This is due mainly to a large decrease in the expenditure on "Repairs" and is accounted for by the fact that the Ferry steamer *Buckland* was about to be sold.

4. As in the previous year, in addition to the ordinary receipts, the following sum, which may be classed as extraordinary, was received:—

	Rs.
Interest on Government securities of Pontoon Renewal Fund	2,336
The corresponding expenditure under the same head was on Sinking Fund on Trust loans	4,503

5. The Bridge was opened for the passage of vessels on 157 occasions, of which, 104 were on the ordinary fixed days of the week, while 53 were on Sundays, on special application. The number and description of vessels which passed through the Bridge on these occasions are shown below:—

Vessels.	1900-1901	1899-1900.	1898-99.	1897-98.	1896-97.	1895-96.	1894-95.	1893-94.	1892-93.	1891-92.
1	2	3	4	5	6	7	8	9	10	11
Sea-going vessels	141	130	110	[illegible]	266	341	282	291	300	254

Total ...	2,417	2,363	2,260	2,412	[illegible]	2,073	2,201	2,063	2,074	2,086

6. No sea-going vessel collided with the Bridge. The total number of casualties was 233, against 165, 167 and 129 during the three previous years respectively; of these, 195 were casualties to country and other boats.

By order of the Lieutenant Governor of Bengal,

R. B. BUCKLEY,

Secretary to the Govt. of Bengal.

SETTLEMENT OF ORISSA.

Notification No. 203.—The 10th January 1902.—The following Resolution is published for general information:—

The settlement has been confirmed by the Government of India.

F. A. SLACK,
Secy. to the Govt of Bengal.

REVENUE DEPARTMENT—LAND REVENUE.

Darjeeling, the 4th October 1901.

RESOLUTION No. 1632T.—R.

READ—

The Final Report on the Settlement of the Province of Orissa (exclusive of Khurda) by Mr. S. L. Maddox, I.C.S.

Read also—

The Director of Land Records' letter No. 1549S., dated the 24th July 1900, to the Board of Revenue, reviewing the above report, and the Board's letter No. 1304A., dated the 7th November 1900, submitting it to Government with their remarks.

Introductory.—The elaborate and very interesting report submitted by Mr. Maddox completes the history of the resettlement of the Province of Orissa. It deals with the history of the Province and the races inhabiting it, its agriculture, and the material condition of the people, the fiscal history of the temporarily-settled areas under settlement, the proceedings undertaken for their resettlement, and the results of those proceedings, as they have affected both the Government and the people. The Director of Land Records rightly calls it a "veritable Encyclopædia of the Province." So momentous an undertaking will not again be necessary.

2. *Nature of the operations.*—The work of the Settlement Officer was one of great magnitude. The operations extended over a period of ten years from the end of 1889 to the end of 1899 and over an area of 5,000 square miles. Rents have been settled for a million and-a-half of tenants, and the Government revenue on nearly six and-a-half thousand estates.

3. *Area.*—The area of the Province amounts to over 24,000 square miles, of which about 17,000 square miles are covered by the hills in which are included the Tributary States, the district of Angul, and the Government Estate of Khurda in Puri, and 7,000 square miles by the alluvial plains lying between these hills and the plains. Mr. Maddox's report deals in detail with the survey and settlement of the plains portion of the Province, excluding the permanently-settled area and the area covered by the Chilka Lake. It appears that out of an area of 5,897 square miles, comprised in 13,589 villages, 3,903 square miles or 66 per cent. are cultivated, 544 square miles or 9 per cent. are culturable, but not cultivated, and 1,450 square miles or 25 per cent. are unculturable. Out of the uncultivated area, 177 square miles or 3 per cent. of the total area have been formally reserved as grazing or cremation grounds, and encroachment on these grounds has been strictly forbidden.

4. *Population.*—The population number 4,200,000, of which 4,090,000 are Hindus, while of the rest 98,000 are Muhammadans, 4,000 Christians, and 8,000 belong to other religions. In paragraph 219 of the report an interesting table is given of the various castes to which the Hindu population belongs, and from paragraph 170 it appears that 2½ millions are returned as agriculturists.

5. *Early revenue settlements.*—Mr. Maddox treats of the early revenue settlements of the Province, before the commencement of the British rule, in paragraphs 233 to 241 of the report. The first regular settlement of the Province was begun in A.D. 1582 by Akbar's victorious General Todar Mull, and concluded in 1591 by Raja Man Singh. The settlement of Akbar is given in the Ain-i-Abkari at 17 lakhs of rupees, and was continued till 1742, when the Mahrattas invaded the country. From 1751 Orissa became a Mahratta province under the management of a *Subadar*. The Mahratta demands knew no limit;

defaults in payment subjected the *talukdar* to dispossession, imprisonment and fine, and when all other means failed, the Mahratta cavalry harried the country and plundered the villages. The *talukdars* in their turn, when pressed, retaliated on the people by levying extraordinary cesses. Along the sea coast and in the hilly regions on the west known as the Rajwara, the old organisation survived unaltered. This tract included the territories of some of the feudal chieftains who ruled over the barbarous races of the hills, and the lands assigned in the settlements of Todar Mal and Raja Man Singh to the descendants of the Hindu kings. The Raja of Khurda had to buy peace from the Mahrattas by ceding to them some of his parganas, and many petty *Rajas* along the coast were reduced to the position of ordinary zamindars.

6. Such was the state of affairs when the British Commissioners in 1803 found themselves confronted with the necessity of making a settlement of revenue for the Province. In paragraphs 242 to 249 Mr. Maddox describes the history of the earlier settlements made by the British from 1803 to 1830, which, the Director of Land Records observes, "is an unfortunate record of assessment on insufficient enquiry and of the enforcement of inelastic rules for the realisation of inequitable revenues," and he shows incidentally how many an old Uriya family was ruined, and how the proprietorship of the land fell, in many cases, into the hands of Bengali speculators. Between 1805 and 1820 the revenue rose fitfully from about 11 lakhs to 13½ lakhs, with but little justification for the increase in either the spread of cultivation or the circumstances of the people. From the year 1820 to 1830 but little change appears to have been made in the revenue demand.

7. *Settlement of 1837.*—The present prosperity of the Province owes its origin to the great settlement of 1835—1845. Preparations for this settlement were commenced as early as 1830, and it was held to run from 1837, although the proceedings were not concluded till 1845. The procedure adopted at this settlement is fully described by Mr. Maddox in paragraphs 250 to 253 of his report. The operations cost upwards of 20 lakhs, and the result was an increase to the revenue of only Rs. 34,980. Attention is drawn to the knowledge, experience, and sympathy exhibited by all the officers connected with the settlement, and particularly by Mr. Mills, Sir Henry Ricketts, and Mr. Wilkinson. The settlement was originally made for 30 years and expired in September 1867, but for two years previously the Province had suffered from the disastrous famine of the years 1865-66, and it was considered inexpedient to attempt a resettlement until time had been allowed it for recovery. Accordingly that settlement was prolonged for another 30 years.

8. *Land Tenures.*—In Chapter XI of his report Mr. Maddox has described the rights and liabilities of the various classes in occupation of the land, and shown how those rights have developed and changed during the nineteenth century, and how they may be affected by the present settlement and by actual or proposed alterations in the land laws. At the conquest of Orissa in 1803, the Commissioners appointed for the settlement of the Province found in possession a variety of proprietors and *quasi*-proprietors, whom the Settlement Officer has enumerated and described. The rights of these very different classes were not identical, and none of them, except the zamindars and *khandaits* of the border, seem to have had before the British conquest any proprietary right.

In addition to the real zamindars who held proprietary rights under the Mahrattas and were borne on their revenue roll, the settlement of 1803 recognized many hereditary mokuddums, who had paid their revenue directly into the public treasury, and the holders of any considerable rent-free or quit rent tenures, and various titles of Chaudhri kanungo and mokuddum soon merged into the general proprietary title of zamindar. Under these zamindars again was recognised a class of subordinate proprietors or proprietary tenure-holders, paying their revenue through the zamindars of the estates within which their lands lay. With them may also be mentioned *lakhiraj bahaldars*, or holders of confirmed revenue-free lands, who possess a permanent right to hold their lands free of land revenue, and are independent of the zamindars of whose estates their lands originally formed a part, except in so far as they are bound under Act IX (B.C.) of 1880 to pay certain cesses through those zamindars.

The principal tenantry who hold beneath the proprietors or proprietary tenure-holders mentioned above may be divided roughly into seven classes: (1) the *Tankidars*, or holders of small areas permanently assessed at a quit-rent; (2) the *Nisfi-bazyaftidars*, or holders of resumed rent-free lands assessed for the term of the last settlement at half rates; (3) the *Kamil bazyaftidars*, or holders of resumed rent-free lands assessed at the last settlement at full rates; (4) the *Thani* raiyats, or resident cultivators, whose rents were fixed for the term of the settlement; (5) the *Chandina* raiyats, or holders of homestead lands, whose rents were also fixed for the term of the settlement, (6) the *Pahi* raiyats, or non-resident raiyats, who were practically, in most cases, tenants-at-will; and (7) the holders of service and other *jagirs* who held their lands rent-free, either in consideration of services to be rendered, or as rewards for services in the past. Of these, of course, far the most numerous and important are the *Thani* and *Pahi* raiyats, the resident and non-resident cultivators.

9. *The settlement of 1837. Revenue.*—The temporarily-settled areas were settled with about 8,000 proprietors in 3,571 estates, and the following table shows how the area of the temporarily-settled lands was dealt with, and how revenue was assessed on the estates comprised within them:—

District.	Total area.	Cultivated area.	Assessed area.	Assets as found by Settlement Officer.	Revenue assessed by Settlement Officer.	
					Percentage of assets.	Amount.
	Acres.	Acres.	Acres.	Rs.		Rs.
Cuttack	1,174,900	697,000	621,000	11,21,000	64	7,14,100
Balasore	943,993	554,000	493,200	5,75,600	65	3,77,290
Puri	499,100	377,000	302,400	4,41,600	66	2,92,800
Total ...	2,617,993	1,628,000	1,416,600	21,38,200	65	13.84,190

These figures show that the incidence of revenue was Re. 1-2-5 per assessed acre in Cuttack, As. 12-3 per acre in Balasore and As. 15-6 in Puri, or As. 15-7 for the whole Province, and that the balance of the assets left to the zamindars amounted to Rs. 4,06,900 in Cuttack, Rs. 1,98,310 in Balasore, Rs. 1,48,800 in Puri and Rs. 7,54,010 in the Province as a whole.

10. *Rents.*—The following table shows how subordinate tenancies were treated at the last settlement:—

Class.	Cuttack.				Balasore.				Puri.				Total.			
	Area in acres.	Percentage of assessed area.	Rent.	Incidence per acre.	Area in acres.	Percentage of assessed area.	Rent.	Incidence per acre.	Area in acres.	Percentage of assessed area.	Rent.	Incidence per acre.	Area in acres.	Percentage of assessed area.	Rent.	Incidence per acre.

From this it appears that Balasore was assessed lightly, the population being scanty, the soil poor, and the lands liable to flood and interspersed with considerable tracts of jungle. Puri, though also liable to floods, was more closely cultivated and a larger proportion of the area was held by resident tenants, for whom comparatively high rents were settled. Cuttack was then, as it is now, by far the most prosperous district, being less liable to flood, having a more fertile soil, and being in a more advanced stage of civilisation. The rents of *pahi* raiyats, which have always been more or less competition rents in Orissa, reflect with much accuracy the general conditions obtaining

in each district, the incidence of such rents standing at Re. 1-14-6 for Cuttack, Re. 1-7-8 for Puri and Re. 1-2-11 for Balasore.

11. *Changes during the currency of the past settlement.*—During the 60 years of the currency of settlement of 1837, the Province has developed in every direction; the population has increased by over 80 per cent., cultivation has extended by 30 per cent., communications have been largely improved, bringing an increase in the volume of trade, and the prices of staple food-crops have trebled, securing largely increased profits to cultivators. This development has naturally been accompanied by an increase in the rents of the *pahi* raiyats, the only class for whom rents were not fixed for the term of the settlement, and the figures given by Mr. Maddox show that the incidence of their rents advanced from Re. 1-14-6 to Rs. 2-11-6 in Cuttack, from Re. 1-2-11 to Re. 1-11-1 in Balasore, and from Re. 1-7-8 to Re. 1-13-8 in Puri. On the other hand there has been a remarkable decrease in the area of the *thani* tenancies. These tenancies, as the holdings of resident tenants, naturally embraced all the best lands of the villages, and the customary privileges of the resident tenant included many important privileges. He had the right to take up waste land at privileged rates; he had rights of pasture and fuel; his occupancy was hereditary; his rent was fixed; and he could be disturbed only on failure to pay his rent. His rent was therefore much higher than that of the non-resident tenant. It was believed at the last settlement to be too high, notwithstanding all these advantages, but as a general rule the rents found to be actually paid were confirmed. The breakdown is attributed by Mr. Maddox to the famine years of 1865-66. The result was serious. The area under the *thani* tenure is now only 58 per cent. of what it was in 1837.

Among other changes which took place in the course of the last settlement was the multiplication of estates and of landlords, the number of estates rising from 3,571 to 6,377, and the number of individual landlords from 8,000 to 42,400. As might have been expected, the lands in the direct possession of the landlords increased proportionately, and the following figures show the increase in these lands, and in the valuation made of them, in the sixty years :—

District.	Last settlement.		Existing.	
	Area.	Valuation.	Area.	Valuation.
	Acres.	Rs.	Acres.	Rs.
Cuttack	42,300	75,400	85,800	2,23,200
Balasore	20,400	25,100	46,600	81,100
Puri	26,000	46,800	40,100	80,200
Total ...	88,700	1,47,300	172,500	3,84,500

12. *Present settlement.*—The present settlement was commenced at the end of the year 1889 and extended over a period of ten years. The essential questions connected with these operations are (1) the settlement of rents, and (2) the settlement of revenue. The proceedings undertaken for these purposes and their financial results are summarised below.

13. *Settlement of rents.*—With regard to the important question of the settlement of rents, it appeared that the rents of a very large number of tenants, holding at privileged rents for the term of the settlement, had to be revised at the present settlement, while it was known that cultivation had largely extended during the same period, and that there were considerable areas in the possession of both landlords and tenants that had never been assessed to revenue or rent. In 1891, the lines were suggested on which rents were ultimately settled in Orissa for the important classes of tenants known as *pahi* and *thani* raiyats, although before they were finally adopted many experiments were made with the object of utilising the "prevailing rate" section of

the Bengal Tenancy Act, in order to level up inadequate rents and to secure uniformity in the rents to be settled during the proceedings. After prolonged correspondence a set of rules was laid down, with the approval of the Government of India, for the guidance of officers in the settlement of rents. The general principles as regards *pahi* and *thani* raiyats were that the existing rents of *pahi* raiyats should, as a rule, be taken as fair and equitable, and that the rents of *thani* raiyats, if the *thani* rate was less than the village rate, should not ordinarily be enhanced by more than half the percentage of the difference between the two. The village rate was calculated on the basis of *pahi* rents, and *pahi* rents, being competition rents, were thus accepted as the standard of the limit of enhancement.

14. *General results of the settlement of rents.*—The aggregate effect of the working of the rules for the settlement of rent may be summarised in the following statement showing the enhancement of the assets effected by the Settlement Department in the course of the proceedings:—

District.	Number of holdings.	Area.	Existing assets.	Settled assets.	Percentage of enhancement.	Incidence of settled assets per acre.
		Acres.	Rs.	Rs.		Rs. A. P.
Cuttack ...	650,600	822,500	18,47,400	20,72,900	12	2 8 3
Balasore ...	370,290	692,200	9,88,800	11,51,400	16	1 10 7
Puri ...	204,400	373,300	5,73,700	6,43,300	12	1 11 7
Total ...	1,225,290	1,888,000	34,09,900	38,67,600	13	2 1 0

Of the total number of rents settled, Mr. Maddox estimates that in 54 per cent. the existing rents were retained; in 13 per cent. an enhancement was made on the ground of excess area; in 24 per cent. an enhancement was made on other grounds; while 3 per cent. were reduced for loss of area and 6 per cent. were tenancies newly assessed. The rent enhancement on the classes with which we are principally concerned is even more moderate than the table indicates. The increase on the tenants of the old *thani* holdings is only 6 per cent. The name of the *pahi* tenant now disappears from the settlement records. As a matter of fact, the *pahi* tenant of 60 years ago had ceased to be non-resident. He has settled down on his cultivation, and under the operation of the Bengal Tenancy Act, he has become an occupancy tenant with all the rights and privileges which that Act has given. Of the 1,888,000 acres in cultivation, 904,700 acres are held under this new right, and out of that great total there are only 23,100 acres held without a right of occupancy in some form or other (paragragh 512 of the report). There is no part of Bengal in which under the joint operation of law and record the protection of the tenant is more complete than it is now in Orissa. The enhancement of 13 per cent. which the table shows is in truth mainly due to an increase from Rs. 94,600 to Rs. 2,38,500 on the rentals of the class of tenants locally known as *Nisfi bazyaftidars.* These people, as has been before explained, were given holdings for the term of settlement at what were supposed to be half rates. They turned out to have been really pepper-corn rents, and the rents, which have now been fixed, are not more than one rupee per acre, which is less than half the present market value of the land.

15. *Assessment of revenue.*—The Secretary of State in his Despatch No. 20Rev., dated the 3rd February 1898, approved the proposal made by the Government of Bengal, and supported by the Government of India, that from 50 to 55 per cent. of the assets should be taken as revenue, at the same time directing that the limit of 55 per cent. should be very rarely exceeded. In the matter of the term of the settlement, the Secretary of State differed from both Governments in their recommendation of a 20-year settlement, and ordered that the new settlement should be

concluded for a term of 30 years. The actual percentage of the assets taken has been 54 per cent. Nearly 6,400 estates situated in 11,000 villages were assessed to revenue. The assessment was made for every individual estate by the Settlement Officer himself, and the proprietors of only five estates refused to accept the assessment that has been made. The assessments have been carried out with great care and tact by Mr. Maddox, and the result has been a settlement fair to all parties, with an increased revenue that the Collectors find no difficulty in realising.

16. *Results of the settlement of revenue.*—The following statement shows the general results of the present settlement of revenue as compared with the existing state of affairs found by the Settlement Department:—

Districts.	Existing assets.	Existing Revenue.		Settled assets.	Settled revenue.	
		Percentage of existing assets.	Amount.		Percentage.	Amount.
	Rs.		Rs.	Rs.		Rs.
Cuttack ...	18,47,400	38	7,14,100	20,72,900	53	10,99,300
Balasore ...	9,88,800	38	3,77,290	11,51,400	55	6,29,073
Puri ...	5,73,700	51	2,92,800	6,43,300	58	3,76,700
Total ...	34,09,900	41	13,84,190	38,67,600	54	21,05,073

In Puri two-fifths of the revenue is paid by two estates, in which the incidence of the new assessment is 60 per cent. of the revised assets, but the effect is to reduce the proprietors' income by only 5 per cent. (paragraph 555 of the report).

The increase in revenue as shown in the above table amounts to 54 per cent. in Cuttack, 67 per cent. in Balasore, and 28 per cent. in Puri, or 52 per cent. for Orissa as a whole. The incidence of the new revenue is compared with the incidence of revenue at the last settlement in the table below:—

District.	Assessed area.		Revenue.		Incidence.	
	Last settlement.	Present settlement.	Last settlement.	Present settlement.	Last settlement.	Present settlement.
	Acres.	Acres.	Rs.	Rs.	Rs. A. P.	Rs. A. P.
Cuttack ...	621,000	822,500	7,14,100	10,99,300	1 2 5	1 5 5
Balasore ...	493,200	692,200	3,77,290	6,29,073	0 12 3	0 14 6
Puri ...	302,400	373,300	2,92,800	3,76,700	0 15 6	1 0 2
Total ...	1,416,600	1,888,000	13,84,190	21,05,073	0 15 7	1 1 10

The result of the present settlement on the incomes of the zamindars is summarised below:—

DISTRICT.	Income before settlement.	Income after settlement.	Percentage of reduction.
	Rs.	Rs.	
Cuttack	11,33,300	9,73,600	14
Balasore	6,11,510	5,22,327	14
Puri	2,80,900	2,66,600	5
Total ...	20,25,710	17,62,584	13

In other words, whereas the zamindars received an income of Rs. 7,54,010 at the time of the last settlement, they will now receive an income of Rs. 17,62,584, so that while the revenue has been enhanced by 52 per cent. since the last settlement, the income of the zamindars has increased by 133 per cent. Wherever the rise in revenue has been large, the enhancement has been graduated over periods extending to ten years (paragraph 481 of report).

The following statement shows the results of the settlement of revenue upon the incomes of the proprietary tenure-holders, the class that was bound to suffer most on the occasion of the resettlement of the revenue. The enhancements have been softened in almost all cases by *rasadi* allowances:—

DISTRICT.	Existing income.	SETTLED.			Percentage of reduction of income.
		Assets.	Revenue.	Balance.	
	Rs	Rs.	Rs.	Rs.	
Cuttack ...	1,01,693	2,38,902	1,62,284	76,618	25
Balasore ...	49,672	1,19,435	85,804	33,631	32
Puri ...	96,332	2,92,530	2,23,981	68,549	29
Total ...	2,47,697	6,50,867	4,72,069	1,78,798	28

17. There are certain points raised by Mr. Maddox on which definite orders are required from Government. Concerning the procedure to be adopted at the next settlement, it is useful to have on record Mr. Maddox's suggestions, but it is impossible to bind the Government of thirty years hence by any decision at present. As for the powers to reduce rent, mentioned in paragraph 456, there is nothing to prevent an application for such powers being made in the course of any proceedings under Chapter X of the Bengal Tenancy Act, if such be thought necessary. The following matters are being dealt with separately: the maintenance of the records, the transfer of raiyati holdings, the extension of the remaining portions of the Tenancy Act, the maintenance of the East Coast Canal, the imposition of an owner's water-rate, the management of the embankments, the recovery of rent from proprietary tenure-holders, rent and revenue instalments, inspection of grazing and cremation grounds, jalpai lands in Balasore, preparation of an abstract to the khasra. On the first and most important of all these questions a report has been made to the Government of India, and several of the other matters have been disposed of; but the Lieutenant-Governor does not wait for a complete settlement of these subsidiary matters before submitting for the orders of the Government of India the results of the Settlement Officer's revision of the revenue assessment.

18. *Cost.*—The cost incurred in these proceedings is dealt with in Chapter XXV of the report. The total expenditure, with some necessary adjustments of the survey charge, amounted to Rs. 30,60,100. The

total area dealt with was 4,797 square miles, excluding Khurda, the ekhrajats, and killas Aul, Darpan and Madhupur. The rate per square mile aggregated Rs. 766 in Cuttack, Rs. 475 in Balasore, and Rs. 618 in Puri.

19. *Merits of Officers.*—With regard to the merits of the officers employed on the survey and settlement of Orissa, the Board record their remarks as follows:—

"It only remains for the Board to cordially and gratefully endorse the acknowledgments of the Settlement Officer and of the Director of Land Records of the services of the officers employed in the survey and settlement operations, which are set out in detail in paragraphs 364 to 374 of the Final Report, and in paragraph 39 of Mr. Lyon's Review thereof. It is impossible for the Board to appreciate these services too highly. Colonel Sandeman's co-operation and assistance were invaluable to the Settlement Officers, and have been suitably acknowledged by the Director. Mr. Maddox's services are, in the Board's opinion, deserving of some special form of acknowledgment. Mr. Lyon has, with becoming modesty, omitted any mention of his own services, but Mr. Toynbee wishes to place on record his own appreciation of the energy, ability, and tact displayed by him, and of the great and loyal assistance he has given him in the discussion and disposal of all the Orissa Settlement questions which have come before the Board for disposal during the term of his tenure of office. Mr. W. C. Macpherson's connection (as Director of Land Records) with the Orissa Settlement ceased before Mr. Toynbee became a Member of the Board, but as Commissioner of Orissa as well as in the Board he had full opportunity of appreciating the zeal, energy and ability which for nearly five years Mr. Macpherson devoted to the work of the Orissa Settlement in its earlier stages."

The Lieutenant-Governor agrees with the Board in their just appreciation of the services of the officers referred to in this extract. The high quality of the work performed by the officers employed in these proceedings is evident from the fact that although rents were assessed from nearly one-and-a-half millions of tenants, there were only 295 appeals, and although 42,000 proprietary estates were assessed, there were only five objections. This result is honourable testimony to the great patience, judgment and ability with which Mr. Maddox discharged very prolonged and onerous duties.

The excellent assistance given by Mr. McPherson in Puri, Mr. Webster in Cuttack, and Mr. Kingsford in Balasore, has been suitably acknowledged by the Settlement Officer and the Director of Land Records. Amongst the Deputy Collectors, Mr. James Taylor is specially mentioned: his good work in the Khurda Settlement has already been acknowledged by Government.

For the good work done by them, the following officers have been promoted to the rank of Deputy Magistrate and Deputy Collector:—Babu Jogendro Narain Mitra, Babu Abhoy Prosad Das and Babu Hara Krishna Mahanti. The names of the other officers commended for good work by the Board will be communicated to the Appointment Department.

20. The proceedings are now submitted to the Government of India for confirmation under Rule 5, clause V, Chapter 16, Part III, page 118 of the Settlement Manual, 1900.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

Secretary to the Government of Bengal.

ANNUAL REPORT ON THE MANAGEMENT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1900-1901.

No. 204.—The following report is published for general information.

F. A. SLACKE,

The 10th January 1902. *Secy. to the Govt. of Bengal.*

THE Honorary Committee have the honour to submit their report for the year ending the 31st March 1901.

2. The following gentlemen became donors of the Garden during the year by contributing the amounts shown against their names:—

		Rs.
RAO JOGENDRA NARAIN ROY OF LALGOLA	...	7,000
KUMAR RADHA PRASAD ROY OF CALCUTTA	...	5,000
BABU SATIS CHANDRA CHOUDHURY ...	...	2,000
RAI JOTINDRA NATH CHOUDHURY ...	...	1,000
BABU BAMA CHARAN BHUR ...	...	1,000
BABUS SARADINDU NARAIN ROY, PURNENDU NARAIN ROY, AND BARADENDU NARAIN ROY JOINTLY CONTRIBUTED TOWARDS THE FUNDS OF THE GARDEN ...	...	1,000

FINANCE.

3. The donations and subscriptions amounted to Rs. 17,588, against Rs. 4,880 in the previous year. The number of visitors, which in the previous year had been 147,288, was 156,061, without taking into account the number of students of different schools, members of charitable institutions and children under age, who were admitted free of charge.

The total entrance receipts were Rs. 12,145-8, against Rs. 11,522-3 in the previous year.

The Society of St. Vincent de Paul held their Annual Fancy Fair in the Garden on the 1st and 2nd January 1901, and paid to the Committee Rs. 1,245, the usual proportion of 25 per cent. of the receipts collected at the gate.

The expenditure under the head "Establishment" was Rs. 13,381-11-3, against Rs. 12,918-1-3.

The charges for feeding the animals were Rs. 13,116-5-6, against Rs. 11,765-3-5. The excess was due to the high rates at which the food-grains were sold during the year, and also to an increase in the number of certain animals.

Rupees 2,987-9 and Rs. 384-12-3 were respectively spent on account of purchase and transport of animals, against Rs. 3,275-14-3 and Rs. 2,239-10-3, respectively, in the previous year.

Rupees 1,145-3 were spent in connection with repairing the Garden roads.

Rupees 9,083-6-3 were spent on account of repairing some of the houses of the Garden which were in a very bad condition.

Rupees 11,521 were spent under the head "Original construction." Out of this amount, Rs. 4,909 were expended on account of making an extension and improvement to the "Duck House," Rs. 1,348 were spent for paying the balance of an outstanding debt due to a contractor for constructing the new "Small Carnivora House," and Rs. 5,264 on account of the cost of constructing a new Marsupial house for kangaroos and wallabies.

4. The following list contains the names of all donors who presented various specimens of animals to the Garden during the year:—

Col. R. C. Temple, C.I.E.
Raja of Ramnagur.
E. T. Sweeney, Esq.
Deputy Commissioner of Police, Calcutta.
K. B. Thomas, Esq.
H. H. the Maharani of Cooch Behar.
Babu Sarat Chandra Mitra.
P. Wagstaff, Esq.
W. K. Yule, Esq.
Babu K. D. Chatterjee.
G. A. Riches, Esq.
Nawab Gauzafar Ali Khan Bahadur.
J. N. Roy, Esq.
J. W. W. Kirkman, Esq.
E. W. Harper, Esq.
R. Spence, Esq.
J. A. Stevens, Esq.
W. Hodgkinson, Esq.
Babu K. D. Pramanik.
H. M. Ring, Esq.
Babu Luchmi Prasad, Gaya.
R. G. Anderson, Esq.
C. Ismay, Esq.
A. S. Muspratt, Esq.
M. Mackertich, Esq., Jr.
George Duffus, Esq.
Babu R. P. Roy Choudhury.
M. Mackenzie, Esq.
A. M. Ross, Esq.
The Hon'ble D. M. Smeaton, C.I.E.
Babu K. C Sen.
Lt. A. LeF. Smith.
P. J. Cochrane, Esq.
Miss Church, M.D.
A. G. Georgiadi, Esq.
Mrs. Arghyropulus.
Master Bruce Bowers.
Major E. Harold Brown, M.D., I.M.S.
G. B. S. Urey, Esq.
J. G. Sophianopoulo, Esq.
Colonel Macdonald, S. S. "Euryalus."
J. J. Haly, Esq.
Rai Nittyanunda Roy Bahadur, Chittagong.
Allen Mathewson, Esq.
G. Gerard, Esq.
W. D'Crutz, Esq.
Mrs. Horsely.
H. A. Lane, Esq.
Capt. E. A. Stevens, I.M.S.
Babu Rajendra Nath Bose.
Mrs. LeMesurier.
F. Finn, Esq.
Mrs. Raymond
Prince Golam Mahammud of Tallygunge.
D. O'Connell, Esq.
Babu Rajendra Nath Sanyal.
J. T. Ranken. Esq., C.S.
A. A. Apcar, Esq.
G. McCrea, Esq.
Miss Eggar
Captain A. R. C. Anderson, I.M.S.
E. A. Enever, Esq.
W. B. Thomson, Esq., C.S.
Sir John Woodburn, KT., K.C.S.I.
Hon'ble S. G. Sale.
Rev. Geo. Henderson.
Dr. Spooner Hart.
R. B. Ormaston, Esq.
Maharaja of Gidhaur.
P. Ross, Esq.
Mrs. M. Ross.
Miss Mell.

5. The following animals were borne in the garden during the year:—

1 Uryal, 1 banting, 1 brow-antlered deer, 4 spotted deer, 2 sambur deer, 1 hog deer, and 3 monkeys.

6. The following comparative tables will show how the various collection of animals in the Garden stood during the last four years:—

Year.		Mammals.	Birds.	Reptiles.	Gold fish.
1897-98	...	443	491	146	25
1898-99	...	447	591	157	24
1899-1900	...	449	752	187	...
1900-1901	...	462	905	218	...

7. The subjoined table will show additions to the collection of animals in each of the last four years:—

Year.		Mammals.	Birds.	Reptiles.
1897-98	...	105	187	72
1898-99	...	103	253	69
1899-1900	...	78	299	91
1900-1901	...	112	409	102

E. HAROLD BROWN, M.D., F.Z.S., *Major*, I.M.S.,

Honorary Secretary.

ZOOLOGICAL GARDEN,

The 19th December 1901.

WEATHER AND CROP REPORT.

For the week ending the 13th January 1902.

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* nearly finished. Threshing continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kalna	10	2	
Katwa	12	8	
Raniganj	13	0	

Birbhum.—No rain. Weather cool. Harvesting of *aman* continues. Standing crops doing well. Price of rice at Sadar 11½ seers and at Rampur Hât 11 seers 3 chitaks per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Threshing of paddy and pressing of sugar-cane going on. *Rabi* crops doing well. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura is 13¾ seers and at Vishnupur 13½ seers per rupee.

Midnapore.—Rainfall nil. Harvesting of *aman* nearly finished. Sugarcane being pressed in Sadar subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ghatal	12	0	
Tamluk	12	4	
Contai	15	0	

Hooghly.—No rainfall. *Aman* harvesting almost over. Standing crops doing well. Common rice sells at 10 seers 6 chitaks per rupee.

Howrah.—No rain. Weather seasonable. Harvesting of *aman* paddy still continues. Standing crops doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee
Uluberia	11	0	

24-Parganas.—Rainfall nil. Weather seasonable. Prospects fair. Harvesting of *aman* still continues on low lands. Harvesting of *rabi* crops has commenced in places in Barasat sub division. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee
Barasat	10	0	
Basirhat	10	0	
Diamond Harbour	12	0	

Nadia.—No rain. Weather seasonable. Harvesting of *aman* and *kalai* still going on. Standing crops doing well. Fodder and water sufficient. Price of common rice stationary.

	Srs.	ch.	
Patna	12	8	per rupee.
Barh	11	0	
Bihar	10	8	
Dinapore	12	0	

Gaya.—About quarter of an inch of rain fell. Harvesting of paddy and pressing of sugarcane continue. *Rabi* prospect improved a little by the recent rain. Common rice selling at 12¼ seers per rupee.

Shahabad.—Rainfall at Sadar nil. Sasaram 1·13, Dohri 1·22, Bhabhua 0·96, Buxar nil. Weather seasonable. *Rabi* prospects much improved where rain fell. Sugarcane-pressing in progress. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers per rupee.

Saran.—Rainfall at Sadar nil, Sewan 0·02, Gopalganj 0·10. Weather cold and bright. Clouds have disappeared. No sign of rain. All crops doing well, but rain wanted. Sugarcane-pressing continues. Fodder and water sufficient. Common rice sells at 12 seers 2 chitaks and maize at 22 seers 14 chitaks per rupee.

Champaran.—Rainfall at Sadar nil, Bettiah ·04. Rain urgently wanted for *rabi*. Threshing of paddy and sugarcane-pressing still going on. Fodder and water sufficient. Prices of common rice and maize at Sadar are 12 and 21 seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Threshing of paddy nearly finished. Rain urgently wanted for *rabi* crops, &c. Prices are—Common rice 11⅛ seers, wheat 12 seers, barley 18½ seers, maize 20 seers, gram 16½ seers, *arhar* 19¼ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall nil. Rain urgently wanted for *rabi*. Fodder and water sufficient. No cattle-disease is reported. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	15	per rupee.
Samastipur	13	0	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar nil, Begusarai 0·07, Jamui nil. Weather seasonable. Threshing of paddy going on. Poppy is being watered and manured. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	11	per rupee.
Begusarai	11	8	
Jamui	12	0	

Bhagalpur.—Rainfall nil. Weather cold. Harvesting of winter rice approaching completion. Prospect of *rabi* favourable. Sporadic cases of cattle-disease reported from the Supaul subdivision. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	13	6	
Madhipura	14	0	
Supaul	13	8	

Purnea.—No rain. Weather cold and sometimes cloudy. Harvesting of winter rice nearly finished. Sugarcane-pressing still continues. Rain wanted for *rabi* crops Sporadic cases of cattle-disease reported from thanas Araria and Raniganj. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishanganj	10	0	
Araria	11	0	

Malda.—Rainfall nil. Weather seasonable. Harvesting of winter rice nearly finished. Prospects of *rabi* crops good. *Kalai* is being gathered. No cattle-disease. Price of rice unchanged. Fodder and water sufficient.

Sonthal Parganas.—No rain. Weather cold and cloudy occasionally. Paddy harvesting nearly finished. Threshing commenced. Sugarcane-pressing continues. Prospects of *rabi* favourable. Fodder and water sufficient. Average price of rice 12 seers 8 chitaks and of maize 21 seers 7 chitaks per rupee.

Cuttack.—Rainfall at Sadar 0·70, False Point 0·03. Weather seasonable Harvesting of *laghu sarad* is over. *Guru sarad* is being harvested. *Rabi* being gathered in some places. *Dalua* and tobacco growing. Sugarcane being pressed. Condition of cattle generally good. Fodder and water available. Common rice sells as follows :—

	Srs.	ch.	
Sadar	15	1	per rupee.
Jajpur	17	1	
Kendrapara	15	12	
Banki	20	2	

Balasore.—No rain at Sadar. Harvesting of *kandha* and *sarad* and sugarcane-pressing continue. *Rabi* crops doing well. *Dalua* being sown. Rice sells at 10 6/16 and 14 seers per rupee in interior and Balasore respectively. Fodder and water sufficient.

Angul.—Report not received.

Puri.—Rainfall at Sadar 0 16. Weather seasonable. Harvesting of *sarad* paddy, *arhar* and pressing of sugarcane continue. *Mung* is being extensively sown. *Dalua* paddy growing well. Other miscellaneous crops doing well. Fodder and water-supply sufficient. Price of rice stationary.

Hazaribagh.—Rainfall nil. Weather cold and clear. Poppy progressing favourably. Fodder and water sufficient. Common rice sells at Sadar at 12¾ seers and at Giridih at 12 seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Average price of common rice is 13 seers per rupee. Cattle-disease reported from Silli and Khunti thanas. Fodder and water sufficient.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1901.

WEATHER during November was more disturbed than usual over Bengal and the north of the Bay because of the northward movement of the cyclonic storms which developed in the south-east. It occasionally happens in both November and December that storms take a northerly course towards Bengal, but this feature was so conspicuous in November of the past year that the sudden change which occurred early in December was equally remarkable. That change probably followed the somewhat severe storm towards the end of November, as about a week afterwards a storm which developed in the south-east of the Bay advanced in the usual course towards the Madras Coast and caused very stormy weather with heavy rainfall on a part of the coast near Madras.

The chief peculiarity of the storm was in the small pressure changes and the very light winds in the central area, which when near the coast extended from Madras to Negapatam, while to the north of the central area the severity of the storm was much greater than occurs usually with shallow depressions. Cuddalore reported practically calm weather throughout the period of disturbance, and at Negapatam wind velocity steadily fell between the 6th and 10th; whereas at Madras there was a great increase of wind force on the 8th, and the strong wind continued with heavy rainfall on the 9th when the depression was passing inland.

As no cyclonic disturbance moved northwards during the month, fine, settled weather, with an almost entire absence of rainfall, prevailed over the Province and the north of the Bay. There was some cloud about the middle of the month and again towards the end, but the disturbances, to which the cloud was due, were very slight and quickly disappeared. Pressure was generally above the normal by small to moderate amounts, and temperature was generally above the normal. Towards the end of the month cool weather for the season set in over the eastern districts, but in the west temperature was almost continuously high. Average maximum and minimum readings are above the normal for the majority of inland stations, mean excess for Chota Nagpur being nearly 2°, Bihar rather less than 1°, North Bengal half a degree, and for Lower Bengal and Orissa a third of a degree or less.

The only rainfall was in North Bengal in the Dinajpur, Jalpaiguri, and Darjeeling districts on the 14th, when showers were fairly general in parts of these districts, but in only one case exceeded half an inch. Kalimpong reported 2 inches.

After the storm in the south of the Bay in the early part of the month, weather in that area was fine and settled for some time, winds strengthened about the end of the third week, and there was then probably a cyclonic disturbance in the extreme south beyond the area of observation. It was again disturbed at the end of the month, and a period of typical north-east monsoon weather developed over the south of the Peninsula.

At the beginning of the month pressure was normal over the Bay and relatively low inland, so that the gradient was not so steep from north to south, and light northerly winds prevailed. Temperature was 4° above the normal in Chota Nagpur, 3° in the extreme west of Bihar, and 2° in South-West Bengal and Orissa. Elsewhere there was generally a small defect, greatest in East Bengal, where it was 2° to 3°. The rise of pressure, which began on the 1st, continued till the 4th, when there was a moderate excess over both the Province and the Bay, and the gradient was steeper, more especially in the south-east of the Bay, where the cyclonic storm which crossed the Madras coast a few days later had begun to develop. Almost the only indication of disturbed weather on the 4th was the increase of wind force at Diamond Island. Temperature at that time was relatively higher in Bengal than at any other time during the month, excess being 5° in part of Bihar and 3° to 4° at most of the northern stations.

Pressure fell on the 5th; and as the fall which continued on the following days was chiefly on the west coast, the depression was moving westward. The indraught across the Madras coast was more regular on the 6th, and the strongest winds were reported from Pamban and Colombo. After the 6th wind velocity diminished in the extreme south of the Madras coast; and as the steepest gradient was between Madras and Nellore during the approach of the depression, the strongest winds were experienced on that part of the coast when the centre was near Cuddalore. The only fall of pressure exceeding ·1 inch was reported from Cuddalore on the 9th, and the variation from the normal at that time was less than ·1 inch, showing how shallow the depression was, as indicated by the observations at coast stations. Exceptionally stormy weather, however, was experienced to the north of the central area, and very heavy rain fell at Madras. The depression passed rapidly westward across the south of the Peninsula, and, by the morning of the 10th, the distribution was again normal in the south-west of the Bay, with a moderate excess towards the north and east.

The only effect of the disturbance noticeable in Bengal and the north of the Bay was a steady slow fall of temperature, probably owing to the stronger northerly winds caused by the steeper pressure gradient which prevailed during the days the disturbance was over the south of the Bay.

Fine weather with temperature normal or slightly below continued for some days in Bengal, but pressure was falling, and about the middle of the month it became slightly disturbed with fairly general cloud. No rain fell except at a few stations in North Bengal.

During the latter half of the month weather in Bengal continued fine and settled with the usual small oscillations in pressure and temperature. the latter of which was generally below the normal in the east and above in the west of the province. The only peculiarity was in light cloud being more frequent than usual, probably owing to shallow depressions which formed in the west or north-west of India and filled up without moving eastward.

Towards the end of the month a depression formed in the extreme south of the Bay causing strong winds and rough sea in that area, but it had no influence on weather in Bengal or over the north of the Bay.

Pressure underwent no large change during the month, and was most frequently above the normal, more especially in the early part of the month, when there was a steep gradient for the season over the Bay. Latterly it fell, and there was at times a moderate defect. On an average for the month pressure was in excess over the whole area, excess being about ·02 inch, except in the Circars, where it was about ·03 inch.

Temperature was high generally in the first half of the month, at times by as much as 5° in the northern districts. During the latter half it was low in Bengal Proper, though there was still a small excess in the western districts.

Maximum temperature on an average was 2° above the normal in Bihar and Chota Nagpur, about normal in Orissa and the central districts and 1° below in the east. The variation in minimum temperature was rather smaller generally, there being excess of 1°, except in North Bihar and part of East Bengal, where there was a small defect.

Rainfall was almost entirely absent. A few showers fell in North Bengal on the 14th in the Dinajpur, Jalpaiguri, Cooch Behar and Darjeeling districts. Kalimpong reported 2·07 inches, Bhagatpur and Siliguri about half an inch, and a few other stations about a third of an inch.

The following table gives the average rainfall for each Division, month by month, throughout the year, expressed as a percentage of the normal fall for each month:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Actual rainfall of the year 1901 expressed as a percentage of the normal fall for the period.

	Inches.
The total fall of rain from 5th to 11th January 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·11
The total fall from 1st January 1901 to 11th January 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·11

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌂, dew.

RESOLUTION ON THE BOARD'S ANNUAL LAND REVENUE ADMINISTRATION REPORT FOR THE YEAR 1900-1901.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 18th January 1902.

RESOLUTION—No. 407.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1900-1901.

THE report has been considerably reduced in length in accordance with the orders of the Government of India. A few additional paragraphs on matters previously noticed in other reports of Divisional Commissioners which have now been discontinued, have, however, been introduced on the authority of this Government. The attention of the Board is called to paragraph 2 of the Government Order of the 8th August 1901, under which the statistical table in paragraph 28 of the report dealing with Road and Public Works Cesses should have been omitted.

2. *Financial results.*—The total collections and their percentage on the demand have only been once exceeded during the past five years, a result which reflects much credit on the officers concerned.

In permanently-settled estates the percentage of the collections on the demand amounted to 99·36 per cent. Of the fourteen districts in which the current collections fell short of the standard of 99 per cent. of the current demand, the most noticeable were Midnapore, Chittagong, Noakhali and Manbhum, for the shortcomings in which the reasons given are accepted by the Lieutenant-Governor. He notices that active measures are being taken to recover the balances in Shahabad. The collections, both of the current revenue and of the arrear balance, were on the whole good.

In the case of temporarily-settled estates the total collections more than equalled the current demand, save in the case of estates settled with proprietors, but the explanations furnished by the Board to account for the shortcoming from the standard fixed by Government have been accepted.

With regard to estates held direct by Government, the total collections fell short of the current demand. Sufficient reasons have been given by the Board, except in Shahabad. The Lieutenant-Governor trusts that the suspected defects in management in Pabna will, if existing, be remedied.

He notices with pleasure the ease and rapidity with which the large sums recoverable from the tenantry and proprietors in the North Bihar districts on account of the costs of the record-of-rights proceedings are being realised. This in itself shows clearly the opinion which those most interested entertain with regard to the records. It is trusted that the recovery work in Chittagong will be finished during the current year, though the difficulties are greater than is the case in Bihar.

3. *Road and Public Works Cesses.*—The current demand has been increased during the past year by about a lakh of rupees. Where seasonal vicissitudes or epidemics were not experienced, the collections were on the whole satisfactory. The Lieutenant-Governor awaits the report called for from the Board with reference to the relief of Collectors of the strain which the present method of collecting these cesses entails.

4. *Remittance of land revenue and rent by means of money-orders.*—There was an increase in the number of money-orders issued for the payment of revenue and cess from 197,821 to 212,116, and in the amount covered by them from Rs. 18,17,067 to Rs. 20,21,923. In view of the convenience afforded by the system, any measure to increase its popularity is most important, and it is observed that the Board have under consideration the adoption of an improved and less complicated form for making such remittances.

The number of money-orders issued for the payment of rent increased from Rs. 51,561 in 1899-1900 to Rs. 56,470 during the year under report, while the percentage of refusals decreased from 24·2 to 20·9.

5. *Operation of the Sale Laws.*—One thousand and seventy-six estates were sold, representing about 0·58 per cent. of the total number of estates in Bengal. As in the previous years, defaults were most numerous in Chittagong (1,672), Saran (1,061), and Cuttack (1,033). The defaults in Monghyr were also large this year, being 1,026 in number. It is a very serious matter that a change in the date of instalments was made in this district without sufficient notice, and the Lieutenant-Governor requests the Board to report to him fully upon it, saying who was responsible, and what action was taken to remedy the effect upon sales. In Chittagong, the number of sales increased by 83, due to the refusal to estates which habitually default to pay up arrears before the sales.

The rule requiring the holding of sales for arrears of one kist before the next kist day, was followed in all districts except Burdwan, Jalpaiguri, Muzaffarpur, Monghyr and Chittagong. As the tauzi establishment has been reorganised, better results are expected in future.

6. *Working of the Public Demands Recovery Act.*—The Lieutenant-Governor is glad to notice that there has been an improvement in the disposal of certificates in the Burdwan Division, where the state of things, as noticed in last year's Resolution, was unsatisfactory. In the Rajshahi Division the insufficient number of disposals is attributed to dislocation of work by the census. Other districts did their work in spite of the census, and the Lieutenant-Governor agrees with the Board that the explanation is not adequate. The remarks made by the Board, with reference to section 21 of the Certificate Act, will be dealt with when the report regarding the measures to be taken for improving the realisation of the Road and Public Works Cesses is received.

ADMINISTRATION OF THE LAND REVENUE.

7. *Management of Government Estates.*—The expenditure incurred on management was 6·1 per cent. of the current demand, as against 5·9 per cent. of the current demand in the previous year. The Lieutenant-Governor regrets to see that in the districts of Jalpaiguri, Angul, Puri, Jessore, Tippera and

Faridpur, out of the allotments for miscellaneous and sanitary improvements, nearly Rs. 14,000 was allowed to lapse for causes which, so far as the reasons given go to show, were within the control of the District Officers concerned. It is a misfortune to the Estates that a sum which could have been usefully spent has been lost for the time by the neglect of the local authorities The repeated failure of the District Engineer of Jalpaiguri will be dealt with separately.

The proposals submitted by the Board to declare the majority of khas mahal establishments permanent and pensionable, have been sanctioned by Government.

8. *Condition of the raiyats.*—The condition of the raiyats was generally good throughout the Province except in a few districts, where damage was done to the crops by the floods of September 1900. In Gaya the people were injuriously affected by a poor harvest of *bhadoi*, winter rice and *rabi*, and the severe outbreak of plague during the year added to their troubles. In the Palamau Government estates, where the number of rent-paying tenants is about 13,000, there were 556 abandonments of holdings during the year, as against 442 in the previous year. Government agrees with the Board that the matter requires careful investigation. The report they have called for is awaited.

9. *Surveys and Settlements.*—Excluding the survey and settlement operations under the control of the Director of Land Records, the settlements and re-settlements conducted by the Board resulted in a net increase of Rs. 96,138. The Lieutenant Governor is glad to see that care is being taken in the selection of officers employed on petty settlement work.

10. *Embankments.*—The Lieutenant-Governor trusts that the long-pending apportionment cases in the 24-Parganas will be completed in the current year.

11 *Land Registration.*—It is understood that the Board will be able, with their next report, to give an approximate idea of the percentage of mutations registered in the year on the actual number of interests in existence. To a Collector the accuracy of his Land Registration registers is essential, and, looking at the results in Saran, it would seem advisable that Collectors should be directed to regularly make enquiries in all cases where no mutation has been applied for during the preceding 20 years. The Lieutenant-Governor desires that the Board will be good enough to give this matter their consideration.

12. *Partition.*—The explanation of the Collector why no progress was made in Purnea, is awaited by Government.

The Lieutenant-Governor has again to notice with pleasure the great attention paid by Mr. Savage, the Commissioner, to this branch of the Collectorate work, good progress being made, especially in the districts of Dacca and Mymensingh.

The change of procedure introduced by Act V (B.C.) of 1897 has effected a material improvement in the administration, as well as in the interests of the proprietors and their tenants.

13. *Advances under the Land Improvement Loans Act.*—In Chittagong only 54 per cent of the sum that fell due in the year under review was collected. The district should, however, have now recovered from the disasters of 1897, and improvement should occur in the collection during the coming year.

14. *Advances under the Agriculturists' Loans Act.*—The balance outstanding at the close of the year in the Patna and Chota Nagpur Divisions is large, especially in the districts of Saran, Muzaffarpur and Champaran. The Board should carefully watch the measures taken for its recovery. In the Chota Nagpur Division, Ranchi alone had an outstanding balance of Rs. 1,15,090. It is explained that these balances, with the exception of Rs. 282 on account of the year 1898-99, are of loans granted to distressed agriculturists during the famines of 1897 and 1900. The Lieutenant-Governor approves the action of the Board in extending, with regard to the straitened circumstances of the debtors, the period of repayment.

15. *The Bengal Tenancy Act*—This Act is reported to have worked, on the whole, smoothly; tenants are said to be more and more informed of their rights under it, and active in maintaining them.

The Lieutenant-Governor agrees with the Commissioners that at present no change in the law with regard to the appraisement and division of crops is needed, but Collectors should continue to keep a watch on the use made of these sections, and bring to the notice of the Board any instances of abuse.

16. *Maintenance of boundary marks.*—For the reasons stated in the Board's report, the information furnished on this subject is incomplete, but the deficiency will no doubt be remedied during the current year. The Lieutenant-Governor is glad to hear that the thana maps for Orissa, Chittagong and North Bihar, now being completed, will enable the officers in these surveyed tracts to take the requisite action for the preservation of the boundary marks.

17. *General.*—His thanks are due to the Board for their administration of the Land Revenue Department and for their excellent report. The paragraphs relating to the several District and Subordinate Officers mentioned as deserving of special commendation will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 20th January 1902.

Burdwan.—No rain. Weather seasonable. Threshing of *aman* continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kalna	10	2	
Katwa	12	13½	
Raniganj	13	0	

Birbhum.—No rain. Weather cool. Threshing of paddy going on. Standing crops doing well. Price of rice at Sadar 11½ seers and at Rampur Hât 12¾ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Pressing of sugarcane going on. *Rabi* crops doing well. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura is 13¾ seers and at Vishnupur 13½ seers per rupee.

Midnapore.—Rainfall nil. Harvesting of *aman* nearly finished. Sugarcane being pressed in Sadar subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ghatal	12	0	
Tamluk	12	4	
Contai	16	0	

Hooghly.—No rain. Weather seasonable. Harvesting of *aman* nearly finished. Standing crops doing well. Fodder and water sufficient. Common rice sells at 10½ seers per rupee.

Howrah.—No rain. Weather seasonable. Harvesting of *aman* approaching completion. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar at 9 seers and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects fair. Harvesting of *aman* still continues on low lands. Harvesting of *rabi* crops has been commenced in places in Barasat subdivision. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Barasat	10	0	
Basirhat	11	0	
Diamond Harbour	12	0	

Nadia.—No rain. Weather seasonable. Harvesting of *aman* and *kalai* nearly finished Prospect of standing crops good. Lands being cultivated for early rice. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—No rain. Weather seasonable. Harvesting of *aman* almost finished. Prospects of *rabi* favourable. Rain wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Lalbagh	11	0	
Jangipur	12	0	
Kandi	13	8	

Jessore.—No rain. Weather seasonable. Harvesting of mustard commenced. Prospects of *rabi* crops fair. Cultivation going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Jhenida	13	4	
Magura	12	0	
Narail	12	5	
Bangaon	12	0	

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy continues. Prospects favourable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Bagerhat	13	4	
Satkhira	13	0	

Rajshahi.—No rain. Prospects of crops fair. Harvesting of winter rice continues. Condition of cattle generally good with a few exceptions. No want of fodder and water. Common rice selling at 11½ seers a rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 11 seers on an average.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of *haimanti* paddy nearly finished. Winter crops doing well. Common rice sells at 12 seers per rupee. Fodder and water sufficient.

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Bhutta sells at Darjeeling at 18 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—No rain. Weather seasonable. Harvesting of *aman* still going on. Water and fodder sufficient. Common rice sells at 12 seers per rupee in the district.

Bogra.—No rain. Harvesting of *aman* still continues in places and that of mustard and other *rabi* crops begun. Lands being prepared for *aus*, jute, and sugarcane. Prospects fair. Fodder and water sufficient. Common rice sells at 12¾ seers a rupee.

Pabna.—Rainfall nil. Weather seasonable. Prospects of crops good. Standing crops doing well Prices unchanged.

Dacca.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice 12 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of winter rice nearly finished. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishoreganj	11	8	
Jamalpur	11	12	
Netrokona	12	8	
Tangail	11	0	

Faridpur.—No rain. Weather cold. Coarse rice sells at 10½ seers per rupee. Prospect of crops good

Backergunge.—No rain. Weather seasonable. Prospect of crops good. Harvesting of *aman* paddy nearly finished. No cattle-disease reported. Common rice sells at 9 seers (old) and 11½ seers (new) *aman*.

Tippera.—No rain. Weather seasonable. Prospects of *rabi* crops good. Transplantation of *boro* paddy going on. Fodder and water sufficient. Average price of common rice 12 seers 1 chittak per rupee.

Noakhali.—Rainfall nil. Prospects of crops fair. Cultivation of land for *rabi* crops continues. Cattle-disease reported from Sudharam, Lakhmipur, and Raipur. A Veterinary Assistant has come. Fodder and water sufficient. Prices stationary.

Chittagong.—No rain. *Rabi* crop doing well. Cattle-disease in various parts of the district. Rice selling at 14 seers per rupee. Fodder and water sufficient.

Patna.—Rainfall nil. Threshing of paddy continues. Rain wanted for *rabi* crops. Poppy doing well. No cattle-disease. Fodder and water for cattle sufficient. Coarsest rice sells as follows:—

	Srs.	ch.	
Patna	12	0	per rupee.
Barh	11	8	
Bihar	10	0	
Dinapore	12	0	

Gaya.—Rainfall nil. Harvesting of paddy almost over. Prospects of *rabi* and poppy improved by the recent rain. Common rice selling at 12½ seers per rupee.

Shahabad.—Rainfall nil. Weather seasonable. Rain wanted for *rabi* at places which have had no winter rain. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers per rupee.

Saran.—Rainfall nil. Weather cold. West wind blowing. Standing crops doing well, but rain wanted. Sugarcane-pressing continues. Fodder and water sufficient. Common rice sells at 12 seers 5 chitaks and maize at 22 seers 5 chitaks per rupee.

Champaran.—Rainfall nil. Rain badly wanted to improve the prospect of *rabi*. Weeding going on. Threshing of paddy finished. Sugarcane-pressing still continues. Cattle-disease reported from Dhanaha and Mainatand outposts. Fodder and water sufficient. Prices of common rice and maize at Sadar are 12½ and 22 seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Threshing of paddy finished. Standing crops doing fairly well, but rain urgently wanted. Prices are—Common rice 11½ seers, wheat 12 seers, barley 18½ seers, maize 20 seers, gram 16½ seers, *arhar* 19½ seers, and maize 21 seers a rupee.

Darbhanga.—Rainfall nil. Rain urgently wanted for *rabi*. Fodder and water sufficient. Cattle-disease is reported from one village of Darbhanga thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	12	0	
Madhubani	12	1	

Monghyr.—No rain. Weather seasonable. Threshing of paddy nearly finished. Sugarcane-pressing going on. Fields being irrigated. Rain wanted. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	11	per rupee.
Begusarai	12	0	
Jamui	12	0	

Bhagalpur.—No rain. Weather seasonable. Threshing of winter rice going on briskly. *Rabi* doing well. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	13	2	
Madhipura	14	0	
Supaul	18	0	

Purnea.—No rain. Weather seasonable. Harvesting of winter rice finished. Sugarcane-pressing continues. Prospect of *rabi* crops fair. Cattle-disease reported from outpost Palasi. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishanganj	10	0	
Araria	11	0	

Malda.—Rainfall nil. Weather seasonable. Harvesting of winter rice finished. Lands are being prepared for *boro* rice. *Kalai* and mustard being gathered. Prospect of other *rabi* crops good. No cattle-disease. Price of rice 11 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—No rain. Weather seasonable. Paddy harvesting finished except in Jamtara subdivision. Threshing going on. Sugarcane-pressing continues. *Rabi* doing well. Fodder and water sufficient. Average price of rice is 12 seers 3 chitaks and of maize 16 seers per rupee.

Cuttack.—No rain. Weather seasonable. Harvesting of *sarad* continues. *Rabi* being gathered. *Dalua* and tobacco growing. Sugarcane being pressed. Condition of cattle generally good. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	12	per rupee.
Jajpur	14	8	
Kendrapara	15	12	
Banki	20	2	

Balasore.—No rain. Harvesting of *kandha* and *sarad* and sugarcane-pressing continue. *Dalua* and other *rabi* crops doing well. Rice sells at 16¾, 14, and 17 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Weather seasonable. Harvesting of *rabi* and crushing of sugarcane continues. Fodder available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee
Khondmals	18	0	
Interior	18	0	

Puri.—No rain. Weather seasonable. *Sarad* paddy and *arhar* are being harvested. Sowing of *mung* and pressing of sugarcane continue. *Dalua* paddy and other miscellaneous crops growing well. Fodder and water-supply sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	7	per rupee.
Khurda	16	8	
Interior	16	5	

Hazaribagh.—Rainfall nil. Weather cold and clear. Fodder and water sufficient. Sugarcane-pressing is going on. Common rice sells at Sadar at 12½ seers and at Giridih at 12 seers per rupee.

Ranchi.—Prospects of crops on ground good. Average price of common rice is 15 seers per rupee. Cattle-disease reported from several thanas. Fodder and water sufficient.

Palamau.—No rain. Weather seasonable. Standing crops doing well. Sugarcane-fields being prepared. Barley being sown in places owing to recent rains. No cattle-disease. Fodder and water sufficient. Prices at Sadar—Rice 11 seers 13 chitaks and maize 16 seers 14 chitaks per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on ground good. Fodder and water sufficient. Cattle-disease nil. Average price of common rice is at Sadar 14 seers and at Gobindpur 12 seers 4 chitaks per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. *Rabi* crops promising, but need rain. Average price of rice 14 seers 14 chitaks in the district; at Chaibassa 14 seers per rupee.

General Summary.—No rain. Nearly all the districts in the Patna Division and also the districts of Murshidabad and Singhbhum are in need of rain for *rabi* crops. Threshing of winter rice continues. Harvesting of *rabi* and preparation of lands for early rice and jute have commenced in places. Prospects fair. Cattle-disease reported from seven districts. No want of fodder or water. The price of common rice has risen in 20 districts, fallen in 17, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

Secretary to the Govt. of Bengal.

The total fall of rain from 12th to 18th January 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·03
The total fall from 1st to 18th January 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·14

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

Total for 26½ weeks ...	10,156,729	1,10,11,285 0 0	13,52,75,999 10	2,30,19,818 12 0	5,58,438 0 0	3,45,89,541 12 0	2,904,522½	5,012,631½	7,917,154½
COMPARISON.									
Total for corresponding 9 days of previous year	370,201½	4,84,828 0 4	66,19,069 30	11,19,856 14 11	28,258 3 5	16,32,945 2 8	134,737½	241,305½	376,042½
Per mile of railway corresponding period of previous year .	... ...	263 7 2	......	608 8 3	15 5 9	887 5 1	......	......	......
Total for corresponding 26½ weeks of previous year	9,261,108	1,03,63,120 0 0	12,70,89,928 0	2,15,56,293 10 9	5,49,221 0 11	3,24,68,643 11 8	2,816,494½	4,806,205½	7,622,699½

(a) The increase is in outward traffic, chiefly from stations in B, C and D districts.
(b) The increase is chiefly in coal, piece-goods, food-grains, and seed traffic.

* Added No. of passengers 22,679 and Rs. 15,222 On account of difference between the approximate and audited figures for the week ended 23rd November 1901.
„ „ „ 2,800 and „ 27,517 „ of special and extra troop trains, &c., not having been included in previous returns.
„ „ 4,800 „ of tolls on S.-P. Ry. passengers to and from Delhi from September to December 1901.
„ „ 2,000 „ of charge on Postal parcels for the half-year.
„ „ 600 „ of charge for additional accommodations supplied to the Postal Department from October to December 1901.
„ „ „ 10 and „ 52 „ of cost of emergent police passes.
„ „ „ 50 and „ 400 „ of value of passes issued to the employés of the construction lines.
„ „ „ 2,000 and „ 15,000 „ of adjustment of estimated traffic included owing to late receipt of I. M. and O. & R. Railways and Simla Post Office Division sheets up to 2nd November 1901.

† Added Mds. 98,000 and „ 66,000 „ of foreign inward invoices not having been included in previous returns.
„ „ 30,000 „ of adjustment in connection with Foreign Railway's Division sheets.
Deducted Mds. 2,06,498 and „ 40,243 „ of difference between the approximate and audited figures for the week ended 23rd Nov. 1901.
„ „ 2,000 „ of re-booking freight to be deducted from earning.
„ „ 57,000 „ of estimated amount of outstandings relating to the half-year ended 30th June 1901.
„ „ 56 000 „ of forwarded traffic suspense account.
„ „ 40,000 „ of traffic carried in excess over E. I. Ry. route reserved for payment to Foreign Railways.
„ „ 12,50,000 „ of rebate on coal for the half year.
„ „ 0,000 „ of demurrage to be written off.
„ „ 35,000 „ of overcharge for stores carried for construction.
„ „ 16,000 „ of estimated amount of overcharges to be taken credit for by stations.

‡ Added „ 1,39,683 Not having been included in previous returns.
„ „ 453 On account of telegraph earnings of the S. B. Ry. for the half-year creditable to the E. I Railway.
„ „ 8,312 „ of difference between the approximate and audited figures for the week ended 23rd Nov. 1901
Deducted „ 1,75,352 „ of hire and demurrage and hire of vehicles which have been shown as credits to expenditure.

1901. *Abstract of progressive weekly returns of all earnings for 1901 in comparison with 1900.*

METEOROLOGICAL OFFICE, BENGAL,
The 7th January 1902.

C. LITTLE,
Meteorological Reporter to the Govt. of Bengal.

DISTRICT ROAD FUND ACCOUNTS FOR THE QUARTER ENDING 30th SEPTEMBER 1901.

No. 685 R.C.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

ROAD CESS.

Dated Calcutta, the 28th January 1902.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 381L.F., dated the 18th January 1902, submitting statement of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th September 1901.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the second quarter of the year 1901-1902 be published in the *Calcutta Gazette*, and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the statement of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the statement referred to, be forwarded, for information, to the Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions; Superintending Engineers of the Northern and Western Circles; Inspectors of Works, Eastern and Bhagalpur Circles, and to the Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

D. JOSCELYNE,

Secretary to the Government of Bengal.

STATEMENT OF RECEIPTS AND EXPENDITURE OF THE SEVERAL DISTRICT ROAD COMMITTEES FOR THE QUARTER ENDING 30TH SEPTEMBER 1901.

CALCUTTA,
The 8th January 1902.

REGISTERED No., C 209.]

No. 6 of 1902.

SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 5, 1902.

OFFICIAL PAPERS.

CONTENTS.

NOTE ON THE LATE COTTON CROP OF BENGAL, 1901-1902.

THE following is published for general information.

F. A. SLACKE,

The 1st February 1902. *Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the Late Cotton Crop of Bengal, 1901-1902.

Character of the season.—The late cotton crop in this Province is sown in autumn and is harvested at the beginning of summer. The rainfall in September was deficient in all the districts growing late cotton, excepting Bankura, Midnapore, Manbhum and Singhbhum. The drought was emphasised in the following month throughout the area, excepting only Manbhum. In November, however, there was good rain in all the late cotton districts, excepting those in the Patna Division. There has been, practically, no rain since then, and, on the whole, the season has been unfavourable for this crop.

2. *Area sown.*—Since the publication of the last year's forecast on this crop, the District Officers of Saran and Darbhanga have revised their estimates of the normal area under late cotton, in accordance with survey statistics, and

the Provincial total now stands at 53,600 acres against 84,700 acres reported last year. The area planted is estimated at only 43,100 acres, the weather having been very unfavourable at sowing time.

3. *Character of the crop.*—From the annexed statement summarising the district returns, it will be seen that out of the 15 districts in the Province, in which late cotton is grown, only three, *viz.*, Balasore, Manbhum, and Singhbhum, report an outturn of 100 per cent. or over; in nine the estimate varies from 75 to 92 per cent., while in the remaining three districts, no more than from 49 to 63 per cent. of a normal crop is anticipated. According to the estimate of the District Officers, the Provincial outturn is expected to be 79 per cent. of a normal crop. In some districts of Orissa, however, the crop appears to have been underestimated, and I anticipate that an 82 per cent. crop will be harvested eventually in the Province as a whole.

4. *Gross outturn.*—According to the district estimates, the total yield of this crop will be lbs. 2,700,156 as compared with lbs. 3,134,950 of last year.

C. G. H. ALLEN,

Offg. Director of Land Records and Agri., Bengal.

CALCUTTA,
The 26th January 1902.

Forecast of the Late Cotton Crop of Bengal, 1901-1902.

FINAL REPORT ON THE SUGARCANE CROP OF BENGAL, 1901-1902.

THE following report is published for general information.

F. A. SLACKE,
Secy. to the Govt. of Bengal.

The 1st February 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Sugarcane Crop of Bengal, 1901-1902.

Explanatory.—An attempt has been made to include in this report an estimate of the amount of sugar produced from other sources than cane. The information on this subject is not, however, yet complete.

2. *The character of the season.*—Except in parts of East Bengal, the rainfall in January 1901 was, everywhere, above the normal for the month, but in February it was deficient in North and East Bengal and also in parts of the Presidency and Bhagalpur Divisions. The fall in March was markedly deficient almost throughout the Province, and the drought was accentuated in the following month in the districts of North and East Bengal, though the rest of the Province received a fair quantity of rain. In May most of the Bihar districts received their normal quota of rain, though elsewhere the fall was greatly in defect. There was heavy rain in North and East Bengal in the following month, but outside that area the fall was scanty, and especially so in Bihar, Orissa, and Chota Nagpur. The rains in July were general but scanty, and in August also they were general, but slightly deficient in East and Lower Bengal. In September there was plentiful rain throughout the Province, except in parts of Bihar and North Bengal. There was very little rain anywhere, in October, except in Noakhali and Chittagong, but in the following month there was good rain almost everywhere, except in Bihar and Chota Nagpur. The past two months have been marked by an almost total absence of rainfall throughout these Provinces. On the whole, the season has not been unfavourable for the sugarcane crop, but it has suffered from locusts and insects in a few districts.

3. *Area sown.*—Since the issue of the preliminary forecast, the Collector of Darbhanga has reduced the figure of the normal area under this crop in his district from 73,900 acres to 17,000 acres, in accordance with the statistics furnished by the Settlement Department, with the result that the provincial total of the normal area under this crop now stands at 843,400 acres againt 899,100 acres, as estimated in the preliminary forecast. Of this, 811,700 acres are estimated to have been planted with sugarcane this year. The decrease is due to the unfavourable character of the early part of the season.

4. *Character of the crop.*—As will appear from Appendix I, the outturn in 13 districts (Birbhum, 24-Parganas, Kulna, Rajshahi, Dinajpur, Rangpur, Pabna, Faridpur, Backerganj, Bhagalpur, Sonthal Parganas, Manbhum, and Palamau) is estimated at or above the normal. In nine it is estimated at between 90 and 99 per cent., in 15 others it varies between 80 and 89 per cent., and in the rest, between 63 and 75 per cent. The district returns summarised in Appendix I estimate the total outturn at 94 per cent. for the Province. In the preliminary forecast, published in July 1901, I anticipated a normal outturn for the Province, but having regard to the weather which has since prevailed, I now estimate the Provincial outturn at 96 per cent. of a normal crop.

5. *Gross outturn.*—Taking the Provincial outturn at 96 per cent., the probable gross outturn of cane *gur* will amount to 17,143,100 cwts. as compared with 16,228,400 cwts. estimated last year. The total amount of raw sugar or *gur* produced in these Provinces from date-palm is estimated by the District Officers at 2,639,771 cwts., and that from palmyra-palm and other sources at 3,920 cwts.

C. G. H. ALLEN,
Offg. Director of Land Records and Agri., Bengal.

CALCUTTA,
The 24th January 1902.

APPENDIX I.

Final Report on the Sugarcane Crop, 1901-1902.

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane crop, in acres.	Approximate area under sugarcane last year (1900), in acres.	Estimated area under sugarcane this year (1901), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1900)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1901)?	Remarks by District Officers.	Remarks by the Director of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Burdwan	Burdwan ...	1,796,080	1,284,200	27,400	27,600	27,700	87	83	......	
	Birbhum ...	1,121,990	960,000	9,000	8,000	9,000	100	100	......	
	Bankura ...	1,677,440	642,800	15,000	15,500	14,000	100	95	The cyclonic weather at the end of November last slightly affected the outturn of sugarcane this year.	
	Midnapore ..	3,292,600	2,190,000	20,410	16,590	18,100	68	64	The outturn is expected to be somewhat less than what was estimated in the preliminary forecast on account of the cyclone and the rainy weather at the end of November.	
	Hooghly ...	1,067,360	762,300	14,500	13,700	14,400	75	80	The crop was injured by untimely excessive rains and the estimated outturn is therefore less than that shown in the preliminary forecast.	
Presidency	24-Parganas ...	1,344,640	1,102,008	4,500	4,500	4,600	101	107	Seasonable rainfall accounts for the good outturn.

APPENDIX II.

Abstract Statement of Estimated Acreage and Outturn of the Sugarcane Crop, 1901.

Province.	Acreage: Of current year's crop.	Acreage: Of previous year's crop.	Acreage: Average of five preceding years.	Percentage by which column 2 exceeds (+) or falls short of (−) that in— Column 3.	Column 4.	Outturn in Cwt.: Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of five preceding years.	Percentage by which column 7 exceeds (+) or falls short of (−) outturn in— Column 8.	Column 9.	Remarks by the Director of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11	12
Bengal	811,700	801,800	......	+1·23	......	17,143,100	16,223,400	......	+5·63	......	The average yield of raw sugar (*gur*) is estimated at 22 cwts. per acre in Bengal.

WEATHER AND CROP REPORT.

For the week ending the 3rd February 1902.

Burdwan.—No rain. Weather seasonable. Threshing of *aman* still continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kalna	10	2	
Katwa	12	13½	
Raniganj	12	8	

Birbhum.—No rain. Weather seasonable. Threshing of paddy going on. Standing crops doing well. Price of rice at Sadar 12¾ seers and at Rampur Hât 12 seers 6 chitaks per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Pressing of sugarcane in progress. *Rabi* crops doing well. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura is 15 seers and at Vishnupur 14 seers per rupee.

The total fall from 1st January to 1st February 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·43

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌂, dew ; ⁓, fog ; o, overcast.

N.B.—In the weekly abstract from 5th to 11th January 1902 *read* 30 097 ins. *for* 29·997 ins. as the mean pressure of the 8th January 1902, and also 30·057 ins. *for* 30·043 ins. as the mean pressure of the seven days.

RESOLUTION ON THE EMBANKMENT AND DRAINAGE REPORTS FOR THE YEAR 1900-1901.

No. *275I.*

Government of Bengal.

IRRIGATION DEPARTMENT.

IRRIGATION.

Dated Calcutta, the 10th February 1902.

RESOLUTION.

READ—

The Embankment and Drainage Reports for the year 1900-1901.

The expenditure incurred during the year on embankments and drainage works in Bengal is shown in the following statement.—

	1900-1901
	Rs.
I.—Embankments—	
Class A, in Orissa	44,388
Class B, Schedule D, and all other Government embankments	2,37,222
Class C, maintained under contributions	78,663
Class D, maintained by annual apportionment of charges	11,349
II.—Works undertaken under the provisions of the Drainage Act	9,112
III.—Drainage works carried out at the cost of Government and not under the provisions of the Drainage Act	12,995
IV.—Drainage works carried out under the provisions of the Embankment Act	13,959
Total ...	4,07,688

2. *I.—Embankments maintained by the Irrigation Department.*—The public embankments in Bengal are of two kinds—

1st.—Embankments the property of Government, which are maintained at the public expense.

2nd.—Embankments maintained by Government officers at the cost of the persons interested.

Of the first kind there are—

A.—The embankments in Orissa, which are maintained under Act XXXII of 1855.

B.—The embankments enumerated in Schedule D of Act VI (B.C.) of 1873, among which are included those of the Burdwan Raj estate taken over by Government in 1804, and some additional lengths which have at various times been added to the schedule under the provisions of section 43 of Act II (B.C.) of 1882, as also three small embankments in the Pabna, Bogra and Purnea districts.

Of the second kind there are—

C.—The embankments of which the cost of maintenance is recovered from the persons interested by the payment of a fixed annual charge under a contract extending over a term of years not exceeding thirty, as provided for in sections 63-68 of Act II (B.C.) of 1882.

D.—The embankments of which the cost of maintenance is recovered from the persons interested by an annual apportionment of the actual charges.

The embankments in Orissa, which were classified in April 1894, have been re-classified by Superintending Engineer during the year under review, as shown below :—

I.—Capital or Canal embankments constructed and maintained by Government as part of the Orissa Canal system and intended to be above high-flood level.

II.—Ordinary or Agricultural embankments constructed by Government and maintained from Provincial funds.

III.—Embankments of doubtful utility and harmful effect which are not to be maintained by Government in future.

According to the new classification, which has been approved by the Civil Officers and by the Government in the Revenue and Irrigation Departments, the lengths of the embankments in Orissa are:—

	Miles.	Feet.
I.—Canal embankments	293	4,678
II.—Agricultural embankments	476	2,888
III.—Marginal and other embankments of local importance not to be maintained	60	2,488

The Capital or Canal embankments are not included in this report.

3. *Lengths of embankments and areas protected.*—The lengths of embankments in each class and the areas protected by them are shown below :—

* In addition to this, 540,000 acres are efficiently protected by the flood banks of the canals.

In the Orissa Agricultural embankments, class A, which are in charge of the Superintending Engineer, Orissa Circle, there is a reduction of 30 miles 5,094 feet, due to the new classification made by Superintending Engineer. A similar reclassification of the Orissa embankments, in the Balasore Division, which are in charge of the Superintending Engineer, South-Western Circle, is now under preparation.

In class B embankments there is an increase of 1 mile 870 feet, due to the conversion of the Daudpur embankment and its retired line from the category of takavi to Provincial work. In the spur embankments in the Purnea district constructed along the new channel of the Panar river to protect the civil station of Araria against the encroachment of the river, there is a decrease of 67 feet only. The length of class C embankments remains the same, while in that of class D embankments there is a decrease of 1 mile 870 feet.

4. *Floods.*—During the year there were very high floods in the Mahanadi and Byturni rivers, which caused several breaches in the canal banks. There was no flood in the Brahmini river. In the Gandak river the floods were of ordinary character. The floods which occurred in the Sukri and Mohanunda rivers in the Gaya and Malda districts, as also those in the rivers in the Purnea, Bogra, Pabna and Bhagalpur districts, were not of any importance, and no breaches occurred in the embankments. In the South-Western Circle the floods in the Cossye river, though not very high, were of long duration. They

caused breaches at the 8th mile of the Doobatpore circuit, S. D. No. 23, on the Old Cossye beyond Kulinijole, the largest being 643 feet at Pathan Kutabpur, which flooded an area of 40 square miles on the north and 15 square miles on the south of the Midnapore Canal. However, the damage done by them was not of much consequence, but the floods in the Selye and Darkessur rivers were very high, and did considerable damage both to the embankments and the standing crops. In several places the circuit embankments were overtopped and many breaches were caused, most of which were closed during the year. The excessive local rain caused a flood in the Khorai khal exceeding all previous records. The flood-water not only submerged the Trunk Road, north of the main canal for some distance, but breached the embankments on both banks in several places. In the Cossye Division there were altogether 187 breaches, of which 116 occurred in the schedule D embankments and 71 in the takavi embankments. The floods in the Subarnareka, Panchpara, Burrabulong and Matai rivers in the Balasore Division were also very high. The Subarnareka flood caused several breaches in the Bhograi embankment and completely washed away the Bhograi sluice. The crops throughout the Sulsaput were damaged, and about 50 per cent. of the houses destroyed. The flood in the Burrabulong river, which occurred in August, washed away one three-span bridge and turned the abutments of two others on the Bengal-Nagpur Railway. The rice crop along its banks was considerably damaged. The flood in the Panchpara river, due to the spill of the Burrabulong and Subarnarekha rivers, was 1 foot 8 inches higher than any previously recorded flood. There were altogether 205 breaches in the embankments in the Balasore Division, of which 31 were in the Argowal circuit embankment, S. D. No. 41. The unprecedentedly heavy rainfall of September submerged practically the whole of the 24-Parganas district and caused widespread damage to the crops and properties over an area of 717 square miles. This was mainly due to the insufficiency of the discharging capacities of the sluices in the embankments. A special report has been submitted by Mr. Maconchy on the subject, and the Commissioner of the Presidency Division has been asked to consult the landowners regarding the construction of the sluices and drainage channels which are necessary.

5. *Original Works.*—During the year there was no expenditure on original works in the Orissa, Sone, Gandak and Northern Circles. In the South-Western Circle an expenditure of Rs. 15,654 was incurred on the project, amounting to Rs. 48,371, sanctioned by Government for the protection of the country and the Bengal-Nagpur Railway, in the neighbourhood of Khargpur, from floods in the Cossye river. Rupees 7,036 were spent on the construction of a retired line of sea-dyke embankment at Chandpur, for which an estimate, amounting to Rs. 72,314, was sanctioned by the Bengal Government in June 1900.

6. (*a*) *Ordinary repairs.*—In the Orissa Circle the cost of ordinary repairs to Government embankments during the year was Rs. 12,644 against Rs. 18,714, It was less than the average of the five previous years by Rs. 14,325.

In the South-Western Circle the expenditure on ordinary repairs to Schedule D and other Government embankments was Rs. 1,61,490 against Rs. 1,34,622, The increase took place in all districts except Birbhum and Balasore.

In the Hooghly district the cost of repairs during the year was Rs. 21,811 against Rs. 17,409 in the previous year. The increase of Rs. 4,402, was due to heavy repairs required for the Rupnarain left embankment in No. 5 subdivision of the Cossye Division. In the Midnapore district there was an excess expenditure over that of the previous year of Rs. 12,186. The increase was mainly caused by very extensive repairs to the embankments, both in the Cossye and Balasore Divisions, which were seriously damaged by the abnormal floods during the year.

In the 24-Parganas district the expenditure on repairs was Rs. 43,737 as against Rs. 29,623 in the previous year. The main cause of the increase was the replacing by laterite revetments at a cost of Rs. 13,839, the old brick-facing works in the 24-Parganas embankment below the Diamond Harbour, which were completely shattered by the waves.

The total expenditure incurred during the year in maintaining the embankments protecting the Burdwan Raj Estate in the districts of Hooghly, Burdwan, Birbhum and Midnapore, was Rs. 1,20,774 against Rs. 1,15,174 in the previous year, showing an increase of Rs. 5,600 only.

The outlay incurred during the year on repairs (exclusive of Establishment and Tools and Plant) to the C class (takavi) embankments in the Midnapore district was Rs. 38,712 against Rs. 43,377 in the previous year, The reduction is due to the absence of expenditure on flood-damage repairs. The last contract for seven years for the maintenance of the Midnapore takavi embankments in charge of the Executive Engineer, Cossye Division, and that for five years for the Joki embankment in charge of the Executive Engineer, Balasore Division, expired on the 31st March 1901. It has been settled to renew the contracts both for the Midnapore and Joki embankments. The new contract for the Midnapore embankments will be for three years and that for the Joki embankment, 15 years. Two notifications by the Revenue Department of the Government of Bengal for preparing the necessary estimates of costs to be incurred for maintaining the embankments during the periods noted, were published in the *Calcutta Gazette* of the 5th June and 25th September 1901, respectively. The estimates are under preparation.

The only embankment (class D) in charge of the Superintending Engineer of the Sone Circle is the Sukri bund in the Gaya district, on which Rs. 53 were expended during the year. On the Tirhut, Saran and Champaran C class takavi embankments, of which the charge has been taken by the Superintending Engineer, Gandak Circle, since the formation of the Circle in December 1900, the total expenditure incurred during the year was Rs. 39,951 against Rs. 43,9.0 in the previous year.

On the Tirhut embankment the expenditure during the year was Rs. 7,939 against Rs. 10,539 in the previous year, and on the Saran embankments Rs. 14,704 against Rs. 20,909. The expenditure on the Saran embankments was incurred partly on the construction of a sluice in the Ardewa retired line, and partly on maintenance, viz., Rs. 2,511 on the former, and Rs. 12,193 on the latter. The sluice was completed during the year. On the Champaran embankment Rs 17,308 were expended during the year against Rs. 12,462 in the previous year. The increase was mainly due to the construction of the retired line at Surajpur, on the 31st mile of the embankment, which was taken in hand in the preceding year and completed during the year under review at a total cost of Rs. 17,188. The outlay incurred on it during the year was Rs. 13,012, and that on the maintenance of the embankment was Rs. 4,296.

The expenditure incurred on maintenance and repairs to the D class embankments (inclusive of river protective works) in the Gandak Circle, was Rs. 10,827 against Rs. 12,805 in the previous year. On the Turki embankment Rs. 6,276 were expended against Rs. 8,537 in the previous year. The cost of maintaining the Bazitpur embankment was Rs. 3,643 against Rs. 3,967, while that of the Monghyr embankment was Rs. 908 against Rs. 251. The expenditure on the Daudpur embankment and retired line in the Muzaffarpur district was Rs. 1,670.

7. *Breaches.*—Owing to very high floods during the year in the Mahanadi and Byturni rivers, there were several breaches in the embankments. The breach which occurred in the flood bank of the Kendrapara Canal, a little below the Bosepur lock, was a bad one, while the other breaches were of no great importance. In the South-Western Circle there were many breaches in the embankments. In the Cossye and Balasore Divisions alone there were altogether 321 breaches. The amount expended for closing them and for executing flood damage repairs in the Burdwan, Hooghly, Midnapore, Murshidabad, 24-Parganas and Balasore districts was Rs. 55,605 against Rs. 52,194 in the previous year. In the Burdwan, 24-Parganas and Balasore districts the expenditure was very high, being Rs. 26,804 against Rs. 2,261, expended last year. This heavy expenditure was due to the effects of the unusually heavy rainfall of September 1900.

8. *Retired Lines.*—In the Orissa Circle the amount expended during the year in constructing retired lines of embankments was Rs. 2,656 against Rs. 1,127 in the previous year. It was, however, less than the average of the last five years by Rs. 2,233. In the South-Western Circle, the expenditure during the year was Rs. 30,575 against Rs. 41,202 in the previous year. The decrease took place in the Burdwan, Midnapore, Murshidabad and 24-Parganas districts. In the Hooghly and Balasore districts there was an increase of Rs. 5,290. In the Gandak Circle an outlay of Rs. 15,523 was incurred during the year for completing the retired line at Surajpur in the 31st mile of the Champaran embankment, and the sluice on the Ardewa retired line of the Saran embankment, both of which were started in the previous year.

9. *River Protective Works.*—In the Orissa Circle, Rs. 14,675 were expended during the year on the revetment at Cuttack, and on the groynes at Bogla near the 7th mile of Machgong canal, and at Nilkantapur on the Brahmini river, against Rs. 15,633 in the previous year, showing a decrease of Rs. 958.

The expenditure incurred during the year on river protective works in the Gandak Circle compared with that of the previous year is shown below:—

		1899-1900.	1900-1901.
		Rs.	Rs.
C class embankments.			
Saran embankments	... ...	1,913	4,054
Champaran ditto	... ...	1,918	..
Tirhut ditto	... ...	5,976	4,738
	Total ...	9,807	8,792
D class embankments.			
Turki embankment	... ...	1,481	1,671
Basitpur ditto	... ...	1,969	1,671
	Total ...	3,450	3,342

The expenditure on the protective works of the Saran embankments was Rs. 2,141 in excess of that of the previous year. The increase was due to the construction of new spurs necessitated by the serious encroachment of the Gandak river upon the embankments in several places. No protective works were done during the year in the Champaran embankment. In the Tirhut embankment there was a decrease of Rs. 1,238 under this head.

10. *Financial.*—The actual cost of repairs to the Orissa embankments (class A), exclusive of charges for Establishment and Tools and Plant, was Rs. 44,388 against Rs. 46,451 in 1899-1900, the rate per mile being Rs. 85 against Rs. 84 in the previous year. The expenditure on class B embankments was Rs. 2,35,552 against Rs. 2,20,241, or at the average mileage rate of Rs. 211 against Rs. 197 in the previous year. As regards class C embankments maintained by Government under the contract system, the actual cost of repairs was Rs 78.663 against Rs. 87,075, the average rate per mile being Rs. 163 against Rs. 181 in the previous year.

The sums payable under contract for class C embankments compared with the maintenance charges, including book charges for Establishment and Tools and Plant, are shown in the following statement, together with the amount recovered during the year and the balance remaining to be recovered:—

Year.	Midnapore District.		Saran District.		Champaran District.		Muzaffarpur District.		Total.		Recoveries.	Balance to be recovered.	Surplus.	Deficit.
	Maintenance charge.	Contract amount.	Maintenance charge.	Contract amount.	Maintenance charge.	Contract amount.	Maintenance charge.	Contract amount.	Maintenance charge.	Contract amount.

NOTE.—The figures in columns 2 to 11 are supplied by the Superintending Engineers of Public Works Department Circles, and those in columns 12 and 13 by the Board of Revenue. The net demand of 1900-1901, as shown by the Board, is Rs. 1,40,918. It has been arrived at by adding the demand of the year 1900-1901, Rs. 1,02,982, with the arrear due from previous years, Rs. 42,991 *minus* the advance payment at credit, Rs. 5,055. The balance to be recovered Rs. 45,288 (column 13), is the difference between the net demand Rs. 1,40,918, *minus* the recoveries during the year, Rs. 95,630 (column 12). The difference between the maintenance charge and the contract amount (columns 10 and 11) is shown in columns 14 and 15. The total recoveries Rs. 19,34,846 (column 12), is the difference between the total contract amount, Rs. 19,80,134 (column 11), and the balance to be recovered, Rs. 45,288 (column 13). As the Board deal with the advance payment at credit, the amount of annual demand given by them differs from the contract amount supplied by Superintending Engineers.

(a) Consists of Repairs Rs. 14,704 plus Establishment Rs. 17,334 plus Tools and Plant Rs. 127 *minus* Suspense Rs. 24,512.
(b) Ditto Rs. 17,303 plus ditto Rs. 17,595 plus ditto Rs. 177 plus ditto Rs. 18,464.

It will be seen from the above figures that Government is, on the whole, a loser by Rs. 29,567 on the working of the year under review. The total outstanding balance to be recovered amounts to Rs. 45,283. The Board of Revenue states that the uncollected balance at the end of previous year shown in their return for the year under review, viz., Rs. 42,991, is the correct figure. It has been arrived at, after checking the total of the ledger and preparing the returns from the *goswara*, which was not done before.

The actual outlay (inclusive of charges for Establishment and Tools and Plant) incurred during the year on class D embankments and sluices (Appendix B) was Rs. 28,464 against Rs. 27,116, and the amount outstanding from the previous year was Rs. 41,059. Out of the total amount, Rs. 69,523, the recoveries and adjustments made by the Civil Department during the year was Rs. 38,457, leaving a balance of Rs 31,066 unadjusted at the end of the year.

11. *Works undertaken under the provisions of the Drainage Act, No. VI (B.C.) of 1880.*—The Dankuni, Howrah, Rajapore and Burrajolla Drainage Works in the Hooghly district in charge of the Executive Engineer, Northern Drainage and Embankment Division, were maintained in good order during the year under review. The cost of maintenance compared with the previous year is given below:—

	1899-1900.	1900-1901.	Annual amount fixed for maintenance.
	Rs.	Rs.	Rs.
Dankuni	6,404	961	4,390
Howrah	1,094	1,317	2,000
Rajapore	3,792	5,357	5,000
Burrajolla	484	1,477	

The expenditure on the combined Rajapore and Burrajolla projects was in excess of the amount fixed for their maintenance. The excess was mainly due to extensive flood damage repairs carried out during the year. On the Dankuni and Howrah projects the charges were much less.

The income derived during the year from the drainage projects from land rent, fisheries, tolls on boats and other sources, was Rs. 6,343 against Rs. 4,730 in the previous year, showing an increase of Rs. 1,613. This improvement in the income is considered satisfactory.

The drainage and irrigation of the lands benefited by the drainage works were carried out according to the requirements of the cultivators. The unprecedentedly heavy rainfall of September submerged the crops in the whole of the drainage basins. The surplus water was, however, eventually drained off by the sluices, and good crops were obtained over about three-quarters of the total area. There would have been an almost total destruction of the crops had there been no drainage works.

During the year no advances were made under the Drainage Act in any of the districts in the Burdwan Division.

For expenditure during the year on the scheme for the drainage of the marsh known as "Anno Sorobar" in Rajmahal in the Bhagalpur Division, Rs. 4,670 were placed at the disposal of the Commissioner by the Financial Department of the Government of Bengal.

12. *Drainage works carried out at the cost of Government and not under the provisions of the Drainage Act.*—On the Bullee Bhil Drainage Works, Rs. 1,358 were expended during the year on ordinary repairs to the sluice, regulator, escape, weirs, etc., against Rs. 1,825 in the previous year.

On the Baliaghye Branch Drain, Rs. 7,626 were expended during the year on silt clearance. The drain was opened to traffic on the 22nd July 1900. The total expenditure to end of the year was Rs. 13,266 against the estimate of Rs. 15,131 sanctioned for the work. The navigation receipts for the year from the main drain kept open throughout the year, and its branch were Rs. 3,642 against Rs. 2,343 in the previous year.

The Sadar khal was much improved by dredging. During the year 79,670 cubic feet of silt were removed at a cost of Rs. 862. The total expenditure incurred during the year on silt clearance by hand of the khas tahsil khals maintained by this Department was Rs. 2,274 against Rs. 6,268 in the previous year.

18. *Drainage Works carried out under the provisions of the Embankment Act, No. II (B.C.) of 1882.*—During the year, Rs. 180 were expended on preliminary operations in connection with the reconstruction of the Protapkhally khal, the revised estimate for which has been submitted to the Collector for sanction. The reconstruction of the Rajkhally sluice was completed at a total cost of Rs. 3,486. The progress made in connection with the sluices applied for last year is noted below:—

Work will be soon commenced on the Khagra sluice in the 14th mile of Durbachati right embankment No. 16, regarding which the necessary procedure under the Act has been taken by the Collector. Plans and estimates were under preparation during the year for Dhalhara sluice in the 15th mile of the Rupnarain right embankment, Pakeeria sluice in the Gopinathpur retired line, Rupnarain left embankment No. 38, and the Brindabanpur sluice in takavi embankment, No. 3 Hooda. The question of the construction of the Saidpur sluice at the mouth of the Dhanrian khal on the Gungakhali khal, takavi right embankment, is under consideration. The Gobindpur sluice in the 1st mile of Chetua Circuit embankment No. 22 has been struck off the list, owing to the cost of the sluice not having been deposited by the applicants.

Two takavi sluices were constructed during the year in the Northern Drainage and Embankment Division, one at Kalaboro in mile 171-72, and another at Srinagar in mile 183-84 of the Government embankment, at a cost of Rs. 2,069 and Rs. 2,507, respectively. Two other sluices, one at Samukpotah in mile 204-205 and another at Kooripotah in mile 24-25 of the 24 Parganas embankment were taken in hand, and Rs. 1,088 and Rs. 3,311 respectively were expended during the year.

The Churrial khal drainage sluice was maintained during the year at a cost of Rs. 1,103 against Rs. 1,170 in the previous year. Fourteen other sluices in Schedule D embankments in the 24-Parganas district were efficiently maintained during the year at a total cost of Rs. 3,668. The Kumrul sluice in the 53rd mile of the Damodar left embankment and its channel were maintained during the year at a cost of Rs. 375 only.

Plans and estimates for the additions of draw-shutters to some of the sluices in the old Contai nala marginal embankment were prepared and submitted to the Collector of Midnapore for the provision of funds. They have been approved by Government, and it is expected that necessary funds will be allotted during the next year by the Civil Department.

ORDER.—Ordered that a copy of the Resolution and of its Appendices (A and B) be published in the Supplement to the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of the Resolution and of its Appendices (A and B) be forwarded to the Secretaries to the Government of Bengal, in the Revenue and Financial Departments; Secretary to the Board of Revenue, Lower Provinces; Commissioners of the Presidency, Burdwan, Patna, Bhagalpur, Rajshahi, Dacca, Chittagong, Chota Nagpur, and Orissa Divisions; Director-General of Statistics; Superintending Engineers of the Orissa, South-Western, Sone, Gandak and Northern Circles; Inspector of Works, Bhagalpur Circle; and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secretary to the Government of Bengal.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

APPENDIX A.

List of public Embankments in Bengal in charge of Government Officers, showing their lengths and the actual cost of repairs (without charges for Establishment) during the year 1900-1901.

Name of Civil Division.	District.	Miles of Embankments. Maintained at the expense of Government. Class A.	Maintained at the expense of Government. Class B.	Maintained at the expense of the persons benefited. Under contract. Class C.	Maintained at the expense of the persons benefited. By annual apportionment of charges. Class D.	Maintained at the expense of the persons benefited. Total.	Total miles of embankments.	Expenditure of the year on Works and Repairs. Class A. Total.	Class A. Rate per mile.	Class B. Total.	Class B. Rate per mile.	Class C. Total.	Class C. Rate per mile.	Class C. Contract rate.	Class D. Total.	Class D. Rate per mile.

FIRST NOTE ON THE WHEAT CROP OF BENGAL, 1901-1902.

The following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 10th February 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First Note on the Wheat Crop of Bengal, 1901-1902.

Preliminary.—Wheat is grown chiefly in Bihar, in the Murshidabad and Nadia districts of the Presidency Division, in the Rajshahi, Rangpur and Pabna districts of the Rajshahi Division, and in the Palamau and Hazaribagh districts of Chota Nagpur.

2. *Character of the season.*—The rainfall in September was normal in these districts except in the Bhagalpur Division, and in the North Ganges districts of the Patna Division. In October there was little rain anywhere, and practically none in Bihar. In November Murshidabad, Nadia, Rajshahi, Rangpur and Pabna got rain. The rainfall was therefore defective in Bihar at sowing time, but has been normal in the other districts.

3. *Area sown.*—Since the publication of the final forecast of 1900-1901, the District Officers of Saran and Darbhanga have reduced their estimates of the normal area, on the basis of survey statistics from 120,000 and 110,200 acres to 89,400 and 52,700 acres respectively, with the result that the total normal area in the Province is now returned at 1,490,900 acres instead of 1,567,300 acres reported last year. In consequence of the dearth of rain at sowing time, the area planted this year is estimated at only 1,404,700 acres.

4. *Character of the crop.*—From the annexed abstract of the district returns, it will be seen that of the 19 large wheat-growing districts in the Province, only four (Rangpur, Pabna, Malda and the Sonthal Parganas) anticipate a normal outturn; in two the outturn is estimated at from 90 to 99 per cent.; in four it varies between 80 and 89 per cent., and in five more between 60 and 79 per cent., while in Shahabad, Champaran, Muzaffarpur and Palamau less than 60 per cent. of a normal crop is anticipated. According to the estimates of the local officers, the outturn for the Province will amount to only 75 per cent. of a normal crop, and the outturn for

Bihar to only 71 per cent. The prospects of the crop largely depend upon rain during the next fortnight when the grain is forming, and I cannot at present estimate a higher outturn than 75 per cent. of a normal crop, and even this will not be obtained unless there is rain to swell the grain.

C. G. H. ALLEN,

Offg. Director of Land Records and Agriculture, Bengal.

CALCUTTA,

The 2nd February 1902.

First Forecast of the Wheat Crop of Bengal, 1901-1902.

Division.	District.	Total area of district.	Total area estimated to be under cultivation.	Approximate normal area under wheat.	Approximate area under wheat last year (1900-1901).	Estimated area under wheat this year (1901-1902).	Taking 100 to represent the normal outturn, how much represented the outturn last year (1900-1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1901-1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.

		Acres.	Acres.	Acres.	Acres.	Acres.				
Rajshahi ...	Rajshahi ...	1,663,040	1,968,100	74,200	73,800	65,100	95	90	......	
	Jalpaiguri ...	1,594,600	1,075,000	3,200	1,800	1,100	80	70	Wheat does not grow well in this district, and the people do not take much interest in the cultivation of this crop. The area sown is therefore contracting.	
	Darjeeling ...	744,964	145,090	5,000	5,000	5,000	100	100	......	
	Rangpur ...	2,231,040	1,602,700	50,000	32,300	34,500	69	109	......	
	Pabna ...	1,176,960	852,500	16,000	16,000	15,100	95	150	......	
Dacca ...	Mymensingh	4,052,480	2,405,700	8,000	8,000	8,000	60	80	......	
	Faridpur ...	1,459,840	1,116,900	2,000	1,800	2,000	60	100	......	
Patna ...	Patna ...	1,332,600	998,800	127,500	146,000	128,100	87	68	Further enquiry is being made as to the correctness of these figures.	
	Gaya ...	3,015,980	2,207,500	157,600	146,700	(a) 104,300	50	(b) 61	(a) The decrease in area is due partly to the seed and young plants being eaten by caterpillar owing to the drought, and partly to the failure of the seeds to germinate for want of moisture. (b) The outturn is estimated to be below the normal, because the crop suffered from want of moisture at the time of sowing and from failure of rain after germination.	
	Shahabad ...	2,796,520	1,841,800	123,000	126,000	112,000	43	45	The decrease in the area sown is due to early cessation of rain, and consequent want of moisture. The expected low outturn is due to the same cause.	
	Saran ...	1,696,067	1,234,000	89,400	89,400	89,400	96	45	The figures in columns 5 and 6 have been revised according to the survey statistics. The crops in the irrigated area promise well, but those beyond the reach of irrigation are in a precarious state, and their prospects depend on rain.	

Bhagalpur ...	Champaran ...	2,873,915	1,447,700	105,300	105,300	106,300	100	50	The falling-off in the outturn is due to insufficient rainfall.
	Muzaffarpur ...	1,941,284	1,687,000	69,700	67,700	62,700	75	50	The estimated outturn will be 50 per cent. if ordinary rain falls in January: if there be no rain, the outturn will probably be less.
	Darbhanga ...	2,1[illegible]	1,820,700	52,700	51,800	48,100	89	61	The figures in columns 5 and 6 have been revised in accordance with the survey jinswar.
	Monghyr ...	2,[illegible],440	1,582,800	100,000	103,000	103,000	72	86	The prospects of the crop were promising, but the failure of the Christmas rain has injured the crop.
	Bhagalpur ...	2,704,640	2,097,000	203,200	198,300	202,200	94	91	......
	Purnea ...	3,196,520	1,639,800	24,000	20,900	23,000	86	80	The decrease in the outturn is due to want of moisture in the lands.
	Malda ..	1,216,000	673,800	60,000	80,000	75,000	110	100	......
	Sonthal Parganas.	3,560,160	1,725,100	14,800	14,900	14,800	84	101	The outturn on the whole is expected to be normal on account of seasonable rain.
Orissa ...	Cuttack ...	2,323,200	1,161,200	1,500	2,100	2,700	75	76	......
	Balasore ...	1,834,365	870,800	500	200	200	75	76	......
	Angul ...	1,075,840	260,000	100	100	100	100	50	......
Chota Nagpur	Hazaribagh ...	4,493,440	2,213,200	8,100	10,800	10,800	88	63	......
	Ranchi ...	4,580,680	2,954,300	1,200	1,200	300	50	50	The decrease in the area and outturn this year is due to early cessation of rain. Enquiry is being made regarding the correctness of the current year's area, and revised figures will be submitted with the final report.
	Palamau ...	3,139,200	768,000	14,700	10,000	5,400	50	25	The decrease in the area sown this year is due to want of timely rain. Damage caused by katoi insects accounts for the low outturn.
	Manbhum ...	2,654,080	1,419,200	6,000	4,500	4,500	90	90	......
	Singhbhum ...	2,526,019	838,800	3,000	1,400	2,500	82	60	The normal area has been revised. The decrease in the area sown and the estimated outturn is due to deficiency of rainfall during the sowing season.
	Total ...	78,743,583	45,170,400	1,490,900	1,501,400	1,404,700	78	75	

WEATHER AND CROP REPORT.

For the week ending the 10th February 1902.

Burdwan.—No rain. Weather seasonable. Threshing of *aman* still continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kalna	11	2	
Katwa	12	10	
Raniganj	12	8	

Birbhum.—No rain. Weather cool. Standing crops doing well. Price of rice at Sadar 12 seers and at Rampur Hât 12¼ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Condition of *rabi* good. Pressing of sugarcane going on well. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura is 15 seers and at Vishnupur 14 seers per rupee.

Midnapore.—Rainfall nil. Harvesting of *aman* nearly finished. *Rabi* crops doing well and sugarcane being pressed in Sadar subdivision. *Boro* being transplanted in Ghatal subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ghatal	13	0	
Tamluk	12	4	
Contai	18	0	

Hooghly.—No rain. Weather seasonable. *Rabi* crops doing well. Potato disease reported from thana Singur. Fodder and water sufficient. Common rice sells at 10 seers 11 chittaks per rupee.

Howrah.—No rain. Weather seasonable. Harvesting of winter rice is finished. Standing crops doing well. Condition of cattle good. Fodder and water supply sufficient. Common rice sells at Sadar at 10 seers and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects fair. Harvesting of winter rice finished. Harvesting of *rabi* crops is going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Barasat	10	0	
Basirhat	11	0	
Diamond Harbour	12	0	

Nadia.—No rain. Weather seasonable. Cultivation of lands for early rice going on. Sugarcane-pressing continues. Standing crops doing well. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—No rain. Weather seasonable. Harvesting of *kalai* not yet over. Prospects of *rabi* favourable. Small-pox among cattle reported from thana Raghunathganj of Jangipur subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Lalbagh	11	12	
Jangipur	12	8	
Kandi	13	8	

Jessore.—No rain. Weather seasonable. Prospects of *rabi* crops fair. Mustard being harvested. Cultivation going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Jhenida	13	4	
Magura	12	0	
Narail	12	5	
Bangaon	12	0	

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy almost over. Prospects favourable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee
Bagerhat	13	0	
Satkhira	11	0	

Rajshahi.—Weather seasonable. Prospects of standing crops good. Cattle-pox reported from one village in Nator thana. Fodder and water plentiful. Common rice sells at 11¾ seers a rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 11½ seers on an average.

Jalpaiguri.—Harvesting of *haimanti* paddy finished. Prospects of *rabi* crops good. Common rice sells at 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—No rain. Weather seasonable. Wheat, barley, *tori*, mustard and tobacco doing well. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee
Terai	12	0	

Bhutta sells at Darjeeling at 20 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—No rain. Weather seasonable. Lands are being prepared for *aus* and jute. Water and fodder sufficient. Common rice sells at about 12 seers per rupee.

Bogra.—No rain. Harvesting of mustard and other *rabi* crops continues. Lands being prepared for *aus*, jute, and sugarcane. Prospects fair. Fodder and water sufficient. Common rice sells at 12 seers 9 chittaks a rupee.

Pabna.—Rainfall nil. Weather seasonable. Prospects of crops good. Cattle-pox in the interior. Price of rice at Sadar 9 seers 13 chittaks and at Sirajganj 10 seers 5 chittaks per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice, 12 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishoreganj	12	12	
Jamalpur	11	12	
Netrokona	12	3	
Tangail	11	0	

Faridpur.—No rain. Prospects of crops good. Common rice sells at 11¼ seers a rupee.

Backergunge.—No rain. Weather cold. Prospects of crops good. No cattle-disease reported. Common rice sells at 11½ seers (new), *aman*.

Tippera.—Rainfall at Chandpur ·08. Weather seasonable. Prospects of *rabi* crops good. Fodder and water sufficient. Average price of rice, 12½ seers per rupee.

Noakhali.—Rainfall nil. Prospects of crops fair. Cattle-disease reported from Sudharam. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

Chittagong.—No rain. *Rabi* crops good. Water and fodder sufficient. Cattle-disease continues. Rice selling at 15 seers per rupee.

Patna.—Rainfall nil. *Rabi* doing fairly well. Rain wanted. Sugarcane-pressing continues. No cattle-disease. Fodder and water for cattle sufficient. Coarse rice sells as follows:—

	Srs.	ch.	
Patna	12	0	per rupee.
Dinapore	12	8	
Barh	12	4	
Bihar	11	0	

Gaya.—Rainfall nil. *Rabi* doing well. Lancing of poppy commenced. Pressing of sugarcane continues. Common rice selling at 12¼ seers per rupee.

Shahabad.—Rainfall nil. Weather seasonable. *Rabi* prospects unchanged. Fodder insufficient in Sadar subdivision: elsewhere sufficient. Water everywhere sufficient. No cattle-disease. Rice sells at Sadar at 12 seers per rupee.

Saran—Rainfall nil. Weather bright, sometimes with west wind. *Rabi* and poppy crops doing fairly well, but rain wanted. Fodder and water sufficient. Common rice sells at 12 seers 7 chittaks and maize at 23 seers 5 chittaks per rupee.

Champaran.—Rainfall nil. *Rabi* and poppy doing fairly well, but rain badly wanted. Weeding of *rabi* and sugarcane-pressing still continue. Cattle-disease reported from Dhanaha and Mainatand outposts. Prices of common rice and maize at Sadar are 12⅝ and 23 seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Prospects of *rabi* crops fair. Rain wanted for indigo lands. Prices are—Common rice 11½ seers, wheat 12 seers, barley 18½ seers, maize 20½ seers, gram 16½ seers, *arhar* 19½ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall nil. Rain wanted for *rabi*. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	11	0	
Madhubani	13	0	

Monghyr.—No rain. Weather seasonable. *Rabi* crops doing well. Poppy-fields being irrigated. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	11	per rupee.
Begusarai	11	8	
Jamui	12	0	

Bhagalpur.—No rain. Weather seasonable. *Rabi* doing well. Fodder and water sufficient. Cattle-disease reported from Katauria and Protapganj thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	13	2	
Madhipura	13	8	
Supaul	13	8	

Purnea.—No rain. Weather seasonable. Prospects of *rabi* crops fair. Sugarcane-pressing going on. Mustard being harvested. Lands are being ploughed for jute and *bhadoi* crops. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishanganj	10	0	
Araria	12	0	

Malda.—Rainfall nil. Weather seasonable. Lands are being prepared for *boro* paddy. Gathering of *kalai* and mustard still going on. Other *rabi* crops doing well. No cattle-disease. Fodder and water available. Price of rice unchanged.

Sonthal Parganas.—No rain. Weather seasonably cold. Paddy-threshing over. Prospects of *rabi* favourable. Rinderpest reported from Pakaur thana. Fodder and water sufficient. Average price of rice 12 seers 13 chittaks and of maize 20 seers 6 chittaks per rupee.

Cuttack.—Rainfall at Banki ·18. Weather seasonable. Harvesting of *sarad* and *rabi* continues. *Dalua* tobacco and cotton growing. Sugarcane being pressed. Condition of cattle good. Fodder and water available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	12	per rupee.
Jajpur	15	12	
Kendrapara	15	12	
Banki	19	2	

Balasore.—No rain at Sadar. Paddy-threshing and sugarcane-pressing continue. *Rabi* crops being harvested. *Dalua* and cotton doing well. Cattle-disease reported from Balasore and Agarpara circles. Rice selling at 17½, 16, and 17 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Weather seasonable. Sugarcane-crushing continues. Fodder available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Khondmals	18	0	
Interior	16	0	

Puri.—Rainfall nil. Weather seasonable. Harvesting of *sarad* paddy continues. Condition of *dalua* paddy, *mung*, *kulthi*, and other miscellaneous crops good. Fodder and water-supply sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	12	per rupee.
Khurda	15	12	
Interior	16	14	

Hazaribagh.—Rainfall nil. Weather cold and clear. Rain wanted for poppy crop. Fodder and water sufficient. Sugarcane-pressing is going on. Common rice sells at Sadar at 13 seers and at Giridih at 12½ seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Harvesting of mustard in progress. Average price of common rice is 15 seers per rupee. Cattle-disease continuing. Fodder and water sufficient.

Palamau.—No rain. Weather seasonable. Standing crops doing well. Cattle-disease reported from some places. Fodder sufficient. Prices at Sadar—Rice 12 seers 6 chittaks and maize 18 seers 9 chittaks per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on ground good. Fodder and water sufficient. Cattle-disease reported from Topchanchi, Tundi, Rajganj, and Purulia. Average price of common rice at Sadar 14 seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. *Rabi* crops need rain. Average price of rice is 14 seers 10 chittaks in the district, at Chaibassa 14 seers per rupee.

General Summary.—Except a very slight fall in parts of Tippera and Cuttack, there was no rain during the week anywhere in the Province. The want of rain is still felt in several places in Bihar and Chota Nagpur. Threshing of winter rice and pressing of sugarcane still continue. Harvesting of *rabi* and preparation of lands for early rice and jute are in progress. Poppy doing fairly well and lancing has commenced in places. Prospects continue to be fair on the whole. Cattle-disease reported from nine districts. Fodder sufficient except at Arrah. No want of water anywhere. The price of common rice has risen in 8 districts, fallen in 17, and is stationary in the rest (21).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 11th February 1902.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of January 1902.

	Inches.	Date.	Ho[illegible]
The mean pressure of the month	30·003		
The average pressure of January from 24 years' registers ...	30·014		
The highest pressure in the month	30·194	7th	10
The lowest pressure in the month	29·840	28th	16
The range of pressure	0·354		
	Hours.		
The total number of hours of bright sunshine during the month	255·2		
The maximum possible number of hours of sunshine ...	337·3		
	°		
The mean temperature of the month	66·4		
The average temperature of January from 24 years' registers ...	67·7		
The highest temperature in the month	86·2	31st	
The lowest temperature in the month	49·5	2nd	
The range of temperature during the month	36·7		
The mean daily range of temperature	23·6		
The greatest range of temperature in one day	26·7	20th	
	Per cent.		
The mean humidity of the month	68		
The average humidity of January from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·432		
The average vapour tension of January from 9 years' registers	0·467		
The mean cloud proportion of the month	0·60		
The average cloud proportion of January from 25 years' registers	1·33		
	Inches.		
The total rainfall of the month	Nil.		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil.		
The average fall of January from 48 years' registers ...	0·43		
The greatest fall in 24 hours	Nil.		
	Days.		
The number of rainy days in the month	Nil.		
The average number of rainy days in January from 24 years' registers	2		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	128·2		
The mean difference of sun and air temperatures	48·5		
The greatest sun temperature	136·4	30th	
The greatest excess of sun over air temperature	52·1	28th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	50·0		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·1		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	7·3	3rd	
	Miles.		
The mean movement of the wind per day	75·0		
The greatest movement of the wind in one day ...	150·0	30th	
The greatest movement of the wind in one hour	14·0	29th 2 to 3 P.M.	

The number of hours with winds from each of the 8 points—
N. 185, N.E. 23, E. 19, S.E. 11, S. 73, S.W. 91, W. 54, N.W. 143, Calm 113.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·5° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

N.B.—The hourly wind directions for 30 hours are deficient on account of the anemograph being under repair.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

The total fall from 1st January to 8th February 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·65

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR THE YEAR 1900-1901.

No. [illegible]

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the [illegible] February 1902.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Calcutta for the year 1900-1901.

Revenue receipts and expenditure.

The revenue earned in the year 1900-1901 amounted to Rs. 73,[illegible]. This, however, excluded outstanding bills for Rs. 1,76,580, and the actual collections, therefore, were Rs. [illegible], against an estimate of Rs. 68,01,778. The improvement of Rs. [illegible] was almost wholly due to the increase of traffic, especially that in coal at the Kidderpore Docks. The expenditure amounted to Rs. 70,65,428, [illegible] a saving as compared with the estimates of Rs. [illegible], so that the nett result was a surplus of Rs. 2,98,[illegible]. Adding to this the balance of previous years, the total revenue balance stands at Rs. 9,31,424, [illegible] of outstanding [illegible].

As compared with the year 1899-1900, there was an improvement last year of Rs. 7,14,[illegible]. The expenditure, on the other hand, has also increased, because some of it is proportionate to the volume of traffic handled. It is, however, satisfactory to note that under "ordinary expenditure" the increase was only Rs. [illegible], so that the nett improvement was Rs. 3,00,878.

The receipts include a sum of Rs. 28,960 on account of outstanding bills, so that the actual collections amount to Rs. 23,48,490. After deducting the receipts on account of the Graving Dock, the income of the Wet Docks amounts to Rs. 21,11,089. The expenditure, after deducting a sum of Rs. 63,800 directly chargeable to the Graving Dock is Rs. 20,39,231.

Commission of Enquiry.

13. Representations having been made to the Government by the Bengal Chamber of Commerce, the Calcutta Trades Association, and other public bodies regarding the management of the affairs of the Trust, it was held advisable to appoint a Commission of Enquiry. The report of the Commission has already been made public, and the suggestions made in it are receiving the attention of the Commissioners with a view to such changes being effected as will give general satisfaction.

Retirement of Mr. Apjohn and separation of the posts of Vice-Chairman and Chief Engineer.

14. On the 8th of April last, Mr. J. H. Apjohn, Vice-Chairman and Chief Engineer of the Commissioners, retired from the Service. He was an Engineer of conspicuous ability, and, in the report under review, the Commissioners express their acknowledgment of the very valuable services rendered by him to the Trust. With this acknowledgement the Lieutenant-Governor desires to associate himself, and he takes this opportunity of placing on record his high appreciation of the great service Mr. Apjohn has rendered to the Port of Calcutta and the commercial community by his assiduous and unremitting labour for the advancement and development of the Port. On Mr. Apjohn's retirement the appointments of Vice-Chairman and Chief Engineer have been separated: Mr. F. G. Dumayne of the Bombay Port Trust has been appointed for the former position and Mr. F. Palmer has been selected to fill the post of Chief Engineer.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secretary to the Govt. of Bengal.

FIRST FORECAST OF THE OILSEED CROPS OF BENGAL, 1901-1902.

THE following is published for general information.

W. C. MACPHERSON,

Offg. Secy. to the Govt. of Bengal.

The 17th February 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First Forecast of the Oilseed Crops of Bengal, 1901-1902.

Explanatory.—This note furnishes preliminary estimates of the area and outturn of the various kinds of oilseeds, both *bhadoi* and *rabi*, grown in these Provinces.

The chief oilseed crops are linseed, rape and mustard and *til* and of these rape and mustard are by far the most important. Most of the linseed is grown in Darbhanga, Saran, Champaran, Gaya, and Nadia, while the bulk of the rape and mustard crops cultivated in the districts of the Rajshahi Division, in the Mymensingh and Dacca districts of the Dacca Division, in the Sonthal Parganas and Purnea districts of the Bhagalpur Division, and in Hazaribagh and Ranchi.

2. *Character of the season.*—The monsoon was generally weak all over the Province except in some of the districts of the Dacca and Rajshahi Divisions. The deficiency was serious in the Bihar and Chota Nagpur Divisions. In September there was good rain in Bengal, but in the oilseed-producing districts of Bihar the fall was below the normal. October was a dry month, and though the rain at the end of November did much good in the Rajshahi and Dacca Divisions, Bihar again received little benefit.

There has been no rain in December and January, and all the *rabi* crops have suffered severely in consequence. The season is therefore unfavourable to these crops.

3. *Area sown.*—The normal area cultivated with oilseed crops in this Province is estimated at 4,162,400 acres, but the area actually sown this year is returned at only 3,805,500 acres, against 3,872,700 acres last year. The decrease is due to the drought at the sowing season.

4. *Character of the crop.*—Dinajpur is the only important oilseed-growing district in the Province which anticipates a crop of 100 per cent. Rajshahi, Pabna, Mymensingh and Saran estimate an outturn varying from 90 to 99 per cent., while Rangpur and Purnea expect from 80 to 89 per cent. of a normal crop. Nadia, Dacca and the Sonthal Parganas expect from 70 to 79 per cent., and Bogra, Gaya and Hazaribagh from 60 to 69 per cent., but Champaran anticipates only 55 per cent., Ranchi 50 per cent., and Darbhanga 47 per cent. of a normal crop. The outturn for the Province, as a whole, will amount, according to the estimates of the District Officers, to 78 per cent. of a normal crop, and this figure may be taken as correct. If, however, general rain falls before the middle of March, it is probable that an 80 per cent. crop will be harvested.

C. G. H. ALLEN,

Offg. Director of Land Records,
and Agriculture, Bengal.

CALCUTTA,
The 10th February 1902.

First Forecast of the Oilseed Crops of Bengal, 1901-1902

	Srs.	ch.	
Sadar	12	0	per rupee.
Ghatal	13	0	
Tamluk	12	12	
Contai	15	13	

Hooghly.—No rain. Weather seasonable. Standing crops doing well. Fodder and water sufficient. Common rice sells at 11 seers 2 chittaks per rupee.

Howrah.—No rain during the week. Weather seasonable. Lands are being prepared for jute. Water and fodder sufficient. Common rice sells at Sadar at 10 seers and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects fair. Harvesting of *rabi* crops is going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Barasat	10	0	
Basirhat	11	0	
Diamond Harbour	12	0	

Nadia.—No rain. Weather seasonable. Land being cultivated for early rice. Prospects of standing crops good. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—No rain. Weather seasonable. Harvesting of *kalai* still going on in places. Sugarcane and other *rabi* crops are doing well. Rain is badly wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Lalbagh	11	12	
Jangipur	12	8	
Kandi	13	8	

Jessore.—No rain. Weather seasonable. Prospects of *rabi* crops fair. Mustard and rapeseed being harvested. Cultivation going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Jhenida	13	0	
Magura	12	0	
Narail	12	5	
Bangaon	12	0	

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy almost over. Prospects favourable. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	4	per rupee.
Bagerhat	13	0	
Satkhira	11	0	

Rajshahi.—Weather seasonable. Crops doing well. Pressing of sugarcane continues. A few cases of cattle-pox reported from Nator thana. Fodder and water available. Common rice sells at 11¾ seers a rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers on an average.

Jalpaiguri.—Harvesting of mustard commenced. Prospects of standing crops good. Common rice sells at 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—No rain. Weather seasonable. *Hills*—*Tori* being harvested. Wheat and barley doing well. *Terai*—Mustard and tobacco doing well. Coarse rice sells as follows :—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Bhutta sells at Darjeeling at 20 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—No rain. Weather seasonable. Lands are being prepared for *aus* and jute. Fodder and water sufficient. Common rice sells at about 12 seers per rupee in the district.

Bogra.—No rain. Harvesting of mustard and other *rabi* crops practically finished. Preparation of lands for *aus*, jute, and sugarcane continues. Prospects fair. Fodder and water sufficient. Common rice sells at 12 seers 9 chittaks a rupee.

Pabna.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Rain wanted. Land being prepared for jute and paddy. Prices slightly lower.

Dacca.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 12 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Condition of crops good. Fodder and water sufficient. Common rice selling as follows :—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishorganj	12	13	
Jamalpur	12	4	
Netrokona	12	3	
Tangail	11	0	

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Common rice sells at 11½ seers a rupee.

Backergunge.—No rain. Weather seasonable. Prospects of crops good. No cattle-disease reported. Common rice sells at 11½ seers (new *aman*) per rupee.

Tippera.—Weather seasonable. Prospects of *rabi* crops good. Fodder and water sufficient. Average price of rice, 12½ seers the rupee.

Noakhali.—Rainfall nil. Prospects of crops fair. Cattle-disease reported from Sudharam, Lakhimpur, and Feni. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Chittagong.—No rain. Prospects of *rabi* crops good. Water and fodder sufficient. Cattle-disease continues. Rice selling at 15 seers per rupee.

Patna.—Rainfall nil. *Rabi* prospects unchanged. Rain badly wanted. Harvesting of gram and mustard and lancing of poppy commenced. No cattle-disease. Fodder and water for cattle sufficient. Coarse rice sells as follows :—

	Srs.	ch.	
Patna	12	0	per rupee.
Dinapore	12	8	
Barh	12	8	
Bihar	11	0	

Gaya.—Rainfall nil. *Rabi* doing well. Lancing of poppy in progress. Pressing of sugarcane continues. Common rice selling at 12½ seers per rupee.

Shahabad.—Rainfall nil. Weather seasonable. Harvesting of pea has commenced. Fodder insufficient in Sadar subdivision: elsewhere sufficient. Water everywhere sufficient. No cattle-disease. Rice sells at Sadar at 12 seers per rupee.

Saran.—Weather bright and dry with increasing heat by day. Still cold at night. Standing crops doing fairly well, but rain wanted. Sugarcane-pressing still continues. Fodder and water sufficient. Common rice sells at 12¼ seers and maize at 23 seers 11 chittaks per rupee.

Champaran.—Rainfall nil. Prospects of *rabi* crops are unchanged. Rain urgently wanted. Peas and pulses have done better than other crops. Prices of common rice and maize at Sadar are 12¾ seers and 23 seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Prospects of standing crops fair. Prices are—Common rice 11½ seers, wheat 12 seers, barley 18½ seers, maize 21 seers, gram 16½ seers, *arhar* 18½ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall nil. *Rabi* prospects unchanged. Fodder and water sufficient. No cattle-disease reported. Common rice sells at 12 seers 9 chittaks per rupee at Sadar. Subdivisional reports not received.

Monghyr.—No rain. Weather seasonable. *Rabi* crops doing well. Rain wanted for poppy crops. Common rice sells as follows :—

				Srs.	ch.	
Sadar	...	...	...	12	5	per rupee.
Begusarai	...	...	...	12	0	
Jamui	...	...	...	12	0	

Bhagalpur.—Weather seasonable; in parts cloudy. Rain wanted for *rabi*. Cattle-disease reported from thana Katauria and interior of Supaul. Fodder and water sufficient. Common rice sells as follows :—

				Srs.	ch.	
Sadar	...	...	...	12	10	per rupee.
Banka	...	...	...	13	2	
Madhipura	...	...	...	13	8	
Supaul	...	...	...	13	8	

Purnea.—No rain. Weather seasonable. Prospects of *rabi* crops not so favourable for want of timely rain. Harvesting of mustard in progress. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

				Srs.	ch.	
Sadar	...	...	...	11	0	per rupee.
Kishanganj	...	...	...	10	0	
Araria	...	...	...	12	0	

Malda.—Rainfall nil. Weather seasonable. Gathering of *kalai* and mustard approaching completion. Prospects of other *rabi* good. No cattle-disease. Fodder and water available. Price of rice unchanged.

Sonthal Parganas.—No rain. Weather seasonable. *Rabi* doing well. Sugarcane pressing still continues in some places. Fodder and water sufficient. Average price of rice 12 seers 12 chittaks and of maize 20 seers 10 chittaks per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *rabi* continues. *Dalua*, tobacco, and cotton growing. Mango in flowers. Sugarcane being pressed. Condition of cattle generally good. Fodder and water available. Common rice sells as follows :—

				Srs.	ch.	
Sadar	...	...	...	15	12	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	15	12	
Banki	...	...	...	18	6	

Balasore.—No rain at Sadar. Paddy threshing and sugarcane-pressing continue. *Dalua* and cotton doing well. Cattle-disease reported from Balasore, Bhadrak, Dhamnagar, Agarpara, and Dalsahi circles. Rice sells at 17⅛, 16, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Weather hot. Pressing of sugarcane continues. Fodder available. Common rice sells as follows:—

	Srs. ch.	
Sadar	12 8	per rupee.
Khondmals	18 0	
Interior	16 0	

Puri.—No rain. Weather seasonable. Harvesting of *sarad* paddy continues. Sugarcane being pressed. *Dalua* paddy, *mung*, *kulthi*, and other miscellaneous crops growing well. Fodder and water-supply sufficient. Common rice sells as follows:—

	Srs. ch.	
Sadar	15 12	per rupee.
Khurda	15 6	
Interior	17 4	

Hazaribagh.—Rainfall nil. Weather seasonable. Rain wanted. Opium collection in progress and the result is reported satisfactory. Fodder and water sufficient. Common rice sells at Sadar at 13 and at Giridih at 12½ seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. *Rabi* crops suffering for want of rain. Average price of common rice is 15 seers per rupee. Cattle-disease reported from several thanas. Fodder and water sufficient.

Palamau.—No rain. Weather close. Standing crops doing well. Cattle-disease still in two thanas. Fodder sufficient. Prices at Sadar—Rice 12 seers 15 chittaks and maize 18 seers 9 chittaks per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of crops on ground good. Fodder and water sufficient. Cattle-disease reported from Purulia, Para, Raiganj, and Jharia. Average price of common rice at Sadar is 14½ seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. *Rabi* crops being reaped. Average price of rice is 14 seers 6 chittaks in the district, at Chaibassa 14 seers.

General Summary.—No rain. Rain wanted in Bihar and Chota Nagpur. Threshing of winter rice and harvesting of early *rabi* going on. Pressing of sugarcane and cultivation of lands for early rice and jute continue. Lancing of poppy in progress. *Rabi* prospects below average. Cattle-disease reported from eight districts. No want of water. Fodder sufficient except in the Sadar subdivision of the Shahabad district. The price of common rice has risen in 10 districts, fallen in 12, and is stationary in the rest (24).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 18th February 1902.

Meteorological Report of the Province of Bengal for the month of January 1902.

SUMMARY OF THE [illegible] OGICAL [illegible] OBSERVATIONS TAKEN IN BENGAL [illegible] THE [illegible] TAKEN IN ASSAM, FOR THE MONTH OF JANUARY [illegible]

[illegible] WEATHER during January was [illegible] usually settled over the Province and [illegible] Bay. A cyclonic disturbance was o[illegible] the extreme south-west of the Bay in [illegible] of the month, and strong winds with [illegible] heavy rainfall were reported from the south[illegible] The disturbance may have been the c[illegible] use of the light rainfall in the west of [illegible] Chota Nagpur between the 5th and 7[illegible], but this explanation is suggested, not[illegible] the great distance of these districts fr[illegible] the centre of disturbance, because no [illegible] [illegible] given. It is the more likely [illegible] cause cyclonic disturbances during the clo[illegible] of the past year were invariably acc[illegible] panied by the formation of cloud wit[illegible] [illegible] far to the north of the area of [illegible] sturbance.

With the exception of the showe[illegible] in Bihar and Chota Nagpur, referred to [illegible] [illegible] general showers in the Puri and [illegible] Cuttack districts between the 11th and [illegible] [illegible] no rain fell in any part of the P[illegible] vince. Rainfall in Lower Bengal was nil, [illegible] and North Bengal the average fall wa[illegible] less than a tenth of an inch, in Chota N[illegible] [illegible] inch, and in Orissa ·27 inch. Wi[illegible] the exception of Orissa, the fall during the [illegible] [illegible] below the amount usually recei[illegible] d in January, the reason being the entire [illegible] disturbances of the cold-season type, [illegible] which cross the Province from west to east [illegible] [illegible]. The light fall of ·05 inch in [illegible] North Bengal is due to a few scattered [illegible] occurred towards the end of the month.

As usually occurs, when weather [illegible] f a settled character prevails, pressure and [illegible] [illegible] undergone small oscillations, [illegible] d have at times differed by moderate [illegible] [illegible] normal. Pressure was more fre[illegible] ently low and temperature high, the gre[illegible] [illegible] occurring at the beginning an[illegible] the end of the month. On an average fo[illegible] month, mean temperature was above [illegible] e normal in all divisions of the Province ex[illegible] where it was practically normal. E[illegible] cess in Lower Bengal and Chota Nagpur [illegible] and 1°·5, and in North Bengal and [illegible] Bihar a little under 2°.

At the beginning of the month [illegible] pressure was practically normal over the B[illegible] and [illegible] north of the Bay, but in the extre[illegible] e south there was defect and a rather stee[illegible] Winds were strong and north-easterly [illegible] on the Madras Coast and northerly in Ceylo[illegible] [illegible] drawn towards a low-pressure area [illegible] Temperature was generally low. Pressure [illegible] in Bengal, and as it continued to fall [illegible] in Ceylon and the south of Madras, the gra[illegible] became steeper. Winds strengthened during [illegible] the early days of the month in the south [illegible] of the Bay, and heavy rain fell at Negap[illegible] tam, Pamban, and Trincomalee on the 3rd [illegible] by which time the depression had ev[illegible] ently moved westward, winds having be[illegible] north-easterly.

On the 5th pressure began to ri[illegible] e in the north, and as the change advanced [illegible] the depression moved westward. The [illegible] gradient remained steep, and the norther[illegible] winds at Madras stations were considerably [illegible] above average strength until the 9th, wh[illegible] weather prevailed over the Bay.

It is difficult to account for the [illegible] slightly disturbed condition of the weather in [illegible] western districts about the 6th and again abo[illegible] t the 12th, when light rain was falling in B[illegible] Chota Nagpur, and Orissa. It is not unlike[illegible] ly that on both occasions the irregular wi[illegible] which [illegible] rainfall was due were connected [illegible] with the cyclonic disturbance, which was in [illegible] south of the Bay a few days before, and that [illegible] the medium of connection was some [illegible] of which the observations give no in[illegible] dication. The slight depression which wa[illegible] the falling pressure on the 12th may have [illegible] been the final stage of that cyclonic di[illegible], the depression having moved northwar[illegible] over the Arabian Sea and then recurve[illegible] towards the north-east. Such is the usual course [illegible] in November, and a peculiarity of the pa[illegible] has been the late occurrence of cyclonic [illegible] storms in the south of the Bay and the[illegible] to advance northwards. After the [illegible] settled weather of the first week and the [illegible] of the second week, conditions became [illegible] normal in every respect. On the 13th [illegible] pressure variation was small over the whole [illegible] area, and mean temperature differed from [illegible] by not more than 1°, except in East[illegible] Bengal, where there was excess of [illegible]. The cloudless weather, which was then p[illegible] revalent, continued with but little variation [illegible] towards the end of the month, when pre[illegible] sure fell on the north and the gradient [illegible]; [illegible], instead of being highest [illegible] in the north or north-west, readings w[illegible] an arrangement which, as usual, was [illegible] accompanied by southerly winds in Lo[illegible] and at the head of the Bay and [illegible] increase of temperature at inland stations [illegible].

The most rapid fall of [illegible] e during the month began about the [illegible], as it continued on the 28th and more s[illegible] lowly on the 29th, there was considerable [illegible] Bengal compared with the Bay area. S[illegible] outherly winds were then general inland, [illegible] weather was slightly unsettled in North Be[illegible] ngal during those days as shown by [illegible] scattered rainfall in that part of the Provi[illegible] ce between the 24th and 27th. The [illegible] variation in temperature, which [illegible] times was 4° to 5° above the [illegible] southern and [illegible]. At the [illegible] month [illegible] but there was still a large [illegible] more frequently

Pressure, though not dif[illegible] from the normal [illegible], was more frequently below than above, and in consequence [illegible] month are below the normal in all districts. It w[illegible] as usual highest in Chota Nagpur and lowest in East

Bengal, and the gradient was somewhat steeper than usual because defect was greatest in the east. In Chota Nagpur and the central parts of the Province average pressure was very nearly normal, while in part of Bihar and in East Bengal there was defect of about ·03 inch.

Temperature was more frequently low, but towards the end of the month, when pressure was low and winds became southerly, there was a large excess for some days. Owing to these high readings at the end of the month, mean temperature for the month is above the normal, except in Orissa, by amounts varying from 1° to 2°. In Assam there was excess of about half a degree. Excess was greater in day readings than at night, more especially in Bihar, where mean maximum temperature was nearly 4° above the normal. The greatest excess in mean minimum temperature was 2° in East Bengal.

Rainfall was almost nil in Bengal Proper, only a few light scattered showers falling in North Bengal during the last week. The showers in the first week in Bihar and Chota Nagpur and in Orissa in the second week were more general and in places moderately heavy, but at a large proportion of the stations in the western districts no rain was registered. The rainfall in Orissa was chiefly in the Puri and Cuttack districts, and amounted on an average for the whole division to the normal amount. In other divisions there was comparatively a large defect—greatest in Bihar, where the fall was less than one-seventh of what usually falls in January.

In Bengal Proper, where usually in January ·4 to ·5 inch falls, the only fall is ·05 inch in North Bengal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of January 1902:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days			Since 16th of October 1901.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·39
The total fall from 1st January to 15th February 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·04

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard compared and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 8 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed at the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the traces of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

* *N.B.*—The thermometer shed is under repair.

OPENING OF SAMARITAN FUNDS FOR NATIVE CONVALESCENTS AT THE MEDICAL COLLEGE AND MAYO HOSPITALS.

THE following letter to Messrs. Ralli Brothers is published for general information :—

No. 856Medl., dated Calcutta, the 21st February 1902.

From—H. M. KISCH, ESQ., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—MESSRS. RALLI BROTHERS.

THE Inspector-General of Civil Hospitals has reported to Government that, in commemoration of the 50th anniversary of the establishment of your firm in Calcutta, you have been so good as to make a donation of Rs. 10,000 to the Medical College and Mayo Hospitals—Rs. 5,000 to each—for the purpose of founding a Samaritan Fund at each hospital from which clothing and small sums for temporary assistance may be given to poor native convalescents—Hindus, Muhammadans, and Parsees—on their leaving the hospitals.

The need of Samaritan Funds such as your liberality has inaugurated has long been felt at each of the two hospitals, and the Lieutenant-Governor directs me to express to you the cordial acknowledgments of the Bengal Government. Your example may lead to other contributions to the same object, but the inception of the funds and the benefits from them will always be associated with your generosity.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1901-1902.

No. 212B., dated Calcutta, the 20th February 1902.

From—H. WHEELER, Esq., Offg. Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

THE HON'BLE MR. C. W. BOLTON, C.S.I.

I AM directed to submit the following report on the state of the salt market for the third quarter of 1901-1902, comprising the months of October, November and December 1901.

2. The quantity of salt of every description cleared during the quarter amounted to 27,86,299 maunds, as compared with 28,29,273 maunds in the previous quarter and 25,87,528* maunds in the corresponding quarter of the previous year. The nett amount of duty levied thereon was Rs. 65,62,430, as against Rs. 66,07,664 in the previous quarter and Rs. 60,68,342* in the corresponding quarter of the preceding year.

* Revised figures.

3. The quantity of locally-made salt removed from the *golas* in Orissa during the quarter and the quantity which remained in store at its close are shown in table (I) below:—

TABLE I.

1		2
		Puri.
		Mds.
Balance at the close of the previous quarter	...	2,28,232
Manufactured or added during the quarter	...	Nil
Total	...	2,28,232
Sold during the quarter	...	49,514
Wastage written off	...	5,068
Total	...	54,582
Balance at the close of the quarter	...	1,68,650

The total sales of locally-made salt during the quarter amounted to 49,514 maunds, as compared with 44,038 maunds in the previous quarter and 19,985 maunds in the corresponding quarter of the previous year. Duty was paid on the full quantity sold.

4. The subjoined table (II) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two previous years:—

TABLE II.

WHENCE IMPORTED.	1899-1900.		1900-1901.		1901-1902.

Australia (Victoria) ...	......	......	4	4	4	4
Aden ...	......	2,00,781	2,26,114	4,06,482	6,64,980	4,37,112
East Africa ...	......	......	6	6	38	38
Jeddah ...	......	2,092	......	......	......	......
Diego Suarez (Madagascar) ...	......	5,482	......	......	......	......
Port Said ...	2	2	......	......	......	......
Suez ...	......	......	......	......	288	......
Persia ...	......	......	......	......	4,400	4,400
Other East African ports ...	......	......	......	......	5	5
IV.— Coconada ...	3,039	......	......	......	......	......
V.—Bombay ...	1,62,216	1,37,162	1,26,100	1,53,102	2,86,527	1,42,044
Total ...	20,91,976	23,76,174	19,18,555	23,05,680	35,47,245	23,87,570

Compared with the corresponding quarter of the past two years, there has been a marked increase in the total quantity of salt imported. The clearances show a corresponding small increase only.

5. Table III shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter, as compared with the results of the previous four quarters:—

TABLE III.

WHERE STORED.	Third quarter of 1900-1901.	Fourth quarter of 1900-1901.	First quarter of 1901-1902.	Second quarter of 1901-1902.	Third quarter of 1901-1902.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds.
Sulkea Government Salt Golas	9 81,698	[illegible]	5 [illegible] 961	8,21 419	[illegible]
Kidderpore Dock ditto	2,81 266	[illegible]	2,16 0[illegible]	5,81 [illegible]70	6,78,238
Cultiagong Government Salt Golas	1,11 [illegible]	[illegible]	30 044	1,07,119	[illegible]
Narayanganj (private bonded salt warehouses)	17,267	[illegible]	34 [illegible]	15,720	41,565
Khulna ditto ditto	1 [illegible]27	88	59		[illegible]
Chandbali ditto ditto	10 105	[illegible]	6,608	3 021	11,153
Bhairab Bazar ditto ditto	3[illegible] 530	1,940	21,098	28,906	3,336
Jhalakati ditto ditto	26,047	[illegible]	19,980	64,[illegible]	60,092
Total	15,93,132	[illegible]	9,[illegible],440	10,16,862	[illegible]

The increase in the stocks in the Sulkea and Kidderpore golas is very marked and follows upon a similar rise in the preceding quarter.

6. The despatches of salt from Calcutta by boat and by the three railways passing through the several pass-stations into the interior of the country, both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter and the corresponding quarters of the last two years are shown in table (IV) below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.		BY STEAMERS AND FLATS.	
	Viâ Balikhal	*Viâ* Sankrail	*Viâ* Gewankhali	*Viâ* Kidderpore.	*Viâ* Balliaghatta.	By the East Indian Railway.	By the Eastern Bengal, Bengal Central, and South-Eastern Railways, or *viâ* Chitpur	Quantity despatched into the interior (ex including Orissa)	Quantity despatched to Orissa.

7. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 1,215 maunds, against 810 maunds in the previous quarter and 4,455 maunds in the corresponding quarter of the previous year.

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty, amounted to 1,765 maunds, as compared with 2,814 maunds in the previous quarter and 3,157 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt during the quarter for the port of Calcutta, according to the published market reports, amounted to 34,175 tons. It is reported that no sailing vessels were *en route* to Calcutta at the close of the quarter with full cargoes of salt from Hamburg, but a few parcels arrived by the Hansa line of steamers. The quantity brought by each vessel could not be ascertained.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

TABLE V.

* Revised.

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

RESOLUTION ON THE FOREST ADMINISTRATION REPORT FOR 1900-1901.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 25th February 1902.

RESOLUTION—No. 1250For.

READ—

The Progress Report of the Forest Department in Bengal for 1900-1901.

READ again—

The same Report for 1899-1900, Government Resolution thereon, and the Review of the Government of India.

The Government of India in their Circular of September 1900, pointed out that the Annual Forest Reports exceeded the limit of 20 pages imposed by the Code. The Conservator has this year, as compared with the last, effected a considerable reduction, but his report still exceeds the limit.

2. *Areas of Forests.*—Endeavours must be made to complete during the current year the long-pending enquiry necessary to reconcile the difference between the Revenue settlement and the Forest figures in regard to the Puri Division.

3. *Settlements, Surveys and Demarcation.*—The prevalence of fever amongst the staff prevented as much progress being made with regard to the Survey programme as was expected. The attention of the Conservator was drawn in July last to the great delay in concluding the settlement of the proposed Chittagong reserves. The Conservator has been desired to depute a Forest Officer during this cold weather to define the limits. The Lieutenant-Governor hopes that now no efforts will be spared to complete the work remaining to be done.

4. *Working Plans.*—The working plans for the Puri and Singhbhum Reserved Forests, which were pending at the close of the previous year, are still unfinished, as the officers entrusted with their compilation were obliged to proceed on leave out of India. They have now returned, and, having been specially placed in charge of this work, the Lieutenant-Governor hopes that the plans will be speedily completed. It is stated that work on the Singhbhum working plan was delayed by the non-receipt of maps of the areas, but who was to blame for this is not mentioned. This most important branch of the forest work is now receiving the attention it requires. With the assistance of the two officers specially employed, there is no excuse for further delay. A programme for the next five years has lately been approved by the Lieutenant-Governor, and the Conservator must carefully state in his future Reports how far the programme has or has not been carried out. There is no real guide to the administration of the Forests and no check on the work of the local officials, until these plans have been completed.

5. *Buildings and Communications.*—The operations of the year included the successful erection of a wire-rope tramway, the first in the circle; another joining the Mahaldaram ridge with the railway has been finished since the end of the year, and a still larger project is under preparation in the Tista Division. In this matter there has been substantial and useful progress.

6. *Breaches of Forest Law.*—The Lieutenant-Governor agrees with the Conservator that, considering the nature of the offences, the punishments awarded seem adequate.

7. *Forest Fires.*—He accepts the Conservator's opinion that, looking at the shortness of the rainfall in the Duars, the results are satisfactory, and for this credit is due to the Forest staff. In the Saitba block in Singhbhum, only 128 acres were burnt, as against 3,396 acres last year, a result attributed in part to the punitive measures that recently had to be enforced in the tract, but it is probable that the escape of the forest was much more largely due to the heavy showers in this district in the spring. The effect of the punitive action will again be watched in this summer.

The caution lately conveyed to the Chiefs of the Native States bordering Government forests with regard to fires originating in their territories will, it is hoped, be of some good.

8. *Yield and Outturn of Forest Produce.*—The Lieutenant-Governor is pleased to see that there was a marked increase in the revenue under *minor produce*, due chiefly to the favourable terms obtained by the Conservator for the *sabai* grass in the Singhbhum forests.

9. *Financial Results.*—The year showed a net income of Rs. 6,55,629 as against Rs. 5,93,707 in 1899-1900.

The opinion has been expressed that no Forest Division in Bengal should show a deficit. There are still two in which the receipts did not cover the charges during the last two years (Palamau and Angul). In these, so it is explained, inaccessibility and the absence of large timber, respectively, account for the fact that no profit was made: the deficits in these Divisions have, however, been considerably reduced, and the transfer of the protected forests in Palamau to the khas mahal department will cause a further reduction of the deficit in the Forest Department. The Lieutenant Governor requests that a special report may be furnished explaining whether anticipations made at the time when areas were afforested in Palamau and Angul have or have not been fulfilled, and whether anything more can be done in these two Divisions to balance receipts and expenditure. The Conservator says that all officers of the Department have cordially co-operated in the exploitation of their forest products: the Lieutenant-Governor will be glad if he will briefly state in his next report, in the case of the forests for which working plans have been prepared, whether they have attained to the limit of their possible annual yield, and what attempts have been made to secure, if possible, a regular demand for railway sleepers. It appears that during the year under report operations by departmental agency were restricted to six Divisions, and were nowhere extensive.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 24th February 1902.

Burdwan.—Rainfall at Sadar 0 03. Weather seasonable. Threshing of *aman* almost over. Pressing of sugarcane commenced. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kalna	12	0	
Katwa	12	10	
Raniganj	12	8

	Inches.
The mean pressure of the seven days	30 063
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·948
	Hours.
The total number of hours of bright sunshine	54·1
The maximum possible number of hours of sunshine	80·1
	°
The mean temperature of the seven days	74·6
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	74·0
The extreme variation of temperature	—
The maximum temperature	—
	Miles.
The highest velocity of the wind in one hour	16
	%
The mean relative humidity	65
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	66
	Inches.
The total fall of rain from 16th to 22nd February 1902	0·02
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·25
The total fall from 1st January to 22nd February 1902	0·02
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·29

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog; t, thunder; d, drizzling rain.

* The thermometer shed is under repair.

N.B.—In the weekly abstract from 26th January to 1st February 1902 *read* ·650 *for* ·60 as vapour tension of the 30th January 1902.

	Inches.
The mean pressure of the seven days	29·973
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·900
	Hours.
The total number of hours of bright sunshine	55·4
The maximum possible number of hours of sunshine	81·1
	°
The mean temperature of the seven days	76·1
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	76·5
The extreme variation of temperature	34·2
The maximum temperature	92·9
	Miles.
The highest velocity of the wind in one hour	18
	%
The mean relative humidity	67
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	64
	Inches.
The total fall of rain from 23rd February to 1st March 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·20
The total fall from 1st January to 1st March 1902	0·02
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·49

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

Palamau.—No rain. Weather hot. What standing crops there are are still doing well. Cattle-disease prevailing in some places. Fodder and water sufficient. Prices at Sadar—Rice 12 seers 6 chittaks and *makai* 18 seers 9 chittaks.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on ground good. Fodder and water sufficient. Cattle-disease reported from thanas Para, Manbazar, Rajganj, Topchanchi, Nirsa, Jharia, and Katras. Average price of common rice at Sadar is 14 seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. Reaping of *rabi* crops in progress. Average price of rice is 14 seers 3 chittaks in the district; at Chaibassa 13¼ seers per rupee.

General Summary.—There was practically no rain during the week. Several districts are in need of rain. Preparation of lands for early rice and jute continues. Collection of opium going on. Harvesting of *rabi* and pressing of sugarcane in progress. Prospects fair. Cattle-disease reported from 16 districts. Fodder and water generally sufficient. The price of common rice has risen in 14 districts, fallen in 9, and is stationary in the rest (23).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 11th March 1902.

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of February 1902.

	Inches.	Date.	Hour.
The mean pressure of the month	30·049		
The average pressure of February from 24 years' registers ...	29·945		
The highest pressure in the month	30·225	11th	10
The lowest pressure in the month	29·854	26th	16
The range of pressure	0·371		
	Hours.		
The total number of hours of bright sunshine during the month	225·3		
The maximum possible number of hours of sunshine ...	318·0		
	°		
The mean temperature of the month	70·5		
The average temperature of February from 24 years' registers ...	73·0		
The highest temperature in the month	92·1	28th	
The lowest temperature in the month	48·7	4th	
The range of temperature during the month	43·4		
The mean daily range of temperature	25·6		
The greatest range of temperature in one day	*		
	Per cent.		
The mean humidity of the month	64		
The average humidity of February from 24 years' registers ..	67		
	Inches.		
The mean vapour tension of the month .	0·460		
The average vapour tension of February from 9 years' registers	0·538		
The mean cloud proportion of the month	1·71		
The average cloud proportion of February from 25 years' registers	1·98		
	Inches.		
The total rainfall of the month	0·02		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil.		
The average fall of February from 48 years' registers .	0·87		
The greatest fall in 24 hours ...	0·02	23rd	
	Days.		
The number of rainy days in the month ...	Nil.		
The average number of rainy days in February from 24 years' registers	3		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	134·9		
The mean difference of sun and air temperatures	60·3		
The greatest sun temperature .. .	142·0	28th	
The greatest excess of sun over air temperature	*		
The mean temperature of the nocturnal radiation thermometer on woollen cloth	52·9		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·2		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	*		
	Miles.		
The mean movement of the wind per day	87·9		
The greatest movement of the wind in one day	137·0	22nd and 27th	
The greatest movement of the wind in one hour ...	18·0	24th	2 to 3 P.M.

The number of hours with winds from each of the 8 points—
N. 107, N.E. 26, E. 28, S.E. 31, S. 96, S.W 122, W. 63, N.W. 146, Calm 53.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·1° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

* The thermometer shed was under repair.

G. W. KÜCHLER,
for *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·69
The total fall from 1st January to 8th March 1902	0·02
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·18

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

N.B.—In the weekly abstract from 9th to 15th February 1902 *read* 30·133 inches *for* 30·183 inches as the mean pressure of 12th February 1902.

Total for corresponding 7¾ weeks of previous year.	3,096,713	32,13,001 6 1	4,13,65,148 20	69,39,270 8 11	1,60,400 1 3	1,03,12,672 0 3	843,428½	1,453,403½	2,296,831

(a) The decrease is due to the running of several extra troop and special trains and also to "Sivaratri *Méla*" in the corresponding period of 1901.
(b) The increase is chiefly in coal traffic.

RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS FOR THE YEAR ENDING 30TH SEPTEMBER 1901.

THE following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 18th March 1902.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 18th March 1902.

RESOLUTION—No. 1780.

READ—

Letter No. 65A., dated the 20th January 1902, from the Board of Revenue, submitting with a note, the Survey and Settlement Reports for the year ending 30th September 1901.

THE Survey and Settlement Reports for the year ending 30th September, 1901, are more concise than the Reports for the preceding year. Remarks will be separately communicated to the Board of Revenue with a view to the further curtailment of these Reports; and mistakes in the Appendices to the Settlement Report will be pointed out.

2. Important surveys and settlements were in progress during the year under the Superintendent of Provincial Surveys in nine districts situated in four Commissioners' Divisions, and under the Director of Land Records in ten districts contained in six of the Divisions.

The outturn of traverse survey for the year was 3,695 square miles, and of topographical survey 121 square miles. There were some changes of programme under this head, and larger areas were traversed, especially in

Monghyr and Patna, than had been originally provided for, while in other districts the programme was not quite fulfilled. The outturns generally obtained, in spite of difficulties occasioned by sickness of the surveyors in unhealthy tracts, and also by the indifference of the people at the beginning of the work in the preliminary demarcation of new areas, are sufficient and satisfactory. With reference to paragraph, 17 of the Board's remarks, the Lieutenant-Governor wishes to know whether the District Officer of Purnea was called to account for not giving the required help in the survey work, and what explanation he may have given. Cadastral maps were made under the direction of the Superintendent for 1,244 square miles, and records were written for 1,416 square miles. The programme under these heads was fully attained or exceeded in all districts. The Settlement Report does not show for all districts how far the programme for the year was fulfilled, but good general progress was made in attestation of records for 1,212 villages and in publication of draft and final records respectively for 2,309 and 1,309 villages.

3. The Board have furnished some useful comments on the cost—rates of survey and settlement in the various districts. The cost of traverse survey ranged from Rs. 29·4 a square mile in Monghyr and Patna to Rs. 75·2 in Backergunge; in the latter district the work has been newly started, labour is expensive, and on account of the nature of the country boats have to be kept for the surveyors. For cadastral survey and record-writing, the rates of cost were Rs. 129·1 to the square mile in Monghyr and Patna, and Rs. 189·2 in Darbhanga. The Board consider that "the aim of the Survey Department should be to reduce the cost to Rs. 160 for all survey work, or 4 annas an acre." This view, however, loses sight of the fact that the rate of cost must depend on the area under survey, the size of the fields, the number of tenancies to the square mile, and other matters which vary from district to district. The Lieutenant-Governor will have another opportunity of examining the question of the incidence of survey and settlement cost in Bengal operations, as compared with cost in other Provinces in connection with a special report which is to be submitted to the Government of India on this subject. Sir John Woodburn can at once say, however, that he would not be prepared to consent to a decrease of supervision which would jeopardise the efficiency of the survey and settlement work of which the value depends upon its accuracy and honesty.

4. Among other interesting subjects dealt with in the two Reports, the Lieutenant-Governor desires to notice the following matters :—

(1) *The difficulty of demarcation of villages in deara tracts.*—This matter is dealt with by the Superintendent of Surveys in paragraph 5 of his Report and by the Board in paragraph 14 of their note. Captain Crichton's proposals for the traverse work in such areas appear to be sensible, but they do not meet the whole difficulty; and the Lieutenant-Governor will await the Board's proposals as to the necessity of amendment of the law with regard to the definition of a village contained in section 3(10) of the Bengal Tenancy Act.

(2) *The maintenance of boundary marks.*—(Paragraph 9 of the Settlement Report and paragraph 19 of the Board's note.) Legal questions on this subject have been referred by the Board to the Legal Remembrancer. The Government of India have pressed for a report on the subject, and it will be dealt with as early as possible.

(3) *The lasting value of Mr. Finucane's settlement of 1878 in the Alapur Pargana of Darbhanga.*—(Paragraph 35 of the Settlement Report and paragraph 21 of the Board's note). The Settlement Officer reports that in this area the settlement staff found practically no rent disputes, that the rents recorded by Mr. Finucane had remained unchanged to the present day, and that disputes regarding other matters were not numerous, and were easily settled to the satisfaction of all concerned by a reference to Mr Finucane's papers. The Lieutenant-Governor agrees in the Board's remark that these results are evidence of the value of settlements, even without Government revision.

(4) *Recovery of cost of Survey and Settlement.*—(Paragraphs 48 and 103 to 105 of the Settlement Report and paragraph 22 of the Board's note). The recovery work in Darbhanga, where only Rs. 198 now remains due out of a demand of Rs. 4,37,880 payable by nearly half a million landlords and raiyats, has been extraordinarily successful. This work has not been so successful in Chittagong, no doubt because of the greater intricacy of the tenures in that district, and because the work was undertaken some time after the records had been finally published.

(5) *The record of Proprietor's private land in Darbhanga.*—The Lieutenant-Governor has been struck with the small number of parcels of "proprietor's private land" recorded in Darbhanga (Appendix IV of the Settlement Report). In 983 villages in Darbhanga for which records were attested in 1900-1901, only eight such parcels of true *sir* land were recorded as against 9,016 parcels of land recorded as held by the proprietor but not private land. It is desirable that the principles on which this classification has been made should be examined, and the Lieutenant-Governor will await a report from the Board on this subject.

(6) *The settlement of rents on the private estates in the Sonthal Parganas.*—The Lieutenant-Governor has read with interest the extracts from Mr. H. McPherson's Report (contained in pages 15 to 17 of the Settlement Report), with regard to transfers, and with regard to the rents settled in the Sonthal Parganas zamindary estates. The Settlement Officer's action in the matter of cancellation of transfers appears to have been careful and considerate, but there are other questions which need separate reference and discussion.

5. The Lieutenant-Governor thanks Mr. Lyon and Captain Crichton for their zealous and capable supervision of the survey and settlement operations of the Province. He also notices with pleasure the commendations which these officers have recorded of the work of the officers of the Survey and Settlement staff.

ORDERED that this Resolution be published in the *Calcutta Gazette* and that a copy of it with copies of the two Reports be submitted to the Government of India.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 17th March 1902.

Burdwan.—Rainfall at Sadar 0·44, Kalna 1·04, Katwa 1 21, Raniganj 0·74. Weather seasonable. Harvesting of *rabi* crops going on. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kalna	11	0	
Katwa	13	2	
Raniganj	12	8	

Birbhum.—Rainfall at Sadar 1·01, Rampur Hât nil. Weather cloudy. Pressing of sugarcane and harvesting of *rabi* crops going on. Price of rice at Sadar is 12¾ seers and at Rampur Hât 12 seers 10 chittaks per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar 1·25, Vishnupur ·85. Weather cooler on account of rain. Pressing of sugarcane and harvesting of *rabi* going on. Fodder and water sufficient. Sporadic cases of cattle-pox reported. Price of common rice at Bankura 15 seers and at Vishnupur 14 seers per rupee.

Midnapore.—Rainfall at Sadar ·54, Contai 1·81, Tamluk 0·31, Ghatal 0·58. *Boro* still being transplanted in Ghatal subdivision. No want of fodder or water. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ghatal	13	0	
Tamluk	12	12	
Contai	15	7	

Hooghly.—Little rain fell. Weather seasonable. Water and fodder sufficient. Common rice sells at 10 seers 14 chittaks per rupee.

Howrah.—Rainfall at Sadar 0·38, Ulubaria 1·82. Weather hot. The late rains have done much good to the vegetable crops and *boro* paddy. No cattle-disease. Fodder and supply of water sufficient. Common rice sells at Sadar at 9 seers 6 chittaks and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar ·97, Barasat 1·30, Basirhat 1·80, Diamond Harbour 4·70. Weather seasonable. Prospects fair. Harvesting of *rabi* crops finished. Lands are being prepared. Cattle-disease reported from Barasat and Basirhat thanas only. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Barasat	12	0	
Basirhat	12	4	
Diamond Harbour	12	0	

Nadia.—Rainfall at Sadar 1·46, Kushtia 0·83, Meherpur 1·46, Chuadanga 1·20, Ranaghat 1·08. Harvesting of *rabi* still continues. Sugarcane-pressing nearly finished. Standing crops doing well. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·53, Lalbagh 0·21, Kandi 2·04, Jangipur 0·04. Weather seasonable. *Rabi* crops are being harvested. Prospects favourable. Preparation of *bhadoi* lands commenced. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Lalbagh	11	14	
Jangipur	13	0	
Kandi	14	8	

Jessore.—Rainfall at Sadar 1·20, Jhenida 1·66, Magura 1·47, Narail 1·07, Bangaon 2·35. Weather cloudy and rainy for a part of the week. Prospects of crops fair. Harvesting of *rabi* crops going on. The recent rain has done much good to the cultivation. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Jhenida	12	12	
Magura	12	0	
Narail	12	0	
Bangaon	12	0	

Khulna.—Rainfall at Sadar 2·01, Bagerhat 0·79, Satkhira 2·46. Weather variable. The rainfall of the week has done much good to the standing crops—*boro*, etc. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	4	per rupee.
Bagerhat	12	12	
Satkhira	11	8	

Rajshahi.—Rainfall at Sadar ·58. Prospects of standing crops good. Harvesting of *rabi* crops continues Cattle-pox reported from Nator, Lalpur, and Singra thanas. Fodder and water available. Common rice sells at 12 seers a rupee.

Dinajpur.—Average rainfall 1·04. Weather seasonable. Standing crops fair. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 13 seers on an average.

Jalpaiguri.—Rainfall at Sadar 1·07, Alipur Duars ·68. Weather seasonable. Fields for *bhadoi* and jute being prepared. Price of common rice 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling 0·59, Kurseong 0·95, Siliguri 0·52. Weather seasonable. *Hills*—Wheat and barley progressing. *Terai*—Ploughing for *bhadoi*, jute, and sugarcane going on. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—Rainfall at Sadar 2·59, Gaibanda 1·47, Nilphamari 2·82, Kurigram 2·25. Weather seasonable. Rain did good for sowing of *aus*. Fodder and water sufficient. Common rice sells at 12 seers per rupee throughout the district.

Bogra.—Slight rain fell in parts of the district. More wanted. Cultivation of land for *aus*, jute, and sugarcane going on. Prospects fair. Fodder and water sufficient. Common rice sells at 12 seers 9 chittaks a rupee.

Pabna.—Rainfall at Sadar 1·00, Serajganj 0·05. Weather seasonable and cloudy at times. Prospects of crops good. There is some cattle-disease. Prices practically unchanged.

Dacca.—Rainfall at Sadar 1·15, Manikganj ·45, Munshiganj 1·19, Naraingaunj 1·91. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice 12 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·34, Tangail 0·28, Kishorganj 0·19, Netrokona 0·05. Weather seasonable. Rain is needed for the *boro* crop. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishorganj	12	10	
Jamalpur	12	4	
Netrokona	13	2	
Tangail	11	4	

Faridpur.—Rainfall at Sadar 2·3, Goalundo 0·83, Madaripur 1·60. Weather seasonable. Ploughing of fields in progress. Common rice sells at 12 seers a rupee.

Backergunge.—Rainfall at Sadar 1·34, Patuakhali 4·13. Weather cyclonic during first part of week at Patuakhali; thereafter seasonable. Prospects of crops good. Cattle-disease reported from outpost Rajapur. Common rice averages 11½ seers per rupee.

Tippera.—Rainfall at Sadar 1·03, Brahmanbaria ·35, Chandpur 2·47. Weather seasonable. Prospects of crops good. Harvesting of *rabi* going on. Fodder and water sufficient. Cattle-disease reported from Chandpur. Average price of rice 12¾ seers per rupee.

Noakhali.—Rainfall at Sadar 1·57, Feni 1·32. Cultivation of land for *aus* continues. Cattle-disease reported from five thanas. Fodder and water sufficient. Prices stationary.

Chittagong.—Rainfall at Sadar 0·69, Cox's Bazar nil. More rain wanted for *rabi* crops. Cattle-disease reported from some parts. Water and fodder available. Rice sells at 15 seers per rupee.

Patna.—Rainfall at Sadar 0·24, Dinapore ·20, Barh ·18, Hilsa 0·55, Bikram 0·24, and Bihar 0·20. Weather getting hot. Harvesting of *rabi* and extracting of opium going on. Slight damage done by rain and hail. No cattle-disease. Fodder and water sufficient. Coarse rice sells as follows:—

				Srs.	ch.	
Patna	...	...	...	12	8	per rupee.
Dinapore	...	...	...	13	8	
Barh	...	...	...	12	8	
Bihar	...	...	...	11	0	

Gaya.—Rainfall—drizzling on one day. Harvesting of *rabi* continues. Collection of opium almost finished. Common rice selling at 12½ seers per rupee.

Shahabad.—Rainfall at Sadar ·37. Weather seasonable. *Rabi* harvesting in progress. Opium collection commenced. Sugarcane being planted. No cattle-disease. Fodder and water sufficient. Rice sells at Sadar at 13 seers per rupee.

Saran.—Rainfall at Sadar 0·30, Sewan 0·25, Gopalganj 1·30. Weather—East wind with rain and hail-storm in some places. Mustard and peas already harvested. Poppy affected by blight and to some extent by hail. Pressing of sugarcane continues. Fodder and water sufficient. Common rice sells at 11 seers 15 chittaks and maize at 23 seers per rupee.

Champaran.—Slight rain fell in some places. Harvesting of *rabi* and pressing of sugarcane continue. Collection of opium commenced. Preparation of lands for *bhadoi* in progress. Cattle-disease reported from several police-stations. Fodder and water sufficient. Prices of common rice and maize at Sadar are 12½ seers and 23½ seers per rupee respectively.

Muzaffarpur.—Rainfall at Sadar ·86 and Hajipur, ·04. Harvesting of *rabi* crops in progress. Prospects fair. Prices are—Common rice 12 seers, wheat 12½ seers, barley 18½ seers, maize 22 seers, gram 18 seers, *arhar* 19½ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall at Sadar 0·37, Madhubani 0·07, Samastipur 0·32. Harvesting of *rabi* commenced. Fodder and water sufficient. Cattle-disease reported from Darbhanga, Jhanjharpur and Madhubani. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	12	0	per rupee
Samastipur	...	...	...	12	0	
Madhubani	...	...	...	12	6	

Monghyr.—Rainfall at Sadar 0·16, Begusarai 1·84, Jamui nil. Weather cloudy and stormy. *Rabi* harvesting commenced in places. Poppy-lancing and sugarcane-pressing nearly finished. Standing crops and mango blossoms said to have been somewhat damaged by hail-storms and heavy rainfall at Begusarai. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	12	1	per rupee.
Begusarai	...	...	...	12	0	
Jamui	...	...	...	12	0	

Bhagalpur.—Rainfall at Sadar 0·26, Banka 0·20, Madhipura 1·80, Supaul 1·50. Weather cloudy at times. Preparation for next crops in progress. Last rainfall did much good. Harvesting of wheat commenced. Fodder and water sufficient. Cattle-disease reported from Kishanganj and Banka. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	13	10	per rupee.
Banka	...	...	...	13	2	
Madhipura	...	...	...	14	0	
Supaul	...	...	...	13	0	

Purnea.—Rainfall at Sadar 0·84, Kishanganj 0·58, Araria 0·50. Weather seasonable. Rain though slight is beneficial to cultivation. More rain wanted. Harvesting of *rabi* continues. No cattle-disease. Fodder available. Water becoming scarce in Araria sub-division. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	11	0	per rupee.
Kishanganj	...	...	...	10	8	
Araria	...	...	...	12	0	

Malda.—Rainfall at Sadar ·13, Chanchal ·74, Gajol ·68. Weather getting warm. Lands are being prepared for *bhadoi* paddy. Barley and wheat are being gathered. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient. Price of common rice 12 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar ·98. Weather cloudy with drizzling rain. *Rabi* good. Prospects of mango and *mahwa* favourable. Fodder and water getting scarce. Average price of rice 12 seers 15 chittaks and of maize 20¼ seers per rupee.

Cuttack.—Rainfall at Sadar ·04, Jajpur 1·05, Kendrapara 1 28, Banki ·10, False Point ·52. Weather seasonable. *Dalua* in ears. Tobacco being cut. Cotton, *arhar*, and *mung* growing. Condition of cattle generally good. Fodder and water available. Common rice sells as follows :—

	Srs.	ch.	
Sadar	15	1	per rupee.
Jajpur	15	12	
Kendrapara	17	1	
Banki	15	12	

Balasore.—Rainfall at Sadar 2·38 and beneficial to standing crops. Paddy-threshing and sugarcane-pressing continue. *Dalua* and cotton doing well. Cattle-disease reported from Bhadrak, Kamarda, Dalsahi, and Dhamnagar and Agarpara Circles. Rice sells at 17, 15, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient

Angul.—No rain. Weather hot and cloudy. Cattle-disease reported from the interior Fodder available. Price of common rice stationary.

Puri.—Rainfall at Sadar 0·01, Khurda 0·28. Weather seasonable. Ploughing of lands for ensuing *sarad* paddy and sugarcane crops continues. *Dalua* paddy and *mung* growing well. Fodder and water-supply sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	12	per rupee.
Khurda	17	1	
Interior	17	8	

Hazaribagh.—Rainfall at Sadar 0·26, Giridih 9 07. Weather seasonable. Prospects of *mahwa* and mango good. Fodder and water sufficient. Common rice sells at Sadar at 13 seers and at Giridih at 12½ seers per rupee.

Ranchi.—Rainfall 0·28. Weather seasonable. Ploughing continues. Prospects of *mahwa* and mango good. Average price of common rice is 14 seers per rupee. Cattle-disease reported from several thanas. Fodder and water sufficient.

Palamau.—No rain. Weather hot. *Rabi* being harvested. *Mahwa* prospects good. Cattle-disease continues. Fodder and water still sufficient. Rice selling at Sadar at 12 seers 6 chittaks and maize 18 seers 9 chittaks.

Manbhum.—Rainfall at Sadar 0·81. Weather seasonable. Prospects of crops on ground good. Fodder and water sufficient. Cattle-disease reported from thanas Purulia and Para. Average price of common rice at Sadar 14 seers 3 chittaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rain, few drops only. Reaping of *rabi* crops still in progress. Average price of rice 14¼ seers in the district; at Chaibassa 13¼ seers per rupee.

General Summary.—Rain fell during the week in almost all districts, and was moderately heavy at places. It was generally beneficial to cultivation and standing crops, but some damage to poppy by hail is reported from parts of Bihar. Harvesting of *rabi*, pressing of sugarcane, and collection of opium are still going on. Prospects on the whole fair. Cattle-disease reported from 15 districts. Fodder and water generally sufficient. The price of common rice has risen in 10 districts, fallen in 16, and is stationary in the rest (20).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 18th March 1902.

Meteorological Report of the Province of Bengal for the month of February 1902.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF FEBRUARY 1902.

WEATHER during February was remarkable, chiefly for the continued absence of rainfall in all parts of the Province. A few showers fell in the northern districts and in Chota Nagpur about the end of the third week, but they were in nearly all cases less than ·1 inch, the minimum amount defining a rainy day. That rainfall occurred while a very shallow depression was crossing the Province towards Assam, and which finally disappeared about the 23rd, when there was a rapid rise of pressure in the latter area. The only rainfall of appreciable amount fell in Chota Nagpur, where there was an average of ·3 inch.

In Assam the fall was considerably greater than was general in Bengal, and was more heavy in the north than in the south. Dibrugarh and Sibsagar received between 1 and 2 inches, or about 60 per cent. of the normal amount, Tezpur and Goalpara a rather larger proportion, while at Cachar the fall was ·4 inch as compared with a normal fall of 2·3 inches.

At the beginning of the month atmospheric conditions were recovering from a disturbance which caused southerly winds and a large increase of temperature over the Province, but without rainfall. The rapid rise of pressure which followed the disturbance was more marked in the north than in the south, and in consequence a steep gradient of the cold season type became established over the Bay and the southern districts of Bengal. The northerly winds which then became general were accompanied by a large fall of temperature. From about the 4th, when the full effect of the rise had become apparent, till the end of the second week, fine cool weather for the season prevailed with light northerly or westerly winds.

Between the 14th and 24th two very slight depressions affected weather inland. They caused southerly winds at the head of the Bay and the usual increase of temperature. In the first case there were a very few light showers in North Bengal about the 17th, and a few days later, between the 21st and 23rd, somewhat more general, but still very light rainfall, mostly in Chota Nagpur. One station in the Ranchi district reported more than 1 inch on the 21st, and a few scattered stations between half an inch and 1 inch—all in Chota Nagpur. It was owing to these few moderately heavy local falls that the average fall in Chota Nagpur was ·3 inch. Generally the falls were less than 2 inch.

After the slightly disturbed weather between the 20th and 24th ceased, pressure, which had remained high during the period of disturbance, began to fall, and before the end of the month the distribution was very uniform and practically normal. Light southerly winds prevailed during those days and temperature was above the normal by variable amounts up to 5°.

On the 1st pressure was relatively low over the Province, but as a shallow depression had just moved eastward into Burma, a slow recovery was going on. Winds were southerly, except at the coast stations, and temperature was above the normal by amounts varying from 3° in the west to 8° in the central districts. There was little change on the 2nd, except for winds being more northerly with a rapid fall of temperature, but on the 3rd there was a large increase of pressure varying from ·12 inch in the south to ·16 inch in the north of the Province. After that change the pressure distribution was of the cold weather type with readings highest in Bihar and lowest in the south of Burma and Ceylon, winds were northerly or westerly and temperature continued to fall. The greatest mean defect at that time was 3° in North Bengal. The increase of pressure continued on the 4th, when there was a large excess over the whole area. This excess, which was greatest in Orissa and the east of Bihar, varied from ·12 inch to ·16 inch, and as it diminished towards the south of the Bay the gradient was steeper than usual. Temperature defect had increased and was more than 5° in part of Lower Bengal.

After the rapid increase of pressure, oscillations, considerable in amount, continued for two or three days, but by the 8th settled conditions prevailed with high pressure, north-westerly winds and comparatively low temperature until the 13th, when pressure began to fall inland, and winds became southerly at the head of the Bay with the usual increase of temperature. Pressure remained in considerable excess while a shallow depression was crossing the Province between the 14th and 16th, and when the rise set in after the passage of the disturbance, excess pressure in the north of the Province increased to ·2 inch. Winds, however, continued southerly, and temperature in the western districts was as much as 7° above the normal.

About this time a disturbance began in the west of India. It moved very slowly eastward, but as it caused a steady change of pressure in Northern India for some days, there was a daily fall in Bengal, at first brisk. The fall continued from the 18th to the 22nd, after which there was a slow rise. During these days winds were southerly or variable, temperature was 8° to 10° above the normal in parts of the Province, and showers fell in places, chiefly in Chota Nagpur. Pressure was again high on the 23rd, and though temperature fell after the disturbance passed, a considerable excess remained in all parts of the Province. On the 25th a brisk fall of pressure began and continued on the 26th, when the large excess which had been a prominent feature during the greater part of the month disappeared. On the latter date there was a small defect in Bengal, the distribution was very uniform and characteristic of the change of season, and temperature was in only small

excess. During the closing days there was a return to the conditions previously prevailing, as there was some increase of pressure and temperature over the Province, but on the whole pressure, winds and temperature were more normal at the end than they had been at almost any other time during the month.

Pressure.—Owing to the continued high pressure means for the month are high over both the Province and the Bay. Excess is very uniform and about ·09 inch, except in some of the central districts, where it is ·1 inch, or slightly higher. No well-marked depression crossed the Province during the month, but at times considerable oscillations occurred, the largest being in the early days when the high pressure conditions developed.

Temperature was comparatively low during the first two weeks and high afterwards. As excess was greater during these later weeks than the previous defect, the mean pressure for the whole month is above the normal in all divisions, except Orissa. This average excess is greatest and about 2° in North Bengal and Bihar. It is about 1° in Lower Bengal and Chota Nagpur and rather less than 1° in Assam. In Orissa defect is half a degree.

Owing to the comparative absence of cloud, maximum temperatures were much higher than usual, excess varying from 5° in the west of Bihar to 1° in Lower Bengal. In Orissa the average maximum temperature was practically normal.

Minimum readings were more nearly normal. On an average for the month they were 1° to 2° above the normal in Chota Nagpur and 1° below elsewhere, except in the extreme east, where there was a small excess.

The mean excess was 3° in the west of Bihar, 2° in the central districts and 1° in the south and east. In Orissa the greatest defect was seven-tenths of a degree at False Point.

Rainfall was almost entirely absent, except in Chota Nagpur, where showers were fairly general between the 21st and 23rd, though usually light. Several stations in that division reported falls varying from ·5 to 1 inch, but at the majority falls were below ·2 inch. On an average for the whole division the total fall for the month was ·3 inch. In the other divisions the largest average fall was ·02 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of February 1902:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th of October 1901.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in month.	Normal average number in month.	Variation.	Average.	Normal average.

	Inches.
The mean pressure of the seven days	29·846
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·839
	Hours.
The total number of hours of bright sunshine	43·0
The maximum possible number of hours of sunshine	83·3
	°
The mean temperature of the seven days	77·7
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	79·4
The extreme variation of temperature	33·4
The maximum temperature	99·2
	Miles.
The highest velocity of the wind in one hour	18
	%
The mean relative humidity	75
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	68
	Inches.
The total fall of rain from 9th to 15th March 1902	0·97
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·13
The total fall from 1st January to 15th March 1902	0·99
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·31

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew; ≡, fog; d, drizzling; o, overcast; g, gloomy; t, thunder; ∠, lightning; p, passing temporary showers.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 17th March 1902.

(a) The increase of ·58 mile is due to the opening of the extension of third line between Kalipahari and Noonia.
(b) The decrease is in outward traffic chiefly from stations in the B and C districts.
(c) The increase is chiefly in coal traffic.
* Deducted No. of passengers 5,993 and Rs. 28,105 } on account of difference between the approximate and audited figures for the week ended 18th January 1902.

SURVEY AND SETTLEMENT OF THE DISTRICT OF CHITTAGONG.

NOTIFICATION No. 1927.

The 25th March 1902.—The following Resolution is published for general information.

The settlement has been confirmed by the Government of India.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 11th December 1901.

RESOLUTION—No. 4091.

READ—

The final Report on the Survey and Settlement of the district of Chittagong by Mr. C. G. H. Allen, I.C.S.

READ also—

The Director of Land Records' letter No. 8298, dated 20th April 1901, reviewing the above Report, and the Board's letter No. [illegible]A., dated 15th May 1901, submitting it to Government with their remarks.

Nature of the operations.

THE report gives a brief but adequate general description of the district, its people, and its fiscal history. It deals with the circumstances which have rendered its settlement a matter of exceptional difficulty, and which permanently hamper its

revenue administration. The recent settlement proceedings and their results as they have affected both the Government and the people are fully and carefully detailed.

Area and population.

2. The district of Chittagong comprises a section of three low ranges of hills, running parallel throughout its length, and of four valleys intersected by them. Its total area is 2,492 square miles, of which 851 are covered by hills and jungle, the remainder forming the plains area. It is calculated that about 455,900 acres out of a total cultivated area of 484,547 acres bear a crop of winter rice; and the increase in cultivation in the past fifty years is estimated at 18 per cent. The population according to the census of 1901 was 1,352,722, giving a density for the whole district of 824 to the square mile of inhabited area. In the sadar subdivision the density of population is 911 to the square mile. The improvement which has taken place in the condition of the people is illustrated by the tradition of the dire distress during the great famine about 120 years ago when rice sold at 9 seers the rupee, and comparing that with the price which at times now rules in the district. The district is essentially Muhammadan, nearly three fourths of the people belonging to that religion.

Proprietary and cultivating classes—*Tarafdars* and *Talukdars*.

3. The district has been almost entirely peopled by immigrants from Bengal: the clearance made by each family or group of families of the settlers was known as a *taluk*. The *tarafs* or estates were formed by grouping already existing taluks into one property. These tarafs were created by the Muhammadan Government between their conquest of the district in 1666 and the British occupation in 1760, with the object of establishing middlemen (*tarafdars* or zamindars) to collect revenue from the occupant talukdars. In addition to the *tarafs* the Muhammadan rulers made large distributions of lands free of rent.

Landed property in Chittagong comprises the following classes of estates:—

(1) *Tarafs*, or permanently-settled revenue-paying estates.
(2) Revenue-free estates.
(3) Resumed revenue-free taluks, all of which are permanently settled.
(4) The temporarily-settled *noabad taraf* Jainarain Ghosal.
(5) The Government estates, which comprise ijaras, *noabad* taluks, jotes or raiyati holdings and unsettled Government land.
(6) The waste lots granted freehold to tea-planters.

The owners of estates in classes (1), (2), (4) and (6) belong to the proprietary class. Many of the resumed lakhiraj taluks are held by persons of the talukdar or tenure-holder class, because the revenue-free estates, which were resumed in the 1848 settlement, were, on resumption, broken up into their constituent taluks or tenures, each of which was settled with the occupant talukdar. The ijaradars and talukdars of the five Government estates are not possessed of a proprietary title, but most of the *ijaradars*, many of the talukdars (especially those who hold the great taluks in the south and in the north-east of the district), and a few of the *jotedars* also belong to the proprietary as distinguished from the tenant class of landholders. Many petty taluks, created during the 1848 settlement from excess lands separated from permanently-settled estates, were settled with the proprietors of those estates, so that these talukdars also belong to the proprietary class. The great mass of the *noabad* talukdars, however, belong to the tenant class of the population. These *noabad* talukdars are not proprietors (paragraph 224) but tenure-holders within the meaning of Act VIII of 1885. At the expiry of a settlement the uncultivated portion of a taluk is at the absolute disposal of Government. The talukdar cannot grant any leases binding on Government after the expiry of the term of settlement, and he is entitled to resettlement at such rent as may be settled by the Collector, and should the talukdar refuse settlement at the rent offered, the taluk is at the absolute disposal of Government. By this it is to be understood that the rental fixed will be one in due accordance with the law, and that a recusant talukdar, who refuses to vacate, will not be ejected *vi et armis*, but in due accordance with the law. *Noabad* taluks are saleable for arrears of revenue under Act XI of 1859 and Act VIII (B.C.) of 1868. In permanently-settled estates the taluks are held at fixed rates of rent in perpetuity, are heritable

transferable and saleable under Regulation VIII of 1819. In the Sundarban tracts, where it is necessary to construct embankments round a large area, the taluks are larger, and usually subdivided by the talukdars into *itmams*, or under-tenures, the *itmamdar* acquiring much of the status of a talukdar, and relieving the talukdar of the risks of cultivation. The under-tenure carries with it as against the talukdar transferable and heritable rights. *Dar-itmams* and other under-tenures of the second degree bear precisely the same relation to the *itmamdar* that the latter does to the talukdar. The talukdars, believing their own tenures to be permanent, had freely created these under-tenures with rents fixed in perpetuity. At the recent settlement the rent of under-tenures was fixed without regard to the permanent leases granted by talukdars, who had no right to make grants beyond the term of their own settlement. This practice is in accordance with section 192 of the Bengal Tenancy Act.

Raiyats.

4. Raiyats are broadly divisible into two classes locally viz., *kaimi* (or fixed) and *eksona* (or year to year). The former class almost invariably possess registered leases, under which they hold at rates fixed in perpetuity as against the grantor, their leases generally providing for an increase of rent—

(*a*) if the cultivated area is found on remeasurement to have increased, and

(*b*) if the Government revenue paid by the landlord is increased.

A *kaimi* raiyati holding is generally transferable, the landlord usually realising a fee before he recognises the transfer. Many of the *eksona* raiyats (frequently called jotedars) cultivate lands in their own villages, either taking up the same lands year after year, or moving from one part of the village to another. Such tenants have been recorded as settled raiyats under the Bengal Tenancy Act. They have, therefore, a right of occupancy, although their position in local estimation is that of mere tenants-at-will. The number of occupancy holdings is very small, as almost all the raiyats with rights of occupancy are settled raiyats. The under-raiyats are usually mere tenants-at-will.

In the district of Chittagong almost all the estates are very petty, and consequently the landlords are not able to oppress their tenants. The rights of all classes are protected by written and registered leases and by rent-receipts.

Previous settlements—
1. Settlement of 1764.

5. The district was ceded to the East India Company in 1760; and in 1764-65, a general survey and settlement of all lands occupied at that time was made. No maps were prepared, and the measurements, which were all made by a *nal* or bamboo pole, 8 cubits or 12 feet in length, were recorded only in the chitta or field book. The total area then measured was 390,282 acres, comprised in 28,224 revenue-paying *tarafs* and revenue-free tenures, and in the grant made to Jainarain Ghosal in 1763. The boundaries of the estates measured in 1764 were fixed for ever, and these estates, as so defined, were, with the exception of the Jainagar estate, settled in perpetuity in 1793. The remaining area of the district, viz. 1,204,534 acres, is Government *noabad*, a term which, though literally meaning land cultivated newly, *i.e.*, since 1764, is used to denote not only cultivated lands, but even hills, rivers, roads, &c., which were not included in one or other of the estates according to the measurement of 1764. The survey and settlement of 1764, by measuring and recording plot by plot the lands belonging to each estate, precluded the proprietor from claiming at any subsequent date, as included in his estate, any land which was not so recorded. With the exception of the Jainagar estate, no land was measured as *noabad* in 1764.

Noabad defined.

2. Settlement of 1848.

6. There were partial surveys in 1770, in 1772, in 1782, in 1788-89, in 1800-1801, and in 1818-20. In 1836 a general survey of the district was undertaken with a view—

(1) to mark off and settle with the Ghosals the Jainagar *noabad* lands measured in 1764 as their property;

(2) to define the limits of permanently-settled estates;

(3) to separate and assess the *noabad* land; and

(4) to ascertain and define all rent-free holdings, valid and invalid, to resume the latter and settle them with the occupant lakhirajdar.

The survey was carried out in 1835-37, and the settlement proceedings were not completed until 1848. This survey, conducted by Mr. Harvey, had been preceded by a revenue survey, on the scale of only four inches to the mile. Under the system of settlement followed up to 1838, the revenue of each *noabad* taluk was practically settled in perpetuity, subject to a periodical remeasurement and assessment of new cultivation at the rate of Rs. 16 per drone (about 13¾ annas per Bengal bigha, or Rs. 2-8 per acre, a drone being equivalent to 6·335 acres); but thenceforth temporary settlements for terms of years became the invariable rule, and the rate of Rs. 16 per drone of cultivated area was not regarded as being a maximum rate. During this settlement, the *noabad* land was separated from each *taraf* taluk, and the lands so separated were formed into a *noabad* taluk, settlement being offered to the proprietor of the *taraf*. As each *taraf* consisted of many taluks, this action led to the creation of several thousands of *noabad* taluks. In the surveys of 1764 and 1837, each field was described both by its boundaries and by its dimensions. As the dimensions were persistently understated in the chitta or field-book, the true area of a field measured according to its boundaries exceeded the nominal area according to these dimensions, and this excess area is called the *gunjais* of that field. Mr. Harvey's procedure in dealing with the *gunjais* was to call upon the proprietors and their tenants to point out the lands of the permanently-settled estates, and, after giving an allowance of one-eighth, to record all surplus land as *noabad*, and assess it accordingly.

Gunjais land defined.

Thus, by Mr. Harvey's survey of 1837, not only was a very large number of small taluks created out of the *noabad* land cleared by the talukdars since 1764, but innumerable petty strips and patches of land were, by being treated as *gunjais*, separated from the taluks and assessed as separate *noabad* taluks. Hence it is that now strips and patches of *noabad* land are found intermingled in all directions with plots of permanently-settled estates. Sir Henry Ricketts, the Commissioner, who had been specially invested with the powers of the Board of Revenue, revised Mr. Harvey's proceedings by making allowances (called *taufir*), varying from one-eighth to one-fourth of the area of each *taraf* or permanently-settled estate, from which excess land had been separated and recorded as *noabad* by Mr. Harvey: but the area eventually relinquished as *taufir* to the tarafdars was small. During the 1848 settlement, no record of the rights of tenants subordinate to the *noabad* talukdars was made. Taluks containing large areas of culturable waste, which numbered 1,280, were settled for twenty-five years only, and were known as "short-term" taluks, while ordinary taluks, numbering 30,978, were settled for fifty years, and were known as "long-term" taluks. The following statement compares the results of the 1764 and 1848 settlements:—

Class of Estate.	According to 1764 Settlement.					According to 1848 Settlement.				
	Number of estates or taluks.	Area in acres.			Assessment.	Number of estates.	Area in acres.			Assessment.
		Cultivated.	Uncultivated.	Total.			Cultivated.	Uncultivated.	Total.	
					Rs.					Rs.
Tarafs	3,381	213,124	64,032	267,156	4,95,275	3,320	226,205	41,809	268,014	4,82,941

Total ...	28,225	312,768	77,514	390,282	5,01,146	103,496	461,136	391,062	852,198	8,09,738

* A doubtful figure.

7. On the expiry of their settlement, the 1,280 short-term taluks were resettled by Mr. Fasson during 1875–82 for a period extending up to 1898, the year in which the term of settlement of the long-term taluks was then thought also to expire. The system

3. Settlement of 1882.

of measurement with a bamboo pole gave way in 1875 to a scientific system of survey; and *noabad* uncultivated land was assessed for the first time in that year. The rent to be paid by the talukdar was reckoned at 80 per cent. of the gross rental paid to him by his raiyats; and if any talukdar refused settlement, his taluk was converted into an *ijara* or farm, and settled with whomever the Settlement Officer thought fit. At this resettlement the *noabad* unassessed lands of the 1848 settlement, as well as all estates which had been bought in by Government for arrears of revenue from time to time, were also measured and settled with the actual raiyats in occupation. These *jotes* were assessed in precisely the same manner as the raiyati holdings under the short-term talukdars, the only difference being that the former can pay rent direct to the local khas tehsil office. There are 39,547 *ijaras* and jotes in the district. The average area of the jotes was only 1¾ acres, and the average rent less than Rs. 4. The arrears of *ijaras* and jotes are recoverable under the Public Demands Recovery Act. An ijaradar was given no claim to resettlement at the expiry of the term of his settlement. In this settlement the taluks were assessed for the first time on the basis of a rent-roll, and the practice of protecting the occupancy raiyats' rents during the currency of the settlement was introduced.

Introduction of the khas tahsil system.

In 1882 the present khas tahsil system was introduced. Under it all the *noabad* lands are distributed into five Government estates, in each of which a khas tahsildar resides, collects the revenue and maintains a subsidiary Land Register A of the *noabad* taluks within his estates, and the demand registers of the *ijaras* and *jotes*, and records mutations.

The present settlement.

8. In 1877 a proposal was made for a general cadastral survey of the district, to enable the position of each plot of the 1848 survey to be identified with accuracy, and to assess excess areas encroached upon by holders of permanently-settled estates and of the fifty-year unexpired taluks; and in 1878-79 an experimental survey of thana Chakaria was made as a preliminary to the general survey. It was, however, ultimately decided that the proposal to survey the district should stand over until 1890. The leases of the long-term *noabad* taluks began to expire in 1892, and all were to become liable to resettlement by 1898, which was also the date of expiry of all the settlements and resettlements effected by Mr. Fasson in 1875–82. In the meantime the leases in the Ramu thana of the Cox's Bazar subdivision having expired in 1886, operations were started in that thana in November 1888. These comprised (*a*) a survey of the boundaries of the permanently-settled estates, (*b*) a cadastral survey of all the Government *noabad* lands, (*c*) a resettlement of the time-expired *noabad* taluks, and (*d*) a raiyatwari settlement of all Government lands cultivated without lease. The survey was made under the Survey Act V (B.C.) of 1875, and the settlement under Chapter X of the Bengal Tenancy Act. In 1890 it was decided, with the sanction of the Government of India, to undertake a cadastral survey and record-of-rights of the entire district, the main reason for the measure being the general settlement of existing disputes and the removal of causes for future disputes, and the diminution of litigation. The work was placed in the charge of Mr. F. A. Slacke, I.C.S., who was appointed Settlement Officer in January 1890.

Mr. C. G. H. Allen, I.C.S., joined as an Assistant Settlement Officer in March 1891, and in July 1892 took charge of the settlement from Mr. Slacke.

Demarcation.

9. The boundary of each village was traversed on the 16″ scale by a survey party, which was at first under the control of Mr. F. Grant, Deputy Superintendent of Survey, and afterwards under Mr. W. T. O'Sullivan, Assistant Superintendent.

Cadastral survey.

The cadastral survey, which was done entirely by the Survey Department, was commenced in the season 1889-90 and completed by June 1893, with the exception of the following areas, amounting to 489 square miles, which had been exempted from detailed survey, viz., the waste land freehold lots under tea cultivation, the permanently-settled portion of the Moiskhal islands, and certain hills covered with jungle, including the Ramgarh-Sitakund reserved forest, and extensive

jungles in the Cox's Bazar subdivision. The area surveyed cadastrally amounts to 2,002·88 square miles.

Record-writing.

Record-writing first commenced under the supervision of the Survey Department. Owing, however, to the inability to procure suitable amins conversant with the local dialect, the work of writing up the records was not performed by the men who did the actual measuring, but by a separate staff.

After some time, on account of the very great intricacy of the tenures, and the extremely puzzling manner in which the lands of different estates and tenures were interlaced, it was found that the records thus prepared were too inaccurate for attestation purposes. Accordingly the supervision was transferred to the Settlement Officer in May 1891. The whole system of writing the record, including khanapuri, khatian-writing and attestation, was worked out by Mr. Slacke, and his methods were followed throughout. The complicated nature of the work would have been made more apparent to those unacquainted with the district had a copy of a portion of the survey map of a typical village been given showing on each plot by reference numbers the estate or *noabad* taluk to which it belonged; but some idea of the intricacy of the subject can be gathered from paragraph 306 of the report. The plains portion of the district, comprising 1,206·74 square miles, has been measured in no less than 2,413,688 plots, which give an average number of 3·1 plots to the acre and only 15 plots to each estate or tenure.

Attestation and *mahal milan*.

The attestation of the district was completed, except in a few villages, in May 1894. After attestation the next process was the very difficult one of *mahal milan*, which had as its object the adjustment of the surveyed area of each of the estates and tenures of the district with its area according to the preceding survey, and to account for missing estates. This work was very onerous and involved no less than 187, 3?3 cases (paragraph 326). Identification of the survey plots of the 1837 survey, commonly known, after the local era, as the 1200 Maghi survey, was only done in 24 villages in thana Ramu during the season 1888-89, after which it was abandoned, owing to its being often impracticable and not generally necessary, and it was decided that the old survey plots should only be identified in exceptional cases at the discretion of the Settlement Officer. In 1895 orders were issued not to separate excess lands from permanently-settled estates, unless an identification, where possible, of the 1837 survey plots showed that *noabad* lands had been wrongly measured as included in the estate. Owing to the extensive under-measurements at the last survey, which resulted in the large *gunjais* or excess areas, the area of almost every estate has been found to exceed the area recorded in the last survey. As to separation of excess areas from permanently-settled estates, the matter was left to the discretion of the Settlement Officer, and it was decided to give a taluki settlement of such areas. With reference to *noabad* taluks, it was decided not to cut off—

Treatment of excess lands.

(*a*) excess waste from a taluk, unless it was large enough to make a good-sized block of itself, or was required for inclusion in a Government forest; or

(*b*) excess cultivated area, unless where it was large, and where a good-sized new block could be created out of it. Where the waste and excess cultivated areas were not so treated, it was directed that they should be included within the taluk and settled accordingly.

Assessment.

10. The next stage, viz. assessment, comprised the resettlement of all the *noabad* taluks, ijaras and jotes in the district, and the settlement of all occupied *noabad* lands which had not hitherto been settled. In October 1891, Sir Charles Elliott directed the preparation of soil maps and the ascertainment of prevailing rates as a basis of assessment; but this was discontinued in September 1893, after 649 villages, with an area of 820 square miles, had been mapped. It was decided to ascertain the existing rents paid by the raiyats to the talukdars, and after allowing a percentage to the talukdars, to fix the balance as the revenue payable to Government. Fair rents were judicially settled not only for

each talukdar but for every tenant also under the talukdars. The talukdars of the *noabad* lands have been treated as tenure-holders under Government within the meaning of the Bengal Tenancy Act, and if an under-tenure-holder intervened between the talukdar and the raiyats, the allowance upon the gross rents was to be divided between the talukdar and the under-tenure-holder. Though 30 per cent. has been treated as the rate of allowance ordinarily to be given, there has been no limit to the increase of this rate in cases in which a strict adherence to it would have caused hardship. The allowance given to each talukdar was fixed with reference to—

(*a*) The cost of collection, including estimated expenses of litigation.
(*b*) Profits.
(*c*) Upkeep of embankments.

The big dykes are either built and maintained by Government or by some large landowner. Where the tenants make their own embankments, a deduction of from Rs. 4 to Rs. 6 per *drone*, say from 10 to 15 annas an acre, is commonly made from their rents on this account, the amount being stipulated for in their leases. Except in cases of petty rents, the new rent settled was not, save in the form of a progressive rent, to exceed the old rent by more than 100 per cent. When it appeared to be fair to take by progressive enhancement a larger increase than 100 per cent., any increase above 100 per cent. up to 200 per cent. was to come into effect from the sixth year after final publication of the record, and any increase above 200 per cent. up to 300 per cent. from the eleventh year. The rate of enhancement was never, except in petty taluks, to exceed 200 per cent. After the draft publication, 27,030 cases were disposed of, in addition to a vast number of objections instituted before draft publication and miscellaneous and *mahal milan* enquiries, the total number of which was 400,952. Assessment was finally completed in February 1898 and final publication in July 1898.

Case-work.

11. The number and area of the different classes of estates according to the present settlement are exhibited in the following statement:—

	Class of estates.	Number.	Area in acres.		
			Cultivated and homestead.	Uncultivated.	Total.
I. Permanently-settled.	(*a*) Taraf (revenue-paying)	4,071	227,279	51,363	278,642
	(*b*) Resumed lakhiraj ...	24,461	58,597	12.460	71,057

Rent-free holders	11,143	5,786	·51	......	......	
Under-raiyats	58,897	30,977	·52	2,02,443	6 8 6	
Total ...	525,339	326,507	·62	17,38,221	5 5 2	

With regard to this table it must be remembered that each holding does not represent the whole of the land cultivated by an individual, as he will have holdings not only in various taluks, but also in different estates.

The subjoined table gives particulars of the temporarily-settled lands held by each class of tenants, with the aggregate rents settled and the average rent rates :—

CLASS OF TENANT.	AREA IN ACRES.			Former rent.	New rent.	Former rate per acre of cultivated and homestead land.	New rate per acre of cultivated and homestead area.
	Cultivated and homestead.	Uncultivated.	Total.				
				Rs.	Rs.	Rs. A. P.	Rs. A. P.
Talukdars (tenure-holders) ..	131,646	81,274	212,920	2,25,089	3,74,653	2 0 0	2 13 0
Ijaradars (") ...	10,744	9,042	19,786	25,869	28,013	1 12 0	2 9 0
Under-tenure-holders	37,938	10,924	48,862	1,01,731	1,35,615	3 4 0	3 9 0
Settled raiyats	116,864	77,610	194,474	4,98,458	5,85,125	4 14 0	5 0 0
Occupancy "	13,775	2,462	16,237	40,463	43,384	2 15 0	3 2 0
Non-occupancy "	15,535	6,303	21,838	2,847	43,604	2 11 0	2 12 0
Under-raiyats	22,630	3,465	26,095	1,18,154	1,29,675	5 8 0	5 13 0

The increase in the rate of rent paid by the settled raiyats, who are the predominant class of actual cultivators, is very small, being from a previous average of Rs. 4-14 an acre to Rs. 5.

12. The following statement shows the effect of the assessment upon the Government revenue :—

Effect of assessment upon Government revenue.

CLASS OF MAHAL.	Number.	Former rent.	New rent.	Increase.	Decrease.	Net increase.	Percentage of increase.
1	2	3	4	5	6	7	8
		Rs.	Rs.	Rs.	Rs.	Rs.	
Long-term taluks ...	32,601	1,64,854	2,86,353	1,21,962	463	1,21,499	73
Short-term " ...	1,873	60,235	74,479	14,256	12	14,214	23·6
Newly-settled " ...	192	......	13,801	13,801	......	13,801	......
Ijaras	487	25,369	28,013	3,405	761	2,644	10
Previously-settled jotes	39,060	1,34,752	1,54,849	20,327	230	20,097	15
Newly-settled "	6,345	......	43,042	43,042	......	43,042	......
Total ...	80,558	3,85,210	6,00,537	2,16,703	1,466	2,15,327	56

The most important classes holding direct from Government, for whom revenue was settled, were the long-term talukdars, and the jotedars or Government raiyats. The total area of these taluks as measured in the present survey is 152,100 acres, of which the talukdars have leased to raiyats 65,468 acres, and to

under-tenure-holders 40,259 acres, while they themselves hold 46,373 acres. Rupees 16 per drone, which is equivalent to Rs. 2-8 per acre, was the standard rate at the 1848 settlement; the incidence of the new rents works out to Rs. 2-14-2 per acre. The gross rents of the under-tenures, and not the rents payable by the under-tenure-holders to the talukdars, were reckoned as the gross assets of the taluks. The gross assets of the long-term taluks were settled at Rs. 4,86,031, out of which Rs. 1,99,678 were left as profit to the *talukdars* and their under-tenure-holders, Government taking the balance, Rs. 2,86,353, or 59 per cent. of the whole as revenue. The increase of 73 per cent. in the revenue of these taluks is due to the extent of about one fourth to the considerable extension of cultivation since the settlement of 1848, amounting to 15,784 acres, or nearly 19 per cent.; and there has been at the same time an increase of nearly 250 per cent. in the price of rice. So that the rate of enhancement actually obtained is very much less than what might have been claimed on the basis of a rise in prices. After deducting the profit assigned to the under-tenure-holders, the allowance granted to the talukdars amounted to 35 per cent. on their net receipts. Of the total increase of revenue of the long-term taluks, amounting to Rs. 1,21,499, Rs. 27,237 is progressively realizable. The full enhancement due to the new settlement will not therefore be realizable until 1918-19. The 39,060 jotes settled have yielded an increase of 15 per cent., almost the whole of which is due to increase in area. As to short-term taluks, most of which had been resettled during 1875–82, the increase in revenue amounted to 23·6 per cent. Most of these taluks had been settled by Mr. Fasson, who did not, however, ascertain the existing rents of the raiyats, which has now been done, but fixed arbitrary rates and these were found in very many cases to have been ignored. The rents of 156,766 settled raiyats were raised from Rs. 4,98,458 to Rs. 5,85,125, or by 17 per cent., and the enhancement affected only 29 per cent. of those raiyats. Two-thirds of all the tenants whose rents were enhanced appeared and accepted the rents settled as fair, only 1 per cent. appeared and objected and 33 per cent. did not take the trouble to appear and so may be taken to have accepted the rents fixed. This result is most praiseworthy to the Settlement Officer, when it is remembered that a notice was served on each informing him of the precise sum which it was proposed to add to his rent and the grounds of the proposed addition. Taking raiyats as a whole, the enhancement of their rent amounted to Rs. 1,34,791, of which Rs. 1,21,821, or 90 per cent., was due to increase of cultivated area, the other causes being the assessments of raiyats who paid no rent, or whose existing rents could not be ascertained. The Lieutenant-Governor is glad to see that the Settlement Officer has recognized the importance of reducing the enormous number of jotes in the registers by amalgamating, wherever possible, the jotes held by one tenant in a village.

Apart from the disastrous effects of the cyclonic storm-wave of October 1897 and subsequent bad crops, there has been no difficulty experienced in collecting the new revenue.

13. In Ramu the records were finally published before the 12th April 1894, so that the new rents there were collected with effect from 1894-95. One complete copy of the *khatian terij* and plot index was made for the Collector's record-room, and a complete copy of the same records of the *noabad* lands only has been made for the use of the khas tahsildars. In permanently-settled estates the rents of only 85 tenants were, on the application of the proprietors, enhanced from Rs. 682 to Rs. 1,050. The term of settlement of the Ramu taluks was fixed to run up to 1924, and of those in the rest of the district until 1925 A.D.

Term of settlement.

14. The total cost of the survey and settlement has been Rs. 16,16,604, the acreage rates being 5 annas and 4 pies for survey and 13 annas and 9 pies for settlement, or Re. 1-3-1 per acre for both survey and settlement. This high cost was due to—

Cost of operations.

(1) the natural difficulties of preparing the record-of-rights in consequence of (*a*) the minute size of the fields (*b*) the intermingling of plots of different estates, and (*c*) the people themselves who gave but little help in identifying the estate or taluk to which each field belonged;

(2) the enormous labour and cost involved in the investigation of the objections which were perpetually raised during the assessment of rents, impugning the correctness of the record on the alleged ground that lands which were being assessed as temporarily-settled were, in fact, permanently-settled, and not liable to re-settlement;

(3) the ineffective procedure for the settlement of rents adopted before the introduction of the rules on the subject, under the Bengal Tenancy Act, in June 1894.

(4) the scheme for the preparation of soil maps which had eventually to be abandoned.

Looking to the difficulties and the intricacy of the work and the results attained, the cost does not seem to be excessive.

A sum of Rs. 2,02,005, representing one-half of the net cost of the survey and record-of-rights, is to be recovered by apportionment from the landlords and tenants of the permanently-settled estates under the order of the Government of India. The net cost of the operations, after making deductions on account of such recoveries, receipts from court-fees, &c., is Rs. 13,68,317; the increase of Rs. 2,15,327 in the annual revenue therefore represents interest at the rate of 15·7 per cent. on that sum.

Maintenance of records.

15. The question of the maintenance of the records in Chittagong has been a matter of separate correspondence with the Government of India.

16. The Board have directed the attention of the Commissioner and Collector to the remarks in paragraphs 521 and 522 of the report as to the use to be made of the records in the administration of the district.

17. The settlement has been made with great care, and the results obtained are satisfactory. The Lieutenant-Governor hopes that the proceedings, which have now been brought to a successful close, will receive the sanction of the Government of India.

Merits of officers.

18. To Mr. Allen, who for seven years was intimately associated with these intricate operations and who brought to a successful conclusion a task which Sir Charles Elliott believed to be well-nigh impossible, the thanks of Government are gladly given, and the Lieutenant-Governor endorses the Director of Land Records' remarks concerning Mr. Allen's report, a large portion of which had to be written while Mr. Allen was in charge of the district of the 24-Parganas. Mr. Finucane, Mr. Macpherson, and Mr. Lyon, successively Directors of Land Records, efficiently supervised the settlement.

Of the Assistant Settlement Officers who deserve commendation, the foremost was Mr. C. J. Stevenson-Moore, I.C.S., who assessed the whole of the Cox's Bazar subdivision, with the exception of Ramu, the others being the late Babu Durga Charan Ghose, and Babus Romesh Chandra Das, Jogendra Coomar Bose, Sarat Chandra Das, Sosi Mohan Talukdar, Hari Pada Ghose, and Annada Charan Das.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL ADMINISTRATION REPORT OF THE OPIUM DEPARTMENT FOR 1900-1901.

REVENUE DEPARTMENT—OPIUM.

Calcutta, the 25th March 1902.

RESOLUTION—No. 1937.

READ—

The Report on the Annual Administration of the Opium Department for the year 1900-1901 (1st September 1900 to 31st August 1901).

IN the Resolution recorded last year on the Board's Report on the administration of the Opium Department, it was noticed that the Report had been considerably curtailed and improved. The Board have been able to effect a further reduction, both in the length of the letter-press and in the statements attached to their present interesting and generally concise Report. Some condensation in the treatment of the subjects of settlements, cultivation and competition of other crops, which are dealt with in paragraphs 9 to 14, 18, 20 and 47 of the present report, can perhaps be effected in future Reports.

Under the head of tours made by the Agents and their subordinates, the Lieutenant-Governor specially notices the useful inspections made by the Hon'ble Mr. Bolton, the Member in charge, and by Mr. Baillie, Opium Agent of Benares. It is desirable that the tours of the Opium Agent in Bihar should be more prolonged. The larger number of centres or subdivisions in the Benares Agency accounts to some extent for the larger average number of days shown as spent on tour by subordinate officers in that Agency as compared with the Bihar Agency, but does not account for shortcomings of individual officers, which are noticed by the Board. The Lieutenant-Governor attaches much value to days properly spent in camp; the more the officers of the department bring themselves into touch with the actual cultivator, the more successful will they be in spreading the popularity of the cultivation and in defeating attempts to take settlements without any intention to cultivate.

2. The year under review shows a general decrease in both Agencies of the areas which the raiyats engaged to cultivate. The long-term settlements in the Tirhut Sub-Agency were taken advantage of to obtain loans free of interest, and the abolition of them resulted, as was anticipated last year, in a very considerable decrease in the area engaged for. The decrease in other Sub-Agencies, except in Cawnpore, is not ascribed to any want of energy on the part of the officers in charge of the Sub-Agencies, but is due especially to the poor yields of recent unfavourable seasons, and the substitution of less speculative crops. Under the high prices which have prevailed, wheat has proved nearly as remunerative and the tillage is much less laborious. Ill-luck appears to have attended the experiment to grow opium as an auxiliary crop to indigo, but it is trusted that this will not debar further experiment.

The Lieutenant-Governor endorses the remarks of Mr. Baillie, quoted by the Board, that it is essential to the security of cultivation that engagements should be made directly with the cultivators to the fullest extent practicable, and he observes with pleasure the success obtained in this direction in the districts of the Basti Division. He will await with interest the result of the measures taken to secure an extension of cultivation in Darbhanga, Moradabad, Bijnor and Saharanpur.

3. The season was again an unfavourable one in both Agencies. Excessive rain in January injured the young plant, and a severe storm of hail in March caused much damage, with the result that the average outturn per bigha fell by some 6 and 3 chitaks in Bihar and Benares, respectively. The exceptional run of ill-luck, that has for the last few seasons pursued the cultivation of poppy, has necessarily made it an unpopular crop with the cultivator. The Opium Agents point out that the revival of sugar cultivation, if successful, is likely to still further affect the cultivation of opium.

4. The Lieutenant-Governor is glad to observe that there was a considerable increase in the amount advanced in the Benares Agency for the construction

of wells. The new rules for advances for wells do not appear to have been sufficiently long in force to have reached their full effect; all officers should do their utmost to popularise such advances and to deal promptly with all applications received.

5. The unfavourable climatic conditions already noticed resulted in the delivery of opium of a very low consistence, and the Factory Superintendents are congratulated on their successful efforts to overcome the consequent difficulties in manufacture and to avoid financial loss. It is also satisfactory that further economies have been effected in the cost of the manufacture of chests.

6. Owing to the bad season, the total outturn of provision opium fell short of the standard of 48,000 chests. There was, however, a reserve of 21,846 chests on the 1st of January 1902. This will therefore meet the requirements of the coming year, and leave a reserve of 18,303 chests of provision opium at the beginning of next year. The prices obtained for opium at the Calcutta sales, which rose at the time of the disturbances in China on account of the diminution of cultivation in China, began to fall as quiet in China was restored.

7. Since the submission of the Report, orders have issued for the re-erection of the opium godown at Arrah. The Lieutenant-Governor agrees that the establishment of new centres in Bihar is a matter of great importance, especially in view of the extension of the alternative system of engagement for cultivation and the necessity of bringing the cultivator into ready and personal contact with the officers of the department.

8. It is hoped that the question of the utilisation of the survey maps and settlement records in Bihar and of the patwari agency for measurement in the Benares Agency will be settled during the coming year.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 24th March 1902.

Burdwan.—Rainfall at Sadar 0·70, Kalna 1·21, Katwa 2·04, Raniganj 1·23. Weather seasonable. Harvesting of *rabi* continues. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kalna	11	12	
Katwa	13	2	
Raniganj	12	8	

Birbhum.—Rainfall at Sadar 2·10, Rampur Hât 0·97. Weather cloudy. Pressing of sugarcane and harvesting of *rabi* crops going on. Price of rice both at Sadar and Rampur Hât is 12¾ seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar 0·11, Vishnupur ·96. Weather cooler on account of rain. Pressing of sugarcane and harvesting of *rabi* still going on. Fodder and water sufficient. Price of common rice at Bankura is 15 seers and at Vishnupur 14 seers per rupee.

Midnapore.—Rainfall at Sadar 0·03, Tamluk 0·9, Ghatal 0·11. *Boro* still being transplanted in Ghatal subdivision. No want of fodder or water. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ghatal	13	0	
Tamluk	12	12	
Contai	14	11	

Hooghly.—Slight rain fell. Weather seasonable. Water and fodder sufficient. Common rice sells at 10 seers 14 chittaks per rupee.

Howrah.—Rainfall at Sadar nil, Ulubaria 0·07. Weather cooler. Lands are being ploughed for *aus* and jute crops.. Condition of cattle good. Fodder and water sufficient. Common rice sells at Sadar at 9 seers 6 chittaks and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 0·48, Barasat 0·10, Basirhat 0·12, Diamond Harbour 0·05. Weather hot and cloudy towards the close of the week. Prospects fair. Lands are being prepared. A few cases of cattle-disease reported from thana Basirhat. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Barasat	12	0	
Basirhat	12	4	
Diamond Harbour	12	0	

Nadia.—Rainfall at Sadar 0·36, Kushtia 1·27, Meherpur 1·61, Ranaghat 0·45, Chuadanga return not received. Cultivation of lands for early rice going on. Harvesting of *rabi* still continues. Prospects of standing crops good. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 1·82, Kandi 0·84, Lalbagh ·01, Jangipur 0·05. Weather seasonable. *Rabi* crops are being harvested. Prospects favourable. Pressing of sugarcane commenced. Preparation of *bhadoi* lands is going on. Cattle-disease reported from outpost Panchgrâm of Lalbagh subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Lalbagh	11	14	
Jangipur	13	0	
Kandi	14	2	

Jessore.—Rainfall at Sadar 0·44, Jhenida 3·88, Magura 0·92, Narail 1·08, Bangaon 1·13. Weather seasonable. Prospects of crops fair. Harvesting of *rabi* crops continues. Cultivation of land for *aus* crop is commenced. The recent rain has done much good to cultivation. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Jhenida	12	12	
Magura	12	0	
Narail	12	0	
Bangaon	12	0	

Khulna.—Rainfall at Sadar 0·15, Bagerhat 0·06, Satkhira 0·68. Weather—Day hot, night cool. Prospects of *boro* continue favourable. More rain wanted. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	4	per rupee.
Bagerhat	13	0	
Satkhira	11	8	

Rajshahi.—Rainfall at Sadar ·89, Nator ·42, Naogaon ·21. Prospects of crops good. Harvesting of *rabi* crops continues. Cattle-pox reported from Nator and Lalpur thanas. Fodder and water plentiful. Common rice sells at 12 seers a rupee.

Dinajpur.—Average rainfall 2·0. Weather seasonable. Standing crops fair. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers on an average.

Jalpaiguri.—Rainfall 1·07. Weather seasonable. Fields for *bhadoi* and jute are being prepared. Common rice sells at 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 2·02, Siliguri 0·32. Weather seasonable. *Hills*—Wheat and barley progressing. Maize and potatoes are being sown. *Terai*—Ploughing for *bhadoi*, jute, and sugarcane going on. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Maize sells at Darjeeling at 18 seers and at Kalimpong at 30 seers per rupee.

Rangpur.—Rainfall at Sadar 2·25, Gaibanda 1·81, Nilphamari 1·69, Kurigram 4·19. Weather seasonable. Rain did good for cultivation of lands for *bhadoi* and jute. Fodder and water sufficient. Common rice sells at 12 seers per rupee throughout the district.

Bogra.—Average rainfall ·95. Lands being still cultivated for *aus*, jute, and sugarcane. Prospects good. Fodder and water sufficient. Common rice sells at 12 seers 9 chittaks a rupee.

Pabna.—Rainfall at Sadar 1·00, Serajganj 0·47. Weather partially cloudy and rainy. Prospects of crops good. Rain has facilitated agricultural operations. Prices unchanged.

Dacca.—Rainfall at Sadar 1·37, Munshiganj 1·32, Narainganj 1·39, Manikganj not received. Weather seasonable. Prospects of crops fair. No cattle-disease. Fodder available. Common rice sells at 11½ seers per rupee.

Mymensingh.—Rainfall at Sadar 0·57, Kishorganj 0·61, Netrokona 0·52, Tangail, 0·23. Weather seasonable. More rain needed for *boro* crop. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishorganj	12	8	
Jamalpur	12	4	
Netrokona	13	2	
Tangail	Not stated.		

Faridpur.—Rainfall at Sadar 1·00, Goalundo 0·11, Madaripur report not received. Weather seasonable. Prospects of crops good. Common rice sells at 12 seers a rupee.

Backergunge.—Rainfall at Sadar 0·18. Weather seasonable. Prospects of crops good. Cattle-disease reported from outpost Rajapur. Common rice averages 12 seers per rupee.

Tippera.—Rainfall at Sadar ·76, Brahmanbaria 1·14, Chandpur 1·47. Weather seasonable. Prospects of crops good. Harvesting of *rabi* going on. Fodder and water sufficient. Cattle-disease continuing at Chandpur. Average price of rice 12½ seers per rupee.

Noakhali.—Rainfall at Sadar 0·24, Feni nil. Prospects of crops fair. Cultivation of land for *aus* continues. Cattle-disease reported from two thanas. Fodder and water sufficient. Prices stationary.

Chittagong.—Rainfall at Sadar 0·09, Cox's Bazar nil. *Rabi* crop is being reaped. Water and fodder sufficient. Cattle-disease still prevalent in parts of the district. Common rice selling at 15 seers per rupee.

Patna.—Rainfall at Barh 0·08, Bihar 0·12. Weather getting hot. Harvesting of *rabi*, extraction of opium, and sugarcane planting going on. No cattle-disease. Fodder and water for cattle sufficient. Common rice sells as follows:—

	Srs. ch.	
Patna	12 0	per rupee.
Dinapore	Not stated.	
Barh	12 8	
Bihar	11 0	

Gaya.—Rainfall at Aurangabad 1·64. Harvesting of *rabi* continues. Collecting of opium finished. Common rice selling at 12 seers per rupee.

Shahabad.—Rainfall at Sasaram 0·21, Dehri 0·05. Weather hot and cloudy at intervals. Harvesting of *rabi* continues. No cattle-disease. Fodder and water sufficient. Rice sells at Sadar at 13 seers per rupee.

Saran.—Rainfall at Sadar 0·15, Sewan 0·08, Gopalganj 0·33. Weather cloudy and unsettled with high east wind. Harvesting of *rabi* crops proceeding. *Rabi* damaged to some extent by hail in some places. Pressing of sugarcane nearly finished. Fodder and water sufficient. Common rice sells at 12 seers 5 chittaks and maize at 23 seers 2 chittaks per rupee.

Champaran.—Rainfall at Sadar 2·06, Bettiah 2·15. The rain has caused some damage to *rabi* crops, but has facilitated preparation of lands for *bhadoi*. Cattle-disease reported from some police-stations. Fodder and water sufficient. Prices of common rice and maize at Sadar are 12½ and 23½ seers per rupee respectively.

Muzaffarpur.—Rainfall at Sadar ·80, Hajipur ·27, Sitamarhi 3·14. Harvesting of *rabi* crops continues. Prospects fair. Slight damage done by rain and hail to the mango. Prices are—Common rice 12 seers, wheat 12½ seers, barley 18½ seers, maize 22 seers, gram 18 seers, *arhar* 19½ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall at Sadar 1·62, Samastipur 0·17, Madhubani 0·85. Harvesting of *rabi* continues. Rain, though slight, is beneficial for cultivation. Fodder and water sufficient. Cattle-disease is reported from Jhanjharpur and Benipatti. Common rice sells as follows:—

	Srs. ch.	
Sadar	12 0	per rupee.
Samastipur	11 0	
Madhubani	12 11	

Monghyr.—Rainfall at Sadar 0·78, Begusarai nil, Jamui nil. Weather cloudy with easterly wind. Harvesting of *rabi* crops continues. Lancing of poppy nearly finished. Common rice sells as follows:—

	Srs. ch.	
Sadar	12 6	per rupee.
Begusarai	12 0	
Jamui	12 0	

Bhagalpur.—Rainfall at Sadar 0·55, Banka 0·32, Madhipura 0·80, Supaul 0·40. Weather cloudy at times. Preparation for next crops in progress. The last rainfall will damage mango, *mahua* and *rabi* crops now ripe. Harvesting of wheat commenced in places. Fodder and water sufficient. Stray cases of cattle-disease reported from Banka and Supaul. Common rice sells as follows:—

	Srs. ch.	
Sadar	12 10	per rupee.
Banka	13 2	
Madhipura	11 0	
Supaul	14 0	

Purnea.—Rainfall at Sadar 1·33, Kishanganj 0·72, Araria 0·80. Weather cloudy with easterly wind. Recent rain facilitated work of ploughing for jute and *bhadoi* crops. More rain wanted. Harvesting of *rabi* crops going on. Sporadic cases of cattle-disease reported from Araria subdivision. Fodder available. Common rice sells as follows:—

	Srs. ch.	
Sadar	11 0	per rupee.
Kishanganj	10 8	
Araria	12 0	

Malda.—Rainfall at Sadar 1·13, Gajol ·42. Weather becoming hot. Recent rain has done good to standing crops. Lands are being prepared for *bhadoi* paddy. Wheat, barley, gram and tobacco are being gathered. No cattle-disease. Fodder and water sufficient. Price of common rice stationary.

Sonthal Parganas.—Average rainfall 0·46. Weather cloudy with easterly high winds occasionally. *Rabi* harvesting continues. *Mahua* somewhat damaged by rain and hail. Prospects of mango favourable. Fodder and water getting insufficient. Rinderpest reported from Pakour and Moheshpur thanas. Average price of rice 13 seers 2 chittaks and of maize 21 seers per rupee.

Cuttack.—Rainfall at Sadar ·04, Jajpur ·06. Weather seasonable. *Dalua* in ears. Tobacco being cut and cotton plucked. *Arhar* and *mung* growing. Condition of cattle generally good. Fodder and water available. Common rice sells as follows :—

				Srs.	ch.	
Sadar	...	...	...	14	12	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	17	1	
Banki	...	...	...	15	12	

Balasore.—Rainfall at Sadar ·80, beneficial to standing crops. Paddy-threshing and sugarcane-pressing continue. *Dalua* and cotton doing well. Cattle-disease reported from Bhadrak, Kamarda, Turigaria, Dolesahi, Agarpara, and Dhamnagar Circles. Rice sells at 16½, 15, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Sadar 0·05, Tikerpara 1·85, Bissipara 0·07. Weather hot and cloudy. Cattle-disease reported from the interior. Fodder available. Common rice sells as follows :—

				Srs.	ch.	
Sadar	...	...	...	12	8	per rupee.
Khondmals	...	...	...	13	8	
Interior	...	...	...	15	0	

Puri.—Rainfall nil. Weather seasonable. Ploughing of lands for ensuing *sarad* paddy and sugarcane continues. *Dalua* paddy and *mung* ripening in some places. Other miscellaneous crops doing well. Fodder and water-supply sufficient. Price of rice stationary.

Hazaribagh.—Rainfall at Sadar 0·23, Giridih 0·74. Weather seasonable. Prospects of *mahua* and mango good. Fodder and water sufficient. Common rice sells at Sadar at 12¾ seers and at Giridih at 12½ seers per rupee.

Ranchi.—Rainfall 1·15. Weather seasonable. Ploughing continues. Average price of common rice is 15 seers per rupee. Cattle-disease (diarrhœa, foot and mouth disease) reported from 10 thanas. Fodder and water sufficient.

Palamau.—Rainfall 0·04. Weather hot. *Rabi* being harvested. *Mahua* prospects good. Cattle-disease continues. Fodder and water still sufficient. Prices at Sadar—Rice 12 seers 6 chittaks and *makai* 20¼ seers per rupee.

Manbhum.—Rainfall at Sadar ·70, Gobindpur ·27. Weather seasonable. Prospects of crops on ground good. Fodder and water sufficient. Cattle-disease reported from thanas Jhalda, Purulia, Para, Manbazar and Topchanchi. Average price of common rice at Sadar 14 seers 3 chittaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. Reaping of *rabi* crops finished. Average price of rice is 14 seers in the district; at Chaibassa 13 seers.

General Summary.—The rainfall during the week was general and moderately heavy at places. In Bihar it has facilitated the preparation of the lands for *bhadoi* crops, though in some parts slight damage is reported to have been caused by hail. Harvesting of *rabi* continues. Prospects fair. Cattle-disease reported from a few districts. Fodder and water generally sufficient. The price of common rice has risen in 15 districts and fallen in 8.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 25th March 1902.

The total fall from 1st January to 22nd March 1902	1·16
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·57

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; o, overcast; g, gloomy; d, drizzling rain; t, thunder; ∠, lightning; p, passing temporary showers.

	Inches.
The mean pressure of the seven days	29·838
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·776
	Hours.
The total number of hours of bright sunshine	57·9
The maximum possible number of hours of sunshine	85·4
The mean temperature of the seven days	82·7°
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·4
The extreme variation of temperature	32·5
The maximum temperature	99·7
	Miles.
The highest velocity of the wind in one hour	20
	%
The mean relative humidity	67
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	66
	Inches.
The total fall of rain from 23rd to 29th March 1902	0·35
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·20
The total fall from 1st January to 29th March 1902	1·51
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·77

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

p, passing temporary showers; t, thunder; d, drizzling rain; ∠, lightning; ⌓, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 31st March 1902.

RESOLUTION ON THE REPORT ON THE LUNATIC ASYLUMS IN BENGAL FOR THE YEAR 1901.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 2nd April 1902.

RESOLUTION—No. 1652Medl.

READ—

The Returns with notes by the Inspector-General of Civil Hospitals on the Lunatic Asylums in Bengal for the year 1901.

Read also—

The Report on the Lunatic Asylums for the year 1900, and the Resolution recorded by Government upon it.

IN accordance with the recent orders of the Government of India, the Report on Lunatic Asylums will in future be triennial, instead of annual as heretofore, the first triennial report being for the years 1900-1902. In the intervening years only the returns are to be submitted, with such notes as may be necessary. The returns for the year 1901 have been punctually received.

2. The number of lunatics in all the asylums at the commencement of the year was 943. During the year there were 229 admissions and 20 re-admissions, and 122 discharges and 61 deaths. Allowing for these additions

and deductions, the number of inmates in the asylums at the close of the year was 1,009, an increase of 66 on the preceding year, of whom 45 were criminal and 21 non-criminal. The number of criminal lunatics continues to increase, the percentage to the total population in the asylums at the close of the year being 52·93, against 51·85 in 1900.

3. In 50 per cent. of the total admissions during the year it was possible to discover the cause of insanity. This is an improvement on last year when the percentage of ascertained cases was only 35. In three-fourths of the cases in which the cause of insanity was traced, it was found to be physical and chiefly the habitual use of *ganja*. The Lieutenant-Governor regrets to find that there is still very little improvement in the preparation of the medical history sheets of lunatics, and will now await the Inspector-General's suggestions in the matter.

4. The general health of the inmates of asylums showed a marked improvement. The total number of admissions to hospital was 576, against 968 in the previous year, and the death-rate was 6·18 per cent. of the average number of inmates, against 10·67 per cent. in 1900. There were 24 cases of injuries and accidents to lunatics, against 33 in 1900; and most of them were of a trivial nature, and the warders were not to blame. There were no escapes from the asylums during the year.

5. The income from paying patients and the net receipts from manufactures in all the asylums were Rs. 13,702 and Rs. 6,540, respectively, against Rs. 18,017 and Rs. 6,721 in 1900. The falling-off in the former item of receipts is due to fewer admissions of paying patients into the European asylum at Bhawanipur. The total expenditure on all the asylums was Rs. 1,39,516, against Rs. 1,30,775, the increase being chiefly under diet and public works. The system of giving rewards for good behaviour and steady work is being tried with good results.

6. The acknowledgments of Government are due to the several officers who held charge of the asylums during the year for their efficient management of the institutions entrusted to their care.

By order of the Lieutenant-Governor of Bengal,

H. M. KISCH,

Offg. Secretary to the Govt. of Bengal.

RABI CROPS IN BENGAL, 1901-1902.

THE following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 4th April 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the Rabi *Crops of Bengal for 1901-1902.*

Explanatory.—This forecast furnishes estimates of the area and outturn of the *rabi* crops, with the exception of wheat, cotton and oilseeds, for which separate forecasts are issued. The chief crops dealt with in this forecast are barley, gram, other cereals and pulses, summer rice, potatoes, and tobacco.

2. *The character of the season.*—The last monsoon was generally deficient, and terminated early, and consequently sowings were retarded and contracted. Heavy showers at the end of November benefited some districts, but the Christmas rains held off, and the fall in March has come too late to benefit any but the summer rice crop. The Patna Division, in which these crops are most extensively grown, was particularly unfortunate in its weather throughout the season.

3. *Area sown.*—Excluding the area sown with wheat, cotton and oilseeds, the normal area sown with the various *rabi* crops in the Province amounts, according to the district returns which are summarised in Appendix I, to 10, 114,000 acres, this figure having been revised in some districts in the light of fresh surveys and other enquiries. The area actully sown this year with these crops is estimated at 9,048,200 acres, against 9,389,800 acres last year. The decrease is due to drought at the sowing season.

4. *Outturn.*—Seven contiguous districts in Central and Northern Bengal, viz., Mymensingh, Bogra, Rajshahi, Dinajpur, Murshidabad, Malda, and Birbhum, report an average or nearly an average crop. In the Patna Division, however, which contains 3¼ million acres under these crops, the estimate varies from 89 per cent. in irrigated Gaya to only 39 per cent. in Champaran. According to the estimate of the District Officers, the outturn for the Province

as a whole amounts to only 71 per cent. of a normal crop, as compared with a 79 per cent. crop estimated last year. Allowing for the tendency to underestimate, and for the benefit which the summer rice will derive from recent rainfall, it is safe to anticipate a 75 per cent. or a 12-anna crop for the Province as a whole.

5. *Gross outturn of summer rice*.—In Appendix II, I have calculated the total yield of the summer rice crop of the Province, accepting the Provincial outturn as 95 per cent. of a normal crop. It amounts to 3,295,800 cwt., as compared with 3,084,000 cwt., estimated last year.

C. G. H. ALLEN,

Offg. Director of Land Records,

and Agriculture, Bengal.

CALCUTTA;

The 28th March 1902.

APPENDIX I.

Estimate of outturn of rabi crops in Bengal, 1901-1902.

Patna Division—*contd.*										
Saran ...	1,696,087	2,284,000	Barley	260,800	240,000	221,800	105	60	The figures in columns 5 and 6 have been revised according to settlement records. In Gopalganj Subdivision about the normal area is under each crop; but in the Sewan and Chapra Subdivisions, especially the latter, lack of moisture has prevented germination in many cases and in many lands which could not be irrigated crops have withered and come to nothing, and therefore the area in column 7 is shown as about 12 per cent. below the normal for the whole district. Irrigated and diara lands will give a normal outturn, but these represent only about 25 per cent. of the whole area, and therefore I do not think the outturn for the whole district of *rabi* food-crops will exceed 62 per cent.

Saran ...	1,696,087	1,284,000	Barley	260,800	240,000	221,800	105	60	The figures in columns 5 and 6 have been revised according to settlement records. In Gopalganj Subdivision about the normal area is under each crop; but in the Sewan and Chapra Subdivisions,—specially the latter, lack of moisture has prevented germination in many cases and in many lands which could not be irrigated crops have withered and come to nothing, and therefore the area in column 7 is shown as about 12 per cent. below the normal for the whole district. Irrigated and diara lands will give a normal outturn, but these represent only about 25 per cent. of the whole area, and therefore I do not think the outturn for the whole district of *rabi* food-crops will exceed 62 per cent.

Darbhanga ...	2,194,400	1,820,700	Barley	178.200	172,200	79,400	83	46	The figures in column 5 have been taken from the Settlement Jir-saat and those in column 6 from the last year's return. The figures in column 7 have been compiled thana by thana. I am having further check made, as I am not satisfied as to their accuracy. The figures in column 9 are, I believe, fairly accurate. They have been calculated in proportion to the area as well as outturn. No doubt on account of scanty moisture a smaller area has been sown this year and most of the cereals are very poor. Rahar, mustard and tobacco are the only fair crops this year, *i.e.*, they are up to two-thirds of the normal outturn.	The figures in column 6 have been revised in the light of the revised figures in column 5.

NOTIFICATION—No. 1788.

The 8th April 1902.—The following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

REPORT OF THE BRUCE INSTITUTION

FOR THE YEAR 1901.

I.—*Control.*—During the year under review, the Hon'ble Mr. L. P. Pugh, Mr. Geo. Irving, and Mr. H. A. Bamford were re-appointed to be Governors. The Rev. J. E. Robinson was appointed a Governor, *vice* the Rev. Bishop Warne, resigned. The Lord Bishop of Calcutta (*ex-officio* Governor) was absent from India during the greater part of the year. Mr. A. Pedler, F.R.S., C.I.E. (Honorary Secretary), was absent for about four months, making over charge of his duties to Mr. J. S. Slater.

The following is a list of the Governors at the close of the year:—

The Hon'ble the Chief Justice of Bengal ... ... }
The Inspector-General of Civil Hospitals ... ... } *Ex-officio.*
The Chairman of the Calcutta Municipality ... ... }
The Director of Public Instruction, Bengal (Honorary Secretary) }
The Hon'ble Mr. Justice Sale.
The Hon'ble Mr. L. P. Pugh (Barrister-at-law).
The Very Rev. Father V. Marchal, S.J.
The Rev. A. Kitchin.
The Rev. J. E. Robinson.
Geo. Irving, Esq.
H. A. Bamford, Esq. (Inspector of European Schools).

II.—*Capital and Income.*—The capital of the Institution was increased from Rs. 10,46,200 to Rs. 10,51,200 by a further temporary investment of Rs. 5,000 in 3½ per cent. Government securities. The former investment is held by the Comptroller-General in the form of a stock-certificate of the year 1869. It yields at the rate of 3½ per cent. per annum, *less* commission at ¼ per cent. charged by the Comptroller-General, an annual net interest of Rs. 36,525-7-4, paid half-yearly, which is placed to the credit of the Institution in the Bank of Bengal. The latter investment is held by the Secretary and Treasurer, Bank of Bengal, and yields an annual interest of Rs. 175, paid half-yearly, which is credited to the accounts of the Institution.

III.—*Election, Vacancies, etc.*—The annual election was held in the month of January instead of in August as hitherto, and all future elections will also be held in January, so as to enable the girls elected to attend school from the beginning of the school year. For the seven vacancies advertised, 29 applications were received, but another vacancy having occurred just before the election, eight of the most deserving girls were elected on the recommendation of a Sub-Committee, consisting of Colonel T. H. Hendley, I.M.S., C.I.E., the Very Rev. Father V. Marchal, S.J., the Rev. A. Kitchin, and Mr. H. A. Bamford. Of the girls elected, one was placed in the Loreto Boarding School, Entally, two in the Loreto Orphanage, Entally, three in the Pratt Memorial School, one in the Calcutta Free School, and one in La Martinière. During the year there were 14 vacancies caused by the withdrawal of children by their parents or guardians, of whom 11 had attained the age of 17 years, the limit ordinarily allowed under the rules. If, however, a girl elects to take up teaching as a profession, some extension of time is generally allowed, if the Governors consider her fit to take up higher studies. One such extension was granted during the year. Two girls, who were in poor health, were, at the request of the school authorities, transferred temporarily to the Dow Hill Girls' School at Kurseong; but such transfers are only granted when no extra charge to the Institution is involved. Another girl, who was absent from school without leave for a considerable period, was struck off the list of foundationers. There was one death. Of the girls who had left school, two found places as teachers and one is learning type-writing. Girls who are orphans, on their withdrawal from the foundation at the age of 17, are generally retained in the schools in which they have been educated and suitable employment found for them.

At the close of the year there were 142 girls on the foundation, against 146 in the preceding year. They were distributed as follows:—

Loreto Convent, Entally—		
Boarding School	19	
Orphanage	33	
		52
Calcutta Girls' School		39
Pratt Memorial School		19
Calcutta Free School		12
La Martinière (Girls)		9
St. Paul's Mission Home		7
European Protestant Orphanage, Cuttack ...		3
St. Vincent's Home		1
Total ...		142

The following table affords particulars as to the class and religion of the foundationers at the close of the year:—

Class.	Roman Catholics.	Church of England.	Non-conformists.	Total.
1. Orphans or deserted by the parents ...	24	19	8	51
2. Fatherless or deserted by the father, or father incapable.	29	41	16	86
3. Father or both parents alive	1	3	1	5
Total ..	54	63	25	142

IV.—*Education and Maintenance.*—The nature of the education imparted to the girls on the foundation is generally that prescribed for primary and middle schools for Europeans. In exceptional cases a higher education is given. A girl is not ordinarily allowed to remain in school after she has attained the age of seventeen years, when an outfit grant of Rs. 50 is usually given to enable her to start in life. The end sought is to fit the girls for a respectable and useful station in life.

The average monthly cost for the education and maintenance of each girl on the foundation amounted to Rs. 19-4, against Rs. 19-0-9 in the preceding year. The year opened with a balance of Rs. 22,606 and closed with a balance of Rs. 17,591.

The total amount paid under the different heads of expenditure was as under:—

1900.

	Rs.	A.	P.
Education and maintenance ..	34,019	7	0
Office establishment	822	0	0
Contingencies	31	4	0
Advertisement and printing ...	203	13	5
Outfits	1,278	0	0
Other charges	36	8	0
Total ...	36,391	0	5

1901.

	Rs.	A.	P.
Education and maintenance ...	35,117	6	8
Office establishment	824	0	0
Contingencies	22	4	0
Advertisement and printing ...	191	11	7
Outfits	625	0	0
Funeral expenses	33	8	0
Other charges	55	5	3
	36,869	3	6
Investment	4,859	1	5
Refund	781	14	10
Total ...	42,510	3	9

V.—*Inspection.*—Mr. H. A. Bamford was appointed Visiting Governor for the first half and re-appointed for the second half-year. His reports were satisfactory. Speaking generally, Mr. Bamford states that the foundationers are making satisfactory progress in their studies; they are well cared for and in good health, and are happy. Good accounts also continue to be received from the school authorities in regard to the general conduct, application, progress, health, and attendance of the foundationers.

VI.—*Meetings.*—Four meetings were held during the year, and among the various resolutions passed the following may be noted:—

The inclusion of the Old Church Parochial Home in the list of schools approved for the education of Bruce foundationers.

CALCUTTA,
The 7th March 1902.

J. S. SLATER,
Offg. Honorary Secretary to the Governors.

No. 2235.

THE following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 8th April 1902.

THE SCIENTIFIC AND TECHNICAL DEPARTMENT OF THE IMPERIAL INSTITUTE.

1. The Executive Council of the Imperial Institute desire to direct attention to the character of the work now carried on in an important Department of the Institute, which has been for several years in operation, and has of late undergone considerable extension.

The Scientific and Technical Department of the Institute has been established to acquire information by special enquiries and by experimental research, technical trials, and commercial valuation regarding new or little known natural or manufactured products of the various Colonies and Dependencies of the British Empire and of foreign countries, and also regarding known products procurable from new sources, and local products of manufacture which it is desired to export. This work is carried out with a view to the creation of new openings in trade, or the promotion of industrial developments.

2. In an extensive and well-equipped series of Research Laboratories, a numerous staff of skilled Chemists, under the direction of Professor Wyndham R. Dunstan, M.A., F.R.S., carry out the investigation of the chemical constitution and properties of new dye-stuffs, tanning materials, seeds and food-stuffs, oils, gums and resins, fibres, timbers, medicinal plants and products; animal products, minerals and ores, soils, cements, and various other products, with a view to their commercial utilization. Whenever necessary these materials are submitted to special scientific experts, by whom they are made the subjects of particular investigation or practical tests. Reports are also obtained from technical or trade experts in regard to the probable commercial or industrial value of any such products, while full information is collected from official or other trustworthy sources regarding the probable extent and cost of available supplies.

3. Appended to this memorandum is a paper giving illustrations of work of the above nature, which has been carried out for India and the Colonies in the Scientific and Technical Department of the Institute. It will be seen that this work is quite distinct in character from the services rendered respectively by the Commercial Information Office of the Board of Trade and by the Botanical Establishment of the Royal Gardens, Kew. But the work of this Department of the Institute may indeed be regarded as an important adjunct to that accomplished by those Government establishments, especially in furnishing the results of chemical investigation and technical trials which most generally determine the commercial value of natural products.

4. All materials requiring scientific or technical examination, or commercial valuation, should be submitted to the Institute for examination either by, or through, the Foreign Office, the Colonial Office, the India Office, or the Board of Trade, or through the Colonial or Indian Government Authorities. Requests for the examination of such materials may also be submitted by Public Commercial Bodies and Institutions of the respective Colonies and Dependencies, or by the Representatives of H. M. Government in foreign countries.

5. Reports on the results of enquiries or experimental investigations are supplied, as a rule, without charge, when applied for as above directed, but, should special expenses be incurred in connection with any such reports, or with the commercial valuation of particular materials or manufactured products, which the Council do not consider themselves warranted in meeting, a statement of such actual outlays will be furnished, for repayment, when the reports are supplied to the Public Bodies or Institutions concerned. Should an investigation or report of exceptional character be asked for by a Government Department, an estimate of the attendant expenses will be submitted, with a view to ascertain whether authority for such expenditure will be given.

[The attention of those who are concerned in finding new markets for Indian and Colonial products may be also directed to the collections of products exhibited in the Galleries of the Imperial Institute, illustrating the material resources of the Colonies and Dependencies of the Empire. They represent upwards of forty different countries, and are open free to the public. On application to the Commercial Information Office of the Institute, or to the Curators of individual Sections of the Collections, all available information is furnished regarding any particular product exhibited in the Galleries, and

to the Honorary Director of the Institute. The assistance of the Government Authorities of the Colonies is invoked to ensure that the Collections of natural and manufactured products, and full information regarding their contents, shall be maintained up to the day.]

F. A. ABEL,
Hon. Director and Secretary of the Imperial Institute.

July, 1901.

STAFF OF THE SCIENTIFIC AND TECHNICAL DEPARTMENT OF THE IMPERIAL INSTITUTE.

1901.

DIRECTOR:

Professor Wyndham R. Dunstan, M.A., F.R.S., Sec. C.S.

ASSISTANT CHEMISTS:

Mr. T. A. Henry, D. SC., Lond. (*Salters' Company's Research Fellow*).
Mr. Ernest Goulding, B. SC., Lond.
Mr. Harold Brown.
Mr. E. A. Andrews.
Mr. G. S. Blake, Assoc. R.C.S.
Mr. J. G. W. Brooker.

SPECIAL ASSISTANT CHEMISTS:

Dr. F. Lühn, PH. D., Heidelberg.
Mr. H. H. Robinson, M.A., Oxon.

Attached to this Department is a staff of scientific, technical, and commercial referees.

ILLUSTRATIONS OF SCIENTIFIC AND TECHNICAL REPORTS MADE SINCE 1896,

chiefly at the request of the Indian and Colonial Governments, based upon experimental investigations conducted in the Laboratories of the Department, and on the opinions of scientific, technical, and commercial referees.

INDIA.

(For further particulars see "Parliamentary Return of the Imperial Institute, Indian Section, August, 1899—" *Eyre and Spottiswoode, London.*)

ACONITES.

A chemical examination has been made of the constituents of the principal varieties of aconite indigenous to India. The medicinally active constituent has been examined, its chemical composition and properties defined, and its exact medicinal action ascertained. Several papers on the subject have been already published (see Addendum) relating to *Aconitum ferox*, *Aconitum heterophyllum*, and *Aconitum Fischeri.*

TOBACCO.

A consignment of specially-prepared tobacco was sent from Tirhoot for chemical analysis and commercial valuation, with a view to the satisfactory sale of the consignment. The results of its analysis, together with a sample of the tobacco, were submitted to a number of tobacco manufacturers and brokers, and the consignment was afterwards sold at a fair price.

Arrangements are now being made for a systematic examination of the different varieties of tobacco grown in India, with a view to the improvement of certain growths.

OPIUM.

A detailed enquiry is being conducted as to the quality of the opium produced in the different opium districts of India. It originated in a request for a chemical examination of opium specially grown in Jeypore, which proved to contain much less morphine and far more narcotine than is usually present in the best Turkey opium medicinally employed in this country.

The same peculiarity is shown by most of the opium produced in India, and the question is being fully investigated with the view of ascertaining the cause of this difference in Indian as compared with Turkey opium and the possibility of improving the Indian product.

If Indian opium could be produced richer in morphine, there is no reason why it should not be medicinally employed in Europe, instead of Turkey opium; and also used as a source of morphine and other alkaloids.

PODOPHYLLUM.

A complete chemical examination has been made of the constituents of the Indian podophyllum (*Podophyllum emodi*). It has been shown in a paper communicated to the Chemical Society (see Addendum) that its constituents are identical with those of American podophyllum (*Podophyllum peltatum*) which is largely employed in medicine, both in this country and throughout Europe. The exact chemical nature of the medicinally active constituent has been ascertained, and it is shown to be present to a greater extent in the Indian product than in the American.

Medical trial has completely substantiated the results of the chemical enquiry (see Addendum). It is proved that this plant, which is abundant in India, is a most efficient substitute for the American podophyllum at present employed, and the plant and medicinal preparations made from it have now been included in the "Indian and Colonial Addendum to the British Pharmacopœia."

Incidentally, it was discovered that the Indian plant also contains a yellow dye which might be profitably employed in dyeing; being, in fact, identical with the colouring matter of the well-known dye-stuff, quercitron bark.

JUTE.

An extensive series of samples of jute, collected at different stag s of growth and treated under various conditions, are being investigated with the view of securing greater uniformity in the quality of Indian jute fibre.

EDIBLE GUMS.

A chemical examination has been made of several Indian gums which seemed likely to be of commercial value as substitutes for gum arabic. The results, together with samples of the gums, were submitted to brokers in this country, who reported on their commercial value, and there have been already commercial enquiries for these gums by manufacturers.

IRON ORES.

Chemical analysis has been made of a number of specimens of Indian iron ores, chiefly magnetite, obtained from the Salem district of Madras. The results have given rise to an important discussion as to the possibility of the ores being profitably smelted in India.

COAL.

A chemical and technical examination has been made of representative samples of coal obtained from the principal coal districts of India, including many in which the seams at present are not actively worked. A full description of the composition and characters of the different varieties of Indian coal has been drawn up by Professor Dunstan and issued as a separate paper by the India Office. It is also included in the "Parliamentary Return of the Imperial Institute, Indian Section, August, 1899."

FOOD-GRAINS.

All the more important Indian food-grains are being submitted to a complete chemical examination, chiefly by Professor Church, F.R.S., who has already made a number of reports on the subject, dealing with their composition and nutritive value.

FIBRES.

A large number of Indian fibres have been chemically examined, and afterwards examined by fibre experts. The results have been communicated to the Indian Government, so that suitable action might be taken in those cases in which it seems desirable. Among these fibres are *Pine-apple*, *Sabai*, *Tacca*, *Madar*, *Ban Reha*, the fibre of *Phœnix paludosa*, and the floss of *Calotropis procera*.

TIMBERS.

The mechanical properties of Pyinma wood have been carefully tested by Professor Unwin, F.R.S., with a view to its application in engineering and building construction.

TANNING MATERIALS.

Systematic chemical examination is being conducted of the principal plants now used, as well as those which seem likely to be applicable in tanning. Those which prove to be rich in tanning are afterwards submitted for trial in the tan-yards. In this way a large number of astringent plants are being investigated, and reports on the tanning value of the following classes have already been made:—*Myrobalans*, *Mangroves*, and the *Cæsalpinias*.

At the instance of the Indian Government, the question of the best method of preparing extracts of tanning agents is being carefully enquired into, with the object of rendering available the enormous supply of astringent plants which are abundant in the forests of India.

Much interest in this matter has been taken by tanners in this country, and the whole subject promises to be a most important one from a commercial point of view.

EDIBLE OILS.

An extensive series of samples of the principal edible oils of India having been made under the direction of Dr. Watt, each oil has been subjected to systematic chemical examination and compared with oils of the same type which command a ready sale in this country. The composition and chief properties of these oils have now been put on record (see Addendum), and many of them are likely to be commercially important.

DYE-STUFFS.

The principal Indian dye materials are being investigated with the assistance of Professor Hummel and Mr. A. G. Perkin, of the Dyeing Department, Yorkshire College, Leeds. An account of the dyeing properties of

Delphinium Zalil has already been given, whilst the constituents of "Kamala" have been investigated and a description of its adulterants provided, which, it is hoped, will lead to the export from India of this dyeing material in a purer condition.

MEDICINAL PLANTS.

It is most important that the numerous plants abundant in India and held there in high repute as medicinal agents should be completely investigated, both as regards their principal constituents and their medicinal value. It has been shown from an examination of an Indian henbane, *Hyoscyamus muticus*, that this plant contains a valuable alkaloid (hyoscyamine) in a form in which it can be more readily isolated than from the other plants which are now resorted to for this purpose (see Addendum).

The constituents of Indian hemp are also being examined, with the object of ascertaining the cause of, and, if possible, of providing a remedy for, the rapid deterioration in quality which this drug undergoes when stored.

A number of samples of Indian kino have been examined, and reports as to their commercial value obtained. Suggestions have been made for the better collection and export of the drug to this country.

INDIA RUBBER AND GUTTA PERCHA.

A chemical examination is being made of the constituents of the *latices* which furnish these products, and of similar *latices*, possible substitutes for India rubber and gutta percha. A chemical examination has been made, and commercial valuation obtained of various samples of rubber produced in India with a view to their improvement.

MINERALS.

A number of samples of mica have been forwarded from Jeypore for the purpose of ascertaining their fitness for the various purposes for which mica is industrially employed. The samples were judged to be inferior, and the authorities of Jeypore have been provided with a complete statement of the quality and character which mica should possess in order to command a satisfactory price in the English market.

A large number of specimens of lime-stones, chiefly from Madras, have been submitted to examination in order to determine their fitness for use in the smelting of iron.

CANADA.

CANADIAN HONEY.

This honey was chemically examined and compared with the best honey sold in the English markets, in order to estimate its suitability for sale in this country. The result was not wholly favourable, and defects in the product were pointed out to the Board of Agriculture. These have now been remedied, and large shipments have since been made to this country.

SWEET CLOVER FIBRE.

A sample of this fibre, stated to be derived from *Melilotus alba*, or sweet clover, which is very plentiful in some districts of the Province of Quebec, was submitted by the Minister of Agriculture, and chemically examined in the Department and also by fibre experts. The valuable properties of the fibre were pointed out and suggestions made for its utilisation.

METHODS OF GRADING WHEAT.

A memorandum on the elaborate methods in use on the Continent in grading and analysing wheat was drawn up for the guidance of Canadian millers who had applied for the information.

CANADIAN GRAPHITE.

Several samples of graphite were submitted to brokers for valuation on the basis of the results of chemical analysis. They proved to be inferior to the graphite at present obtained from Ceylon.

CANADIAN FELSPAR.

A sample from a new deposit of Canadian felspar was analysed and shown to be soda felspar. The material was next successfully tried in several potteries, and consignments of the felspar have since been exported to this country.

CANADIAN MICA.

A report on the special characteristics and commercial value of Canadian amber mica and its application for electrical purposes.

CANADIAN SUMACH.

The chemical constituents of this plant, which is abundant in Canada, have been examined and its value as a tanning agent determined by actual trial in a large tannery. The results were in some respects very satisfactory, and a number of suggestions were made as to the cultivation and preparation of the plant for use in tanning. The report was illustrated with samples of leather tanned with the sumach.

GRENADA.

FIBRES.

Report on the quality and uses of three fibres from Grenada—*Agave rigida*, *Sansevieria zeylanica*, and *Furcræa gigantea*.

BRITISH GUIANA.

TIMBERS.

Report on mechanical tests carried out at the Central Technical College by Professor Unwin, F.R.S., of thirteen different timbers from British Guiana.

GOUPIA TOMENTOSA.

Report on the constituents of the wood of *Goupia tomentosa*. The use of this hard and valuable wood is interfered with by its very offensive odour. This was shown to be due to the presence of certain volatile organic acids which can be dissipated by heating.

JAMAICA.

TIMBERS.

Report by Professor Unwin on the mechanical tests of a series of twenty-four of the principal timbers of Jamaica.

MONTSERRAT.

TIMBERS.

Report by Professor Unwin on the mechanical tests of two timbers from Montserrat.

CAPE OF GOOD HOPE.

WINES.

Report on the analysis of selected samples of Cape wines. A chemical analysis was made of these wines, and they were then submitted to an expert. The causes of the defects were ascertained, remedies were suggested, and recommendations made for the improvement of Cape wines so as to render them more readily saleable in Europe.

TIMBERS.

Report by Professer Unwin on the mechanical tests of twenty-five Cape timbers.

NATAL.

SHALE.

Report on the chemical examination of a shale supposed to be suitable for the production of oil and gas.

ACACIA WOODS FOR PULP-MANUFACTURE.

Report on the suitability of the wood of two species of acacia (*A. dealbata* and *A. mollissima*) for conversion into wood-pulp for paper-making. These woods were converted into pulp by the two principal processes in use for this purpose and commercial valuations of the wood and pulp were obtained.

MEDICINAL PLANTS.

The constituents of a purgative plant were examined and shown to resemble those of Jalap.

TIMBERS.

Report by Professor Unwin on the mechanical tests of six Natal timbers.

ASH OF NATAL ALOES.

A report on its composition and possible uses.

INDIA-RUBBER.

Report on the chemical properties and commercial value of a sample of India-rubber produced in Zululand.

NEWFOUNDLAND.

HAEMATITE.

Report on the composition of two samples of haematite iron ore from Newfoundland. The producers were brought into communication with iron manufacturers in this country.

COAL AND CHROME IRON ORE.

Report on the composition of samples of coal and chrome iron ore from Newfoundland.

STEATITE.

Report and analysis of a sample of a new variety of steatite. This sample was submitted to buyers of the mineral, in order to draw attention to the existence of valuable deposits in Newfoundland.

TRINIDID

CARAPA OIL.

Carapa oil is extracted from the nuts of a tree abundant in the West Indies. A full report on its chemical composition and technical value was furnished.

SISAL FIBRE.

Report on the comparative value of a sample of sisal fibre grown experimentally in the Royal Botanic Gardens, Trinidad.

Chione Glabra.

The bark of *Chione glabra* is used in Trinidad as a drug. The precise nature of the active principle was determined, and this constituent was afterwards prepared artificially.

WINDWARD ISLANDS.

Groo-groo Fibre.

Report on the composition, quality and uses of groo-groo fibre, grown in the Botanical Gardens, St. Vincent.

BRITISH CENTRAL AFRICA.

Minerals.

Report on the analysis and technical examination of coal discovered in the West Shire district. This coal proved to be of excellent quality.

Report on the analysis and technical examination of two samples of coal from Nyasaland.

Report on a sample of washed sand, which proved to be titaniferous magnetic iron oxide, and on some pieces of rock believed to be auriferous, also on a further sample of coal from North-West Nyasaland.

Report on a sample of sand, and on volcanic rock

Report on two collections of pyritous and ferruginous minerals.

Report on a specimen of rock-crystal. This was stated by experts, to whom it was submitted, after chemical examination, to be a brilliant specimen of this material, which is largely used in making optical instruments.

Report on a sample of crystal. This proved to be Iceland spar, good specimens of which are greatly sought after by manufacturers of optical instruments. Suggestions were made with reference to the collection and selection of this material.

Fibre.

Report on a sample of fibre from an indigenous plant.

SOMALILAND.

Samples of mica have been submitted to examination and commercial valuation.

NEW ZEALAND.

Minerals.

Reports on samples of iron ore, limestone and haematite.

Report on a specimen of greenstone.

Reports on samples of jet and jasper.

Report on the suitability of samples of sand and clay for glass-making, by chemical analysis, and examination by experts.

FIJI.

Reports on a sample of bark as a possible substitute for sasafras.

Report on a sample of fibre.

Report on a sample of oil.

VICTORIA.

Perfumes.

Report on the results of the preliminary chemical examination of a series of essential oils and essences from the Government Flower Farm, Dunolly.

Fibres.

Report on a series of thirty-two fibres grown experimentally in the Melbourne Botanical Gardens.

Meat Extract.

Report on the examination of a sample of meat extract.

Coal.

An examination of three samples of brown coal.

TASMANIA.

Timbers.

Report by Professor Unwin on the mechanical tests of three timbers.

WESTERN AUSTRALIA.

Water.

Report on the analysis of three samples of water taken from the "Perth Station Yard Bore."

Coal.

Report on the analysis and technical examination of coal from the Wallsend Colliery of the Collie Coal Field.

NEW SOUTH WALES.

Cotton.

Report on the properties and commercial value of cotton grown in New South Wales, proving that most satisfactory cotton can be produced in the Colony.

SISAL FIBRE.

Report on the composition and commercial value of sisal fibre grown in New South Wales. This report was very favourable.

MEAT PRESERVATIVE.

Report on the value of an antiseptic material proposed for use on the large scale in the preservation of meat.

LEATHER.

Report on the character and commercial value of leather tanned in New South Wales.

QUEENSLAND.

HIDES, SKINS AND LEATHER.

These samples were received through the Agent-General from the Department of Agriculture at Brisbane, with a request that a report should be obtained on the commercial value of the skins, which had been cured by a special process. In order to test the efficiency of the curing process, samples of hides and skins were tanned, and the leather so produced, submitted to experts. A detailed report on the value of the process and of the leather produced was furnished, with the opinions of leather experts and brokers.

AUSTRALIAN LEATHER.

Report on the market in this country for various types of Australian leather.

DIVI-DIVI PODS.

The pods of this plant (*Cæsalpinia coriaria*) are used in tanning. The Queensland sample was analysed and found to be of excellent quality, and was highly valued by the brokers to whom it was submitted.

WINE.

Report on samples of wine produced in the Colony.

FIBRES.

Report on the composition and uses of the fibres of *Hibiscus heterophylla* and *Hibiscus sabdariffa*, grown in Queensland.

TIMBERS.

Report by Professor Unwin on the mechanical properties of seven timbers.

BRITISH HONDURAS.

TIMBERS.

Report by Professor Unwin on the mechanical tests of fifteen timbers from British Honduras.

HONG-KONG.

TUNG OIL.

Report on the composition and properties of tung oil (Chinese wood oil).

CEYLON.

TIMBERS.

Report by Professor Unwin on the mechanical tests of twenty-two of the principal Ceylon timbers.

KEKUNA OIL.

Report on the chemical composition and medicinal action of this oil.

COCOANUT OIL.

Report on the chemical composition of a sample purified by a special process.

EGYPT.

POISONOUS AND MEDICINAL PLANTS.

An enquiry into the nature of the poison of an Arabian vetch (*Lotus arabicus*). This was proved to be due to prussic acid formed from a new glucoside present in this plant, which has been named *lotusin* (see Addendum). This glucoside disappears as the seeds ripen, when the plant becomes non-poisonous and can be used as fodder.

An examination of the alkaloid contained in *Hyoscyamus muticus* and *Datura Stramonium* grown in Egypt (see Addendum). Both these plants, the former especially, are shown to be valuable commercial sources of the alkaloid hyoscyamine and are now being exported to this country.

F. A. ABEL,	WYNDHAM R. DUNSTAN,
Hon. Director and Secretary of the Imperial Institute.	*Director of the Scientific and Technical Dept. of the Imperial Institute.*

July 1901.

ADDENDUM.

LIST OF THE PRINCIPAL PAPERS COMMUNICATED TO SCIENTIFIC SOCIETIES on subjects arising out of the above-mentioned and other enquiries conducted in the SCIENTIFIC AND TECHNICAL DEPARTMENT OF THE IMPERIAL INSTITUTE:—

A chemical investigation of the constituents of Indian and American Podophyllum (*Podophyllum emodi* and *P. peltatum*). By Professor W. R. Dunstan, F.R.S., and T. A. Henry, B.Sc., Lond. **(Transactions of the Chemical Society, 1898.)**

Physiological action and Therapeutic properties of the Podophyllin, with special reference to Indian Podophyllin. By H. W. G. Mackenzie, M.D., F.R.C.P., and A. E. Dixon, M.B. **(Edinburgh Medical Journal, November, 1898.)**

Occurrence of hyoscyamine in the *Hyoscyamus muticus* of India. By Professor W. R. Dunstan, F.R.S., and Harold Brown. **(Transactions of the Chemical Society, 1899.)**

Occurrence of orthohydroxyacetophenone in the volatile oil of *Chione glabra*. By Professor W. R., Dunstan F.R.S., and T. A. Henry, B. Sc., Lond. **(Transactions of the Chemical Society, 1898.)**

The volatile constituents of the wood of *Goupia tomentosa*. By Professor W. R. Dunstan, F.R.S., and T. A Henry, B. Sc., Lond. **(Transactions of the Chemical Society, 1898.)**

The action of alkyl haloids on aldoximes and ketoximes. By Professor W. R. Dunstan, F.R.S., and E. Goulding, B.Sc., Lond. **(Transactions of the Chemical Society, 1897.)**

The Pharmacology of Aconitine, Diacetylaconitine, Benzaconine and Aconine considered in relation to their chemical constitution. By Professor J. T. Cash, F.R.S., and Professor W. R. Dunstan, F.R.S. **(Philosophical Transactions of the Royal Society, 1898.)**

Contributions of our knowledge of the Aconite Alkaloids. Part XIV.—On Pseudaconitine. By Professor W. R. Dunstan, F.R S., and F. H. Carr. **(Transactions of the Chemical Society, 1897.)**

Report on the chief physical and chemical characters of a series of Indian Edible Oils. By A. W. Crossley, Ph.D., D Sc., and H. R. Le Sueur, B.Sc., Lond. **(Journal of the Society of Chemical Industry, December, 1898.)**

The nature and origin of the poison of *Lotus arabicus*. By Professor W. R. Dunstan, F.R.S., and T. A. Henry, B.Sc., Lond. **(Proceedings of the Royal Society, 1900 and 1901.)**

The alkaloid of *Hyoscyamus muticus* and of *Datura Stramonium* grown in Egypt. By Professor W. R. Dunstan, F.R.S., and Harold Brown. **(Transactions of the Chemical Society, January, 1901.)**

The action of alkyl haloids on hydroxylamine. Formation of substituted hydroxylamines and oxamines. By Professor W. R. Dustan, F.R.S., and E. Goulding, B.Sc. **(Transactions of the Chemical Society, 1890.)**

The action of hydrogen peroxide on secondary and tertiary aliphatic amines. Formation of alkylated hydroxyomines and oxamines. By Professor W. R. Dunstan. F.R.S., and E. Goulding, B.Sc. **(Transactious of the Chemical Society, 1899.)**

Contributions to our knowledge of the Aconite Alkaloids. Part XV.—On japaconitine and the alkaloids of Japanese aconite. By Professor W. R. Dunstan, F.R.S., and H. M. Read. **(Transactions of the Chemical Society, 1899.)**

Note on the hide powder filter. By R. L. Jenks. **(Journal of the Society of Chemical Industry, June, 1896.)**

The Pharmacology of Pseudaconitine and Japaconitine considered in relation to that of Aconitine. By Professor J. T. Cash, F.R.S., and Professor Wyndham R. Dustan, F.R.S. **(Proceedings of the Royal Society, 1901.)**

The Pharmacology of Pyraconitine and Methylbenzaconine considered in relation to their chemical constitution. By Professor J. T. Cash, F.R.S., and Professor Wyndhan R. Dunstan, F.R.S. **(Proceedings of the Royal** [illegible]

WEATHER AND CROP REPORT.

For the week ending the 7th April 1908.

Burdwan.—Rainfall at Sadar 0·29, Kalna 0·86, Katwa 1·41, Raniganj 1·15. Weather hot. *Rabi* harvesting continues. No cattle-disease. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar ·49, Rampur Hat 1·05. Weather cloudy. Sugarcane-pressing and ploughing in progress. Common rice sells at Sadar at 12¾ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather occasionally cloudy. Ploughing and manuring going on. No important crop in the field. Fodder and water sufficient. No cattle-disease. Common rice 14¾ seers per rupee.

Midnapore.—Rainfall at Sadar 0·13, Contai 0·75, Ghatal 0·10. Weather occasionally cloudy. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Ghatal	13	0	
Tamluk	12	12	
Contai	14	0	

Hooghly.—Slight rainfall. Days hot, nights cool. Recent rains facilitated cultivation of paddy and jute. Standing crops slightly damaged by hail in Arambagh subdivision. Fodder and water sufficient everywhere. Common rice sells at Sadar at 10 seers and at Arambagh 12 seers 6 chittaks per rupee.

Howrah.—Rainfall at Sadar 0·11, Ulubaria 0·17. Weather hot. *Boro* paddy doing well. Condition of cattle good. Fodder and water sufficient. Common rice sells at Sadar at 9 seers 6 chittaks and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 0·11, Barasat 0·43, Basirhat 0·06, Diamond Harbour 0·32. Weather seasonable. Prospects fair. Lands are being prepared. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Barasat	12	0	
Basirhat	12	4	
Diamond Harbour	12	0	

Nadia.—Rainfall at Sadar 0·75, Kushtia 0·38, Meherpur 0·18, Chuadanga 0·26, Ranaghat 0·72. Sowing of *aus* paddy and planting of sugarcane commenced. Land being prepared for sowing jute. No standing crop. No cattle-disease reported. Fodder and water sufficient. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 0·19, Lalbagh ·14, Kandi ·78. Weather seasonable. Harvesting of *rabi* still going on. Prospects favourable. *Bhadoi* lands are being prepared. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Lalbagh	11	12	
Jangipur	13	0	
Kandi	14	0	

Jessore.—Rainfall at Sadar ·88, Jhenida 1·16, Magura 1·08, Narail ·40, Bangaon ·51. Weather getting hot. Cultivation of lands for *aus* paddy and jute going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	6	per rupee.
Jhenida	12	12	
Magura	12	0	
Narail	12	0	
Bangaon	12	0	

Khulna.—Rainfall at Sadar 0·19, Bagerhat 0·32, Satkhira 0·09. Weather getting hot. Prospects of *boro* continue favourable. Cultivation of land for both *aus* and *aman* commenced. More rain wanted. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Bagerhat	13	8	
Satkhira	11	8	

Rajshahi.—Harvesting of *rabi* crops nearly completed. Transplantation of *boro* paddy in progress. Cattle-pox reported from a limited area only. Fodder and water plentiful. Common rice sells at 12 seers per rupee.

Dinajpur.—Average rainfall ·33. Weather seasonable. Cultivation for *bhadoi* and jute progressing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 13 seers on an average.

Jalpaiguri.—Rainfall ·84. Weather seasonable. Sowing of *bhadoi* and jute going on. Common rice sells at 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Kurseong 0·53, Siliguri 1·43, Sadar not received. Weather seasonable. *Hills*—*Bhutta* and potatoes are being sown. *Terai*—Sowing of *bhadoi* and jute in places commenced. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Maize sells at Darjeeling at 16 seers and at Kalimpong at 23 seers per rupee.

Rangpur.—Rainfall at Sadar ·84. Fall general. Weather seasonable. Prospects improved by recent rain. Sowing of *bhadoi* and jute going on. Water and fodder sufficient.. No cattle-disease. Common rice sells at 12 seers per rupee.

Bogra.—Rainfall at Sadar nil, Panchbibi 2·13. Weather occasionally cloudy. Prospects fair. Cultivation for *aus* and jute continues. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 0·10, Serajganj nil. Weather hot and partially cloudy. Prospects of crops good. More rain wanted. Price of rice is 10 seers per rupee. Jute and paddy being sown. Fodder and water sufficient.

Dacca.—Rainfall at Sadar ·97, Manikganj ·71, Munshiganj ·47, Naraingunj ·63. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 12 seers per rupee.

Mymensingh.—Rainfall at Sadar nil, Kishorganj 0·30, Netrokona 0·05. Weather seasonable. Sowing of *aus* and jute continues. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishorganj	12	4	
Jamalpur	12	4	
Netrokona	13	2	
Tangail	11	4	

Faridpur.—Rainfall at Sadar 0·45, Goalundo 0 60, Madaripur 0·49. Weather cyclonic on Thursday. Cool since. Sowing of paddy and jute continues. Common rice sells at 12 seers per rupee.

Backergunge.—Rainfall at Sadar 0·55. No rain in south and east. Weather hot. Prospects of crops fair. Cattle-disease continues in Rajapur outpost. Common rice sells at 12 seers per rupee.

Tippera.—Rainfall at Sadar ·12, Brahmanbaria ·38. Weather seasonable. Prospects of crops good. Lands are being prepared for jute and paddy and sowing continues. Fodder and water sufficient. Cattle-disease reported from Chandpur. Average price of rice 12¾ seers per rupee.

Noakhali.—No rain. Weather hot. Prospects fair. *Aus* sowings commenced. Cattle-disease reported from two thanas. Fodder and water sufficient. Common rice sells at Sadar 12 seers and at Feni 14 seers per rupee.

Chittagong.—No rain during the week. Prospects of standing crops very bad for want of rain. Fodder and water sufficient. Common rice selling at 15 seers per rupee.

Patna.—Rainfall nil. Harvesting of *rabi* approaching completion. Lancing of poppy ended. Fodder and water for cattle sufficient. No cattle-disease. Coarse rice sells as follows:—

	Srs.	ch.	
Patna	12	0	per rupee.
Dinapore	12	8	
Barh	11	12	
Bihar	11	0	

Gaya.—Rainfall at Sadar ·04. Weather hot and cloudy. Harvesting of *rabi* continues. Sugarcane and *china* doing well. Cattle-pox reported from a few villages. Fodder and water for cattle sufficient. Average price of common rice is 12½ seers per rupee.

Shahabad.—No rain. Weather hot and cloudy. Harvesting of *rabi* crops nearly finished. Sugarcane plantation in progress. Cattle-disease reported from Bikramganj police-station. Fodder and water ample. Rice sells at 12½ seers per rupee at Sadar.

Saran.—No rain Weather seasonable except for east winds. Harvesting and threshing of *rabi* crops continue Indigo had to be re-sown in many cases more than once. Sugarcane and *china* being irrigated. Fodder and water barely sufficient. Common rice sells at 11 seers 10 chittaks and maize at 23 seers 11 chittaks per rupee.

Champaran.—Rainfall nil. Weather hot. Harvesting of *rabi* continues. Forty-three per cent. outturn expected. Preparation of lands for *bhadoi* in progress. Fodder and water sufficient. Cattle-disease reported. Common rice sells at 12½ and maize at 23½ seers per rupee.

Muzaffarpur.—Rainfall nil. Harvesting of *rabi* crops approaching completion. Prospects fair. Prices are—Common rice 12 seers, wheat 12½ seers, barley 18½ seers, maize 22 seers, gram 18 seers, *arhar* 19½ seers, and *marua* 21 seers a rupee.

Darbhanga.—Rainfall nil. Weather seasonable. Harvesting of *rabi* nearly completed. Sowing of paddy in low land going on. Fodder and water sufficient. Cattle-disease is reported from Darbhanga police-station. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	11	0	
Madhubani	12	6	

Monghyr.—No rain. Weather cloudy with variable high winds. Harvesting of *rabi* crops nearly finished. Threshing vigorously going on. Cutting of poppy continues. Sugarcane plantation nearly finished. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	3	per rupee.
Begusarai	12	0	
Jamui	12	0	

Bhagalpur.—No rain. Weather hot; sometimes cloudy. *Mung* and paddy being sown. Wheat nearly harvested. Harvesting of *mahua* and *rabi* continues. Sugarcane in

good condition. Sporadic cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	13	12	
Madhipura	13	0	
Supaul	13	8	

Purnea.—No rain. Weather seasonable. Harvesting of *rabi* crops going on. Preparation of lands for next crops in progress. Stray cases of cattle-disease reported from Koari in Araria subdivision. Fodder available. Want of water for cattle is being felt. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishanganj	10	8	
Araria	12	0	

Malda.—No rain. Weather hot and cloudy. *Boro* paddy thriving. Gathering of *rabi* finished. Outturn 100 per cent. Outturn of mustard and rape 90 per cent. and that of tobacco 100. Fodder and water sufficient everywhere. No cattle-disease. Common rice sells at 12½ seers per rupee.

Sonthal Parganas.—Average rainfall ·91. Weather hot and cloudy. *Mahua* falling, somewhat damaged by rain and hail. Mango good. Grazing improved by rain. Rinderpest in Pakour and Maheshpur thanas. Average price of rice is 12½ seers and that of maize 19 seers per rupee.

Cuttack.—Rainfall at Sadar 0·02. Jajpur 0·79. Weather seasonable. *Dalua, arhar,* and *mung* ripening. Tobacco being cut. Cotton and sugarcane growing. Condition of cattle generally good. Fodder and water available. Common rice sells as follows :—

	Srs.	ch.	
Sadar	14	12	per rupee.
Jajpur	15	12	
Kendrapara	17	1	
Banki	15	7	

Balasore.—Rainfall at Sadar ·22. Fall in parts. Weather fair. Ploughing continues. *Dalua* ripening. Sugarcane being transplanted. Cattle-disease reported from parts. Fodder and water sufficient. Common rice sells at 15 and 18 seers at Sadar and Bhadrak respectively.

Angul.—Rainfall nil. Weather hot and cloudy. Small-pox and cattle-disease reported from the interior. Price of common rice stationary.

Puri.—Rainfall at Sadar nil, Khurda ·01. Weather seasonable. Ploughing for *sarad* paddy and sugarcane crop continues. *Mung* and *dalua* paddy being harvested. Cotton and sugarcane thriving. Other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	14	7	per rupee.
Khurda	15	12	
Interior	16	8	

Hazaribagh.—Rainfall nil. Weather seasonable. Fodder and water sufficient. Prospect of *mahua* good. Common rice sells both at Sadar and Giridih at 12½ seers per rupee.

Ranchi.—Rainfall at Sadar nil. Weather cloudy. Lands are being prepared for early sowings. Harvesting of *rabi* crops nearly finished. Outturn 50 per cent. Fodder dear at Sadar. Water sufficient. Cattle-disease reported from several thanas. Common rice sells at 14¼ seers per rupee.

Palamau.—No rain. Weather hot. *Rabi* harvesting still going on. *Mahua* prospects good. Cattle-disease continues. Fodder and water still sufficient. Prices at Sadar—Rice 12 seers 15 chittaks, maize 20½ seers, and *mahua* 23 seers 10 chittaks.

Manbhum.—Rainfall at Sadar ·11, Gobindpur nil. Weather seasonable. Wheat, barley, gram, *arhar* on ground. Prospects good. New sugarcane thriving. Fodder and water sufficient. Cattle-disease reported from thanas Purulia, Para, Chandil, Manbazar, and Raghunathpur. Common rice sells at Sadar at 14 seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 0·16. Pressing of sugarcane continues. Average price of rice 12¾ seers in the district; at Chaibassa 13 seers per rupee.

General Summary.—The rainfall during the week was scattered and for the most part scanty, but there was practically no rain in Bihar. Slight damage by hail is reported from the Sonthal Parganas and parts of Hooghly. Harvesting of *rabi* approaching completion and threshing going on. Ploughing and sowing in progress. Prospects fair. Cattle-disease reported from 14 districts. Fodder and water generally sufficient. The price of common rice has risen in 18 districts, fallen in 5, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of March 1902.

	Inches.	Date.	Hour.
The mean pressure of the month	29·837		
The average pressure of March from 24 years' registers ...	29·869		
The highest pressure in the month	29·991	26th	10
The lowest pressure in the month	29·680	28th	16
The range of pressure	0·311		
	Hours.		
The total number of hours of bright sunshine during the month	233·1		
The maximum possible number of hours of sunshine ...	371·3		
	°		
The mean temperature of the month	80·3		
The average temperature of March from 24 years' registers ...	80·6		
The highest temperature in the month	99·7	28th	
The lowest temperature in the month	65·8	15th	
The range of temperature during the month	33·9		
The mean daily range of temperature	21·3		
The greatest range of temperature in one day	28·7	8th	
	Per cent.		
The mean humidity of the month	73		
The average humidity of March from 24 years' registers ...	66		
	Inches.		
The mean vapour tension of the month ...	0·732		
The average vapour tension of March from 9 years' registers	0·702		
The mean cloud proportion of the month	2·15		
The average cloud proportion of March from 25 years' registers	2·25		
	Inches.		
The total rainfall of the month	1·49		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	1·41		
The average fall of March from 48 years' registers ..	1·34		
The greatest fall in 24 hours ...	0·96	13th	
	Days.		
The number of rainy days in the month	2		
The average number of rainy days in March from 24 years' registers	4		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	141·7		
The mean difference of sun and air temperatures	48·9		
The greatest sun temperature	149·7	30th	
The greatest excess of sun over air temperature	57·4	13th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	67·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	4·2		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	9·8	29th	
	Miles.		
The mean movement of the wind per day	135·2		
The greatest movement of the wind in one day	211·0	3rd	
The greatest movement of the wind in one hour ...	20·0	28th	11 to noon.

The number of hours with winds from each of the 8 points—
N. 12, N.E. 16, E. 41, S.E. 79, S. 297, S.W. 197, W. 44, N.W. 40, Calm 18.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·0° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 7th April 1902.

Results of the Meteorological Observations taken at the Alipore Observatory from 30th March to 5th April 1902.

	Inches.
The total fall of rain from 30th March to 5th April 1902	0·11
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·30
The total fall from 1st January to 5th April 1902	1·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·07

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; o, overcast; g, gloomy; p, passing temporary showers; t, thunder; ∠, lightning.

WEATHER AND CROP REPORT.

For the week ending the 14th April 1902.

Burdwan.—Rainfall at Sadar 1·59, Kalna 1·63, Katwa 1·38, Raniganj ·89. Weather hot. Ploughing and manuring of lands going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar 2·66, Rampur Hât 0·11. Weather cloudy. Sugarcane-pressing over. Ploughing progressing. Common rice sells at Sadar at 12½ seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar ·22. Weather occasionally cloudy, attended with dust-storms. Ploughing being continued. Fodder and water sufficient. No cattle-disease. Common rice sells at 15 seers per rupee.

Midnapore.—Rainfall at Sadar 2·49, Contai 1·11, Tamluk 0·71, Ghatal 1·86. Fall general. Ploughing commenced. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	ch.	
Sadar	... ...	13	12	per rupee.
Ghatal	... ...	12	8	
Tamluk	... ...	12	12	
Contai	... ...	14	0	

Hooghly.—Rainfall at Sadar 1·25, Serampore ·89. Rains facilitated ploughing for *aus* and jute. Fodder and water sufficient everywhere. Common rice sells as follows:—

		Srs.	ch.	
Sadar	... ...	10	0	per rupee.
Serampore	... ...	10	12	
Arambagh	... ...	12	6	

Howrah.—Rainfall at Sadar 0·42, Ulubaria 1·21. Fall general on 9th and 11th and in the south on the 10th. The rain has done much good to the *boro* paddy and facilitated the ploughing for the cultivation of jute and paddy. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar at 11½ seers and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 1·55, Barasat 0·67, Basirhat 0·80, Diamond Harbour 0·82. Weather seasonable. Prospects fair. Lands are being prepared. No cattle-disease. Fodder and water sufficient. Common rice sells at 11 seers at Sadar and at 12 seers at sub-divisions.

Nadia.—Rainfall at Sadar 1·26, Kushtia 1·48, Meherpur 1·94, Ranaghat 1·17, Chuadanga 0·95. Fall general. Weather cloudy. Prospects improved by recent rain. Sowing of *aus* paddy still going on. No standing crop. Fodder and water sufficient everywhere. No cattle-disease. Common rice sells at 12 seers.

Murshidabad.—Rainfall at Sadar 0·37, Lalbagh 0·15, Jangipur 0·06, Kandi ·45. Weather seasonable. Harvesting of *rabi* crops is now over. Prospects favourable. *Bhadoi* lands are being prepared. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	13	per rupee.
Lalbagh	11	12	
Jangipur	13	0	
Kandi	14	0	

Jessore.—Rainfall at Sadar 2·49, Jhenida 1·45, Magura 2·17, Narail 2·00, Bangaon 1·43. Weather cloudy and hot. Land being prepared for *aman* and *aus* crops. Sowing of *aus* paddy and jute begun. No cattle-disease. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 1·78, Bagerhat 0·41, Satkhira 0·81. Insufficient in Bagerhat. Weather seasonable. Prospects of *boro* fair. Cultivation of land for *aus* and *aman* improved by recent rain. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Bagerhat	13	0	
Satkhira	11	8	

Rajshahi.—Rainfall at Sadar ·07, Nator ·17. Sowing of jute and *aman* in progress. Cattle-pox extends over a limited area. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Dinajpur.—Very light rainfall at four stations. Weather unsettled. Cultivation for *bhadoi* progressing. Sowing of jute has commenced. No cattle-disease. Fodder and drinking-water plentiful. Common rice sells at 13 seers per rupee.

Jalpaiguri.—Rainfall ·41. Weather seasonable but cloudy. Fields for jute and *bhadoi* paddy still being prepared. Common rice sells at 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling 0·72, Kurseong 0·23, Siliguri 1·03. Weather seasonable. *Hills*—Maize and potato being sown. *Terai*—Sowing of *bhadoi* and jute going on. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Maize sells at Darjeeling at 18 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Prospects favourable. Sowing of *bhadoi* and jute going on. Water and fodder sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Bogra.—Rainfall at Sadar 0·34. A slight fall everywhere except in the west. Weather occasionally cloudy. Prospects fair. Ploughing and sowing for *aus* and jute still continues. Fodder and water sufficient. Common rice sells at 13 seers.

Pabna.—Rainfall at Sadar 1·52, Serajganj 0·58. Weather cloudy with occasional rain and storms. Prospects of crops good. Paddy and jute are being sown. Fodder and water sufficient. Price of rice is 10½ seers per rupee. Prospects improved by recent rain, but more rain is wanted.

Dacca.—Rainfall at Sadar 1·09, Manikganj 1·01, Munshiganj ·84, Naraingauj 1·68. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 12 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·67. Fall general. Weather cloudy with occasional rain. Recent rain has done much good to standing crops. *Boro* estimated at 100 per cent. Sowings of *aus* and jute progressing. Fodder and water sufficient. No cattle-disease Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishorganj	12	8	
Jamalpur	12	8	
Netrokona	14	3	
Tangail	11	4	

Faridpur.—Rainfall at Sadar 1·10, Goalundo 1·11, Madaripur 0·53. Weather seasonable; rendered cooler by rain last evening. Prospects good. Cultivation for paddy in progress. Common rice sells at 11 seers per rupee.

Backergunge.—Rainfall at Sadar 1·94. Weather stormy. Prospects improved by recent rain. Cattle-disease in thana Nalchiti, where fodder also insufficient. Water sufficient. Common rice sells at 12 seers per rupee. Outturn of linseed 81 per cent.

Tippera.—Rainfall at Sadar ·87, Brahmanbaria ·54. Rough winds blowing. Sky cloudy. Sowing of jute and paddy going on in the north. Lands under preparation in Sadar. Rain wanted. Fodder and water sufficient. Common rice sells at 12¾ seers the rupee.

Noakhali.—Rainfall at Sadar 0·85, Feni nil. Weather seasonable. *Aus* sowings continue. Prospects good. Cattle-disease reported from Begumgunge. Fodder and water sufficient. Common rice sells at Sadar at 12 seers and at Feni at 13 seers 5 chittaks per rupee.

Chittagong.—Rainfall at Sadar 1·15, Cox's Bazar nil. More rain wanted. *Rabi* crop is being reaped. Fodder and water sufficient. Common rice selling at 14 seers per rupee.

Patna.—Rainfall nil. Weather hot. Cotton flourishing. Sugarcane germinating. Threshing of *rabi* continues. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Patna	12	0	per rupee.
Dinapore	12	6	
Barh	11	4	

Gaya.—Rainfall at Sadar 0·11, Aurangabad 0·21, Nowada 0·05. Common rice sells at 12 seers per rupee. *Rabi* harvesting completed. A few hail-stones at head-quarters station on 13th, which did no damage. Outturn of wheat and barley estimated at 65 and 70 per cent. respectively. No cattle-disease. Fodder and water sufficient.

Shahabad.—No rain. Weather hot. *Rabi* harvesting nearly finished. Sugarcane promising. Cattle-disease reported from Bikramganj and Dehri thanas. Fodder and water abundant. Rice sells at Sadar at 12½ seers per rupee.

Saran.—No rain. Weather seasonable except that east winds continue. Harvesting of *rabi* nearly finished and threshing going on. Sugarcane and *china* recently sown doing well. Fodder and water barely sufficient. Common rice sells at 11 seers 15 chittaks and maize at 24 seers 15 chittaks per rupee.

Champaran.—Rainfall at Sadar nil, Bettiah ·05. Harvesting of *rabi* nearly completed. Forty-three per cent. outturn expected. Preparation of lands for *bhadoi* in progress. Sugarcane planting nearly finished. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 12½ seers and maize at 23½ seers per rupee.

Muzaffarpur.—No rain. Weather hot. Harvesting of *rabi* crops almost finished. Threshing going on. Outturn of wheat and linseed estimated at 45 per cent. Fodder and water sufficient. A few cases of cattle-disease in Muzaffarpur town. Prices are—Common rice 12 seers and maize 22 seers a rupee.

Darbhanga.—Rainfall at Sadar 0·01, Samastipur 0·03, Madhubani 0·20. Harvesting of *rabi* nearly completed. Sowing of paddy in low land is going on. Weather seasonable. Fodder and water sufficient. Cattle-disease is reported from six villages of Darbhanga thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	10	8	
Madhubani	12	6	

Monghyr.—Rainfall at Sadar 0·06, Begusarai nil, Jamui 0·14. Days hot; nights cool. *Rabi* threshing vigorously going on. Poppy-cutting finished. Sugarcane being watered. Common rice sells at 11 seers 15 chitaks.

Bhagalpur.—Rainfall at Sadar, Banka, Madhipura nil, Supaul 0·08. Weather cloudy and windy. *Mung* and *dhan* sown. *Rabi* harvested except in Bangaon. Fodder and water sufficient. Stray cases of cattle-disease reported. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	12	10	per rupee.
Banka	...	...	...	13	2	
Madhipura	...	...	...	13	8	
Supaul	...	...	...	14	0	

Purnea.—Rainfall at Sadar and Araria nil, Kishanganj 0·30. Weather seasonable. Harvesting of *rabi* crops and tobacco finished. *Bhadoi* sowings in progress. No cattle-disease. Fodder available. Water for cattle becoming scarce in Araria subdivision: elsewhere sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	11	0	per rupee.
Kishanganj	...	...	...	10	8	
Araria	...	...	...	12	0	

Malda.—Rainfall at Sadar ·11. Weather hot and cloudy. Prospect of *boro* paddy good. Lands are being prepared for *bhadoi* paddy. Fodder and water sufficient everywhere. No cattle-disease. Common rice sells at 12½ seers per rupee.

Sonthal Parganas.—Average rainfall ·34. Weather cool with occasional storms. *Mahua* and mango damaged by storms. Outturn of *mahua* 60 per cent. Area under wheat normal: outturn 94 per cent. Grazing improved. Cattle-disease in Pakour subdivision. Average price of rice 12½ seers and of maize 20 seers 5 chitaks per rupee.

Cuttack.—Rainfall at Sadar 1·44, Jajpur 1·48, Kendrapara 0·08, Banki 1·10. Weather cloudy. Agricultural prospects improved by recent rain. *Dalua* ripening and being cut and harvested in places. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	14	12	per rupee.
Jajpur	...	...	...	14	7	
Kendrapara	...	...	...	15	12	
Banki	...	...	...	15	7	

Balasore.—Rainfall at Sadar 1·08. Weather cloudy in evenings. Ploughing continues. Sugarcane being transplanted. Cotton doing well. *Rabi* flowering. Cattle-disease reported from Bhadrak, Doleshahi, and Dhamnagar circles. Common rice sells at 15 and 18 seers per rupee at Sadar and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Sadar 0·47, Bissipara 0·88. Weather hot and cloudy. Sugarcane benefited by the recent rain. Cattle-disease reported from the interior. Price of common rice stationary.

Puri.—Rainfall at Sadar ·07, Khurda ·22. Ploughing for *sarad* paddy continues. Sugarcane and cotton thriving. Harvesting of *dalua* and *mung* continues. Other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells as follows:—

					Srs.	ch.	
Sadar	...	...	...	...	14	7	per rupee.
Khurda	...	...	...	...	15	12	
Interior	...	...	...	...	16	14	

Hazaribagh.—Rainfall at Sadar 0·31, Giridih 0·43. Weather cloudy. Cattle-disease reported from three *thanas*. Fodder and water sufficient. Paddy-fields being prepared. Common rice sells at 12½ seers both at Sadar and Giridih.

Ranchi.—Rainfall at Sadar 0·10. Weather hot and cloudy. Prospect of *tewa dhan* good. Common rice sells at 14½ seers per rupee. Cattle-disease continues in Ranchi, Khunti, Mandar, Silli, and Lohardaga *thanas*. Fodder dear at Sadar. Water sufficient.

Palamau.—Rainfall 0·26. Weather hot. *Rabi* harvesting nearly finished. Sugarcane being planted and watered in places. Cattle-disease continues in places. Fodder and water still sufficient. Prices at Sadar—Rice 11 seers 13 chittaks, *makai* 18 seers, and *mahua* 40½ seers per rupee

Manbhum.—Rainfall at Sadar ·17, Gobindpur 1·17. Weather seasonable. Crops on ground good. Fodder and water sufficient. No cattle-disease reported. Common rice sells at Sadar at 14 seers and at Gobindpur at 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 0·01. Pressing of sugarcane finished. Average price of rice 13½ seers in the district; at Chaibassa 13 seers per rupee.

General Summary.—Rain fell during the week in greater part of the Province, and the fall was moderately heavy at places, but it was scanty in Bihar, where several districts received no rain at all. The rain was generally beneficial to cultivation and standing crops, but some damage to *mahwa* and mango by the storms is reported from the Sonthal Parganas. Harvesting of *rabi* almost finished and threshing continues. Ploughing and sowing going on. Prospects fair. Cattle-disease reported from 18 districts. Water sufficient except in Saran and in the Araria subdivision of the Purnea district. Fodder is said to be dear at Ranchi and insufficient at Nalchiti thana in Backergunge: elsewhere it is sufficient. The price of rice has risen in 10 districts, fallen in 12, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

The total fall from 1st January to 12th April 1902	2·59
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·39

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; o, overcast; d, drizzling rain, t, thunder; ∠, lightning; g, gloomy; p, passing temporary showers; ↗, strong wind.

N.B.—In the weekly abstract from 16th to 22nd March 1902 *read* 66 9 *for* 66·7 as dew point of the 22nd March 1902.
